Re: Intent to Sue the EPA for failure to enforce its mandatory duties to enforce rules and regulations.

Dear EPA,

I intend filing a Federal lawsuit, utilizing several federal regulations, against the EPA, and others, regarding the building of a solar array on exclusive farm use (EFU) farmland just north, and contiguous, of my home at 1614 Pine Street, Silverton, Oregon. If possible, I intend filing for a temporary injunction until such time as this case can be heard. The lawsuit claims will cover the following reasons why a solar array should not be completed:

1. Allowing a solar array installation on EFU land will endanger geese, and other bird, migratory patterns.
2. Allowing a solar array installation will cause birds, and other animal species, to lose their natural habitat.
3. Allowing a solar array installation will cause bird, and other species', deaths.
4. Allowing a solar array installation will cause increased local flooding, endangering, livestock, crops, residences, farm buildings, and residents
5. Allowing a solar array installation will cause a local zone of higher, unnatural, temperatures, and glare that will detrimentally effect local agriculture, livestock, wildlife, and residents.

If I should require an attorney to continue with the lawsuit, my claims will most likely expand. Thank you.

Sincerely,

Kris Yates
