

# e-Manifest Fact Sheet: Site Manager

EPA is establishing a national system for tracking hazardous waste shipments electronically. This system known as “e-Manifest,” will modernize the nation’s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states. EPA is establishing e-Manifest per the Hazardous Waste Electronic Manifest Establishment Act, which Congress enacted into law on October 5, 2012. e-Manifest is a multi-faceted program that includes system development; regulation and policy; implementation and communication; and consultation with the e-Manifest federal advisory committee.

## What Site Managers Need to Know

- e-Manifest launches nationwide on June 30, 2018.
- Beginning June 30, receiving facilities will have the option to create and submit manifests electronically in e-Manifest.
- Receiving facilities must submit all manifests, both paper and electronic, to EPA.
- EPA will charge receiving facilities a fee for each manifest submitted. Fees are differentiated based on how the manifest is submitted.
- Receiving facilities must obtain an EPA Identification number for billing purposes. To obtain an EPA ID number, receivers can submit EPA’s Site Identification form (EPA form 8700-12).
- Site Managers have permission to view, create, and electronically sign manifests in e-Manifest.
- Site Managers also have ability to grant permissions to others in their organization.
- Site Manager permission extends across all RCRA (Resource Conservation and Recovery Act) RCRAInfo industry applications. In addition to permissions for e-Manifest, Site Managers also have permission to view, create, and sign other submissions, such as the Site Identification form (EPA form 8700-12) and the Biennial Report (BR) (EPA form 8700-13), where available.
- Site managers for receiving facilities will have the functionality in the e-Manifest web application to see their site invoices, submit payment through Pay.Gov and send an email to request more information regarding their invoices.
- There is no maximum number of Site Managers that can be assigned to any one site or EPA ID and one person can serve as Site Manager for multiple sites/EPA IDs.

## Assigning a Site Manager

A Site Manager has several responsibilities with respect to managing data in e-Manifest as well as RCRAInfo. Companies should give careful consideration of who can best fulfill the Site Manager responsibilities.

e-Manifest registration and instructions are available at: [www.epa.gov/e-Manifest](http://www.epa.gov/e-Manifest). Each individual must register separately. EPA encourages organizations to establish at least two individuals as Site Managers; there is no limit as to how many Site Managers an organization can assign. EPA or the states will approve the initial Site Manager request for each site and lower permission levels until the initial Site Manager request has been approved. Once an initial Site Manager has been assigned, the Site Manager will then approve other users in the organization for certain permissions (e.g., Viewer, Preparer, and Certifier) including other Site Managers.

Site Managers must complete an electronic signature agreement (ESA) as part of the registration process. Following EPA approval and activation of the Site Manager’s RCRAInfo account, he/she will be presented with an electronic signature agreement the first time they login. At that time, the Site Manager must complete the ESA. A Site Manager only needs to complete an ESA once. After completion, the ESA will apply to all sites (i.e., EPA ID) for which the user has permissions.

Site Managers must be granted approval per EPA ID and can request permission for multiple EPA IDs within one state at one time.

## What Site Managers Need to Do

---

### Obtain EPA ID Number

Each company site must obtain an EPA ID number (e.g. "VAD123456789") to register with e-Manifest to ensure that their site information is available in RCRAInfo. To obtain an EPA ID Number:

- Submit an EPA form 8700-12 to your RCRA-authorized state or EPA Region. The form can be found on RCRAInfo Web at <https://rcrainfo.epa.gov/rcrainfoweb>.
- Sign up electronically through myRCRAid (this option is only available for states that have opted in this application). Check here to see if you can submit the form electronically through your state: [https://rcrainfo.epa.gov/rcrainfoweb/modules/main/state\\_contacts.html](https://rcrainfo.epa.gov/rcrainfoweb/modules/main/state_contacts.html).
- If you already have an EPA ID, your site information (e.g., contact information) needs to be up-to-date. Check your information on RCRAInfo at <https://rcrainfo.epa.gov/rcrainfoweb/action/main-menu/view>.

### Approve Permissions for Others in the Organization

Site Managers will receive permission requests from company representatives for different permissions related to whether they want to view, create, and/or sign manifests electronically. Once a user's permissions are approved, Site Managers will be able to view and update the site permissions to another level, or remove access entirely, at any time. There are three permission levels for e-Manifest: Viewer, Preparer, and Certifier. These permissions are hierarchical so each permission can perform the functionality of the levels before it as well as the specific functionality for that given permission:

- Viewer - The user can view the manifests and other data for these sites within e-Manifest but cannot change the information in any manner.
- Preparer - The user can enter manifest data for specified sites within e-Manifest but cannot sign and submit the information to the e-Manifest system.
- Certifier - The user can sign and submit the information for these sites to the e-Manifest system. This user is required to obtain an Electronic Signature Agreement.

Site Managers can also register other company representatives as Site Managers. The Site Manager permission applies to all three modules in the RCRAInfo Industry Application (i.e., myRCRAid, BR, and e-Manifest).

A Site Manager will automatically be granted Certifier permission for all three modules and will be able to add users and grant permission levels for each module.

### Manage ESAs

Site Managers have the option of managing paper copy ESAs for other individuals within their organization. If choosing this option, the Site Manager would then have to collect signed paper ESAs from others in their organization and scan and upload the ESAs to the e-Manifest system.

### Manage API

Site Managers are also responsible for managing Application Programming Interfaces (APIs), should their organization use one to submit manifest data. APIs are used to transmit data between industry systems and EPA's e-Manifest system.

### Pay Invoices

Receiving facility Site Managers will be able to receive and pay invoices for their particular site(s); these invoices cannot be forwarded to or paid by someone other than a Site Manager. If you represent a larger company where a specific financial person will be responsible for paying invoices across many facilities, please ensure that individual has requested Site Manager permissions. Site Managers looking to pay their invoice can do so in RCRAInfo by clicking on the "Pay Bill" button. This will pull up a popup window that will allow you to make payments to Pay.Gov directly.
