Hello,

This email gives cultural resource approval to continue with your work provided that you follow the following stipulation:

All work (portable facility, etc). should take place within the surveyed areas for the waterline corridor.

Tamara

Tamara, thank you for your message.

Based on our conversation, the NNHPD has given clearance for this project (Oscar Renda Contracting, Inc.) for the areas that were surveyed. It would be helpful if you would confirm this.

Please let me know if you have any questions about this.

Thanks.

Good morning,

All work (portable facility, etc). should take place within the surveyed areas for the waterline corridor.

A CRID form will not be issued for this project.

I hope that answers your questions.

Tamara

Tamara, thank you for your response.

1. Your email message states “NNHHPD requests that the portable facility, heavy machinery and vehicular traffic occur in areas that were previously surveyed for the waterline corridor and where known sites are NOT located.” Can you clarify what is being requested?
2. Can you confirm if a Cultural Resource Inventory Determination (CRID) Form will be issued by the NNHHPD and whether the CRID is needed for compliance under the National Historic Preservation Act (NHPA).

Thanks.

Hello Kelly,

The Navajo Nation Heritage & Historic Preservation Department has been working diligently with the Bureau of Reclamation for the Navajo Gallup Water Supply Project on Reaches 9-11 of the waterline. All surveys and compliance under the National Historic Preservation Act and the Navajo Nation Cultural Resources Protection Act

are completed and are undergoing testing, data recovery or alternative mitigation at the identified sites along the waterline corridor.

NNHHPD requests that the portable facility, heavy machinery and vehicular traffic occur in areas that were previously surveyed for the waterline corridor and where known sites are NOT located.

If you have any questions, please let us know.

Tamara

Subject: National Historic Preservation Act

Good Morning,

Thank you for speaking to me about Oscar Renda Consulting, Inc.'s application for a federal air permit to construct and operate a portable stone quarrying, crushing, and screening facility. The portable facility would support a pipeline project near highway 491 within the Navajo Nation Reservation in McKinley and San Juan Counties, New Mexico.

Attached are the application materials, which include information on historic preservation.

Please let me know whether there is any other information necessary to ensure that the project complies with the National Historic Preservation Act (NHPA).

Thanks.
