

Presented below are water quality standards that are in effect for Clean Water Act purposes.

EPA is posting these standards as a convenience to users and has made a reasonable effort to assure their accuracy. Additionally, EPA has made a reasonable effort to identify parts of the standards that are not approved, disapproved, or are otherwise not in effect for Clean Water Act purposes.

Recreation Designated Uses

Effective September 12, 2017

WDEQ's Recreational Designated Uses Web Map displays primary and secondary contact recreation designations in effect for Clean Water Act (CWA) purposes except the water bodies listed below. EPA approved the majority of the recreation designated use changes. EPA disapproved the use changes for ten water bodies where public comments provided sufficient information to show that the state's UAA does not demonstrate that low flow conditions or water levels at these locations actually prevent attainment of PCR.
