Your message to nero@goeasassociates.com couldn't be delivered.

nero wasn't found at goeasassociates.com.

wheeler.andrew	Office 365	nero
Action Required		Recipient
Unknown To address		

How to Fix It

The address may be misspelled or may not exist. Try one or more of the following:

- Send the message again following these steps: In Outlook, open this non-delivery report (NDR) and choose **Send Again** from the Report ribbon. In Outlook on the web, select this NDR, then select the link "**To send this message again, click here.**" Then delete and retype the entire recipient address. If prompted with an Auto-Complete List suggestion don't select it. After typing the complete address, click **Send**.
- Contact the recipient (by phone, for example) to check that the address exists and is correct.
- The recipient may have set up email forwarding to an incorrect address. Ask them to check that any forwarding they've set up is working correctly.
- Clear the recipient Auto-Complete List in Outlook or Outlook on the web by following the steps in this article: [Fix email delivery issues for error code 5.1.1 in Office 365](#), and then send the message again. Retype the entire recipient address before selecting **Send**.

If the problem continues, forward this message to your email admin. If you're an email admin, refer to the **More Info for Email Admins** section below.

Was this helpful? [Send feedback to Microsoft.](#)

More Info for Email Admins

Status code: 550 5.1.1

This error occurs because the sender sent a message to an email address outside of Office 365, but the address is incorrect or doesn't exist at the destination domain. The error is reported by the recipient domain's email server, but most often it must be fixed by the person who sent the message. If the steps in the **How to Fix It** section above don't fix the problem, and you're the email admin for the recipient, try one or more of the following:

The email address exists and is correct - Confirm that the recipient address exists, is correct, and is accepting messages.

Synchronize your directories - If you have a hybrid environment and are using directory synchronization make sure the recipient's email address is synced correctly in both Office 365 and in your on-premises directory.

Errant forwarding rule - Check for forwarding rules that aren't behaving as expected. Forwarding can be set up by an admin via mail flow rules or mailbox forwarding address settings, or by the recipient via the Inbox Rules feature.

Mail flow settings and MX records are not correct - Misconfigured mail flow or MX record settings can cause this error. Check your Office 365 mail flow settings to make sure your domain and any mail flow connectors are set up correctly. Also, work with your domain registrar to make sure the MX records for your domain are configured correctly.

For more information and additional tips to fix this issue, see [Fix email delivery issues for error code 550 5.1.1 in Office 365](#).

Subject: FW: Invitation to NERO Annual Dinner

Hi there,

OGC/Ethics understands that you have received an invitation from the National Energy Resources Organization (NERO). You have been invited to attend as their guest at their annual awards dinner to be held this year on June 21, 2018, at the Capitol Hill Hyatt Regency Hotel. I am writing to confirm that, if you decide to attend this event, you may do so consistent with the Standards of Ethical Conduct for Employees of the Executive Branch and the Trump Ethics Pledge. NERO is not a federally registered lobbyist, so this invitation does not trigger any concerns under the lobbying gift ban.

The gift offered is an evening reception and dinner sponsored by NERO. I have confirmed that the organization is offering you a complimentary ticket, so we must analyze it according to the gift rules. Generally, federal employees are prohibited from accepting gifts given because of their official position or given by a prohibited source (typically, a person either regulated by or seeking to do business with the EPA). In this instance, the gift of free attendance is offered to you either because of your official position or because you were formerly associated with NERO. Irrespective of the reason for your invitation, OGC/Ethics concludes that you may attend.

In analyzing the situation, we determined that the WAG exception is available because the reception will be widely attended, there will be a diversity of views represented, and there is an opportunity for the exchange of ideas. In order to utilize this gift exception, OGC/Ethics must also make a written determination that we believe your attendance is in the Agency's interest. We do, in fact, conclude that there is an Agency interest in your attendance. If you do attend, then you will need not report this gift on your next financial disclosure report because we are evaluating your gift at the government rate (\$75), which is BELOW the reporting threshold (currently \$390). We note that there is a marked price differential between the government rate and the member/non-member rates (members pay \$450, while non-members pay \$900). Because you are a government employee, you qualify for the government rate, so that is the price point we are using to evaluate your ticket.

I appreciate that you were recently affiliated with NERO as a non-fiduciary director. Under the federal impartiality rules, you have a "covered relationship" with them. See 5 CFR 2635.502(b)(1)(iv). That said, this event takes place after business hours, and you will not be speaking or otherwise presenting information on behalf of the agency. Based on the facts before me, I don't see any reason to conclude that your attendance would raise any concern about a loss of impartiality in performing your official EPA duties.

Please note that this event is a fundraiser. Therefore, NERO cannot use or reference your official position or title or any authority associated with your public office in furtherance of the fundraising effort. You may not actively or visibly participate in the promotion, production, or presentation of the event, which means that you cannot sit at a head table nor stand in a receiving line. You should be placed by NERO wherever they wish to seat you and cannot be seated at the request of any sponsoring entity that has bought a table.

Please let me know if you have any questions.

