

Top 30 On-site Generation (as of October 29, 2018)

The Top 30 On-site Generation list represents those partners generating and consuming the most green power on-site within the Green Power Partnership. The combined on-site green power consumption of these organizations amounts to more than 1.6 billion kilowatt-hours of green power annually, which is equivalent to the electricity use of more than 150,000 average American homes each year.
