

Please refer to the FY15 DERA Tribal RFP (Number EPA-OAR-OTAQ-15-05), for additional information

For the purposes of the FY15 DERA RFP, EPA determined remaining useful life (defined as the length of time from the current year to the point at which the engine or equipment should be retired according to EPA's NONROAD Model) for the following types of nonroad engines and equipment. The following tables display the eligible model years for each type of nonroad engine and equipment for three ranges of horsepower. The model years listed in the cells have seven or more years of useful life remaining, as defined by this program, and are eligible for the FY15 DERA Tribal RFP.
