EPA’s 87th update is to inform the community of the progress of activities related to the dredging performed on the 36-acre portion of the Pompton Lake Study Area known as the Acid Brook Delta (ABD).

**Activities performed (week of June 25th):**
- Continued mechanical placement of the eco-layer (i.e. sand) material in the eastern portion of the ABD.
- Continued restoration work associated with Uplands Soil Areas, ABD shoreline and Acid Brook.
- Continued eco-layer placement and restoration (including plantings) in Island Area.
- Continued demobilization of equipment no longer needed on-site.

**Activities scheduled (week of July 2nd):**
- Continue placement of ecological layer (4-inch lift) via mechanical means within the ABD.
- Continue activities on-site for restoration of Upland Soil Areas, ABD shoreline, and Acid Brook.
- Complete eco-layer placement/restoration grading at Island Area.
- Remove turbidity curtain at Island Area.
- Continue planting activities at Island Area.
- Continue demobilization equipment.
- Receive trucks daily for delivery of eco-layer, backfill, top soil.
- Continue routine inspection of site work areas per approved permits and for safety purposes.
- Continue lake turbidity/perimeter air (dust) monitoring.

**Notes:**

**WORK ON SATURDAY, JUNE 30TH (8 A.M. TILL 5 P.M.) INVOLVES EQUIPMENT MAINTENANCE AND WATERING OF PLANTS. GATES WILL BE CLOSED TO THE EXTENT PRACTICAL. THERE WILL BE NO WORK ON JULY 4TH.**

**PROGRESS OF THE ECO-LAYER PLACEMENT IS POSTED ON THE AFOREMENTIONED WEBSITE IN A FORMAT SIMILAR TO THE DEPICTION OF THE DREDGING PROGRESS.**

**PHOTOS:** THE FIRST PHOTO IS PLANTING IN THE ISLAND AREA. THE SECOND PHOTO SHOWS RESTORATION ACTIVITIES ALONG THE LAKESIDE AVENUE SHORELINE.
