Note: For quality assurance, EPA's monitoring plan calls for collocated samples to be collected for each sampling day at the Willowbrook Village Hall or the EPA Willowbrook Warehouse – the expected locations of maximum concentrations.

Those data are reported in the table as Willowbrook Village Hall 2 and EPA Willowbrook Warehouse 2.

ND – non detect. Ethylene Oxide was either not present in the sample or was at a level below the level the method could detect.

Invalid -- the sample did not meet EPA's field, shipping, laboratory or other quality assurance criteria.

Trans -2- butene detected although concentration is too low to quantify .
