Lesson #3: EnviroAtlas Webquest

Time Consideration

Prep time: Time to familiarize yourself with EnviroAtlas tool: 10-20 minutes, Actual Prep Time: 5-10 minutes, Activity time: 20-30 minutes

Materials

Printed handouts, student computers, internet access

Teacher Preparation

1. Reserve a computer lab or laptops for student use. If possible, having students work in pairs is best for this activity.
2. Print the EnviroAtlas Webquest handouts.

Procedure

1. Demonstrate in front of the whole class how to pull up a layer in EnviroAtlas.
2. Talk or review with students about the concept of ecosystem services: providing the benefits that humans receive from nature. Have students provide examples of ecosystem services and related human benefits.

Examples of ecosystem services: trees provide oxygen which we breathe; trees provide shade on the playground (US EPA 2008); wetlands filter water (Vellidis et al., 2003); forests provide places for people to recreate (Kline et al., 2011).

Examples of human benefits: reductions in stress and anxiety from spending time at the beach (MacKerron & Mourato 2013); reduced symptoms of post-traumatic stress disorder after spending a weekend fly-fishing by the river (Vella et al., 2013).

3. Guide students through the Webquest as they explore online. Please note that some of the vocabulary in the Interactive Map is at a high level.

4. **Evaluate:** Informal assessments can be made while monitoring student progress throughout the Webquest activity. In addition, student understanding can be formally assessed by evaluating written responses in the Student Handouts.

EnviroAtlas Webquest

To be used by students as an online exploration of the EPA EnviroAtlas tool.

These materials are all part of EPA Report #: EPA/600/R-18/231.

Name(s): ______________________________________________________ Date: ________________

A. Watch the first minute of the following EnviroAtlas YouTube video: https://www.youtube.com/watch?v=ZMU8ZLsCmUM and answer the question below.

1. What are some benefits that ecosystems provide to humans? ____________________________________________________________________________________________

B. Go to the EnviroAtlas Website: https://www.epa.gov/enviroatlas

C. Scroll down and click on “EnviroAtlas Interactive Map.”

D. Click on the image of the map, as shown in Figure 1.

E. In the search bar next to the magnifying glass, type in the name of your school, a comma, and the two letters for your State.

F. The map will zoom in to your school and have a little box that pops up that says, “Search Result.” It looks like the example in Figure 2 below. Click on the three dots.

G. Click the + sign that says “Add a Marker.”

H. At the top, click on the box that looks like 4 squares inside of one square. This will let you change your basemap. Choose “Imagery with Labels.” Close out of the box.

I. Limit to National data.

J. Select the “Weather and Climate” category.

K. Click in the box next to where it says, “Average annual precipitation (inches/yr).” This will show you a map of Average annual precipitation across the entire United States.

L. In the “Layer List” covering part of the map to the right, click one time on the name of the layer to pull up the Legend.

US Environmental Protection Agency | May be reproduced for educational purposes only
M. **Zoom out** until you can see some differences across your State and the entire country. *[Image]*

**Using the Map Legend,** compare the area around your school to the rest of the State and country.

2. Does your school get more or less average annual precipitation (rain) than the rest of the country?

____________________________
____________________________
____________________________

N. To read more about this map layer, **click on** the little “i” on the left-hand side of the screen, next to the name of the map layer. **Optional: Open and read** the Fact Sheet.

3. **Write down** one interesting fact that you learned from either the short write-up or the Fact Sheet:

____________________________________________________________________
____________________________________________________________________

O. To remove the layer, go into the Layer List and uncheck the box next to the layer name.

P. **Explore the map.** Find 2 other layers and record a few interesting facts about each one.

4. Name of new Layer that you chose #1: ______________________________________

____________________________________________________________________

5. Interesting Fact about layer #1: ____________________________________________

____________________________________________________________________

6. Name of new layer that you chose #2: ______________________________________

____________________________________________________________________

7. Interesting Fact about layer #2: ____________________________________________

____________________________________________________________________

8. List anything else that you found and thought was interesting while exploring the map, especially if it relates to our current unit in class: ______________________________

____________________________________________________________________