Regards,
justina

Justina Fugh | Senior Counsel for Ethics | Office of General Counsel | US EPA | Mail Code 2311A | Room 4308 North, William Jefferson Clinton Federal Building | Washington, DC 20460 (for ground deliveries, use 20004 for the zip code) | phone 202-564-1786 | fax 202-564-1772

Subject: FW: Invitation to NERO Annual Dinner

Justina, I would like to attend this dinner. I have been invited as a guest of NERO. Ideally I would like to attend without paying the government rate since they are a non-profit and have invited me. If that's not possible I'll buy a ticket. Thanks.

Hi Andy,

I hope all is well! Attached, and below, is the invitation to the annual dinner. The Government rate for an individual ticket is \$75. I have also attached an informational page addressing the ethics questions we typically receive for our events. Happy to address any other questions they may have. Also, can we

add you/your EPA email address to our distribution list so that you receive all invites?

National Energy Resources Organization

2018 Annual Awards Dinner – Thursday, June 21, 2018

Federal Government Ethics – Frequently Asked Questions (5/30/18)

- 1.) Who are the sponsors of the event: National Energy Resources Organization (NERO).
- 2.) Are those sponsoring the event non-profit, 501(c)3? or a media organization: Yes, NERO is a 501(c)3.
- 3.) What is the purpose of the event? Is the event a fundraiser? The event is an annual awards dinner, at which NERO will recognize Majority Whip, Rep. Steve Scalise, and Senator Heidi Heitkamp, for their outstanding contributions to the energy industry; individuals who are retiring or have recently retired after several years in the energy industry; and traditional recognition awards for NERO members. Funds will be used to cover the cost of this event, and any amount exceeding that will be used for other NERO-sponsored activities and events.
- 4.) What other types of people are expected to attend? (For example, members from throughout a given industry; other Federal, state, or local government officials; etc.)

Members of NERO, as well as non-members, consisting of executives from public and private utilities, corporations, and associations; state and federal regulators; attorneys; energy retailers; federal and state government employees

NERO's invited guests also consist of: Senators, Members of Congress; House and Senate staff / Federal and state government employees; others as requested

- 5.) Will the attendees represent a range of persons interested in a given matter? If Yes, what matter?

Yes; Energy.

- 6.) Approximately how many people are expected to attend? Approximately 250-300.

- 7.) What is the monetary value of the gift of free attendance (conference fee and/or food, refreshments, entertainment, instruction, and materials furnished to all attendees as an integral part of the event) and how was this cost determined? (Attach separate sheet, if necessary.) Approximately \$75 - \$125 for cocktail reception, sit-down dinner and dessert reception. Total estimated cost of these was divided by an estimated number of attendees.

Subject: NSPS Follow Up and meeting request

Hi Andrew,

Thanks for taking the time at NAM this week to chat. I had asked a question about the progress of the NSPS rulemaking (the oil and gas methane rule), and you suggested I follow up for more of a response. Are you able to have a meeting with the environmental strategy group at API? We'd love to come in and brief you on the issues that are most important to the industry. I know you've only been in for 9 weeks, but if you have 30 minutes, we'd love the chance to chat.

Thanks, again, for your time this week and I look forward to working with you.

Regards,
Hilary

Thanks Andrew,
I'll have a tuned up version early tomorrow.
When we were talking about multiple versions of the Official Portrait I should have mentioned I've made informal portraits of Deputy Administrators for those times when the flag/studio image is too much. After you settle in, if you like, we can make another in your office or another location.

Subject: FW: Upstate Forever v. Kinder Morgan

Dear Andrew: First, congratulations on successfully navigating the confirmation process. Glad you are there. Second, I wanted to make you aware of a 4th Circuit decision that has implications for WOTUS and the reach of the Clean Water Act, though it is at odds with several other precedents. Summary from our in-house counsel is below. We'd be pleased to discuss possibility of an amicus whenever it might be appropriate. Best wishes, Dave

The United States Court of Appeals for the Fourth Circuit recently reversed a trial court decision and reinstated a Clean Water Act ("CWA") citizen suit brought by Upstate Forever and the Savannah River Keeper ("Plaintiffs"). Many key facts were not disputed. An affiliate of Kinder Morgan had a rupture in a pipeline that released gasoline into soil and groundwater. The pipeline was repaired in just a few days, so by the time Plaintiffs sued – two years after the incident – the pipeline was no longer leaking, but gasoline from the one-time incident was allegedly migrating to surface waters via ground water. Plaintiffs asserted that they could still bring a CWA citizen suit because gasoline was reaching surface waters that were under CWA jurisdiction. The majority opinion stated that the case required the Court to decide if citizens can bring a CWA citizen suit "when the source of the pollution, the pipeline, is no longer releasing the pollutant, but the pollutant allegedly is passing a short distance through the earth via ground water and is being discharged into surface waterways." In particular, the court found that the CWA's language does not require that a point source continue to release a pollutant to meet the "ongoing" or "continuous" element of a citizen suit; it requires only that "there be an ongoing 'addition...to navigable waters'" regardless of whether a defendant's conduct causing the violation is ongoing.

One of the appellate judges disagreed and dissented. The dissent stated the only identifiable point source at issue, the pipeline, "has been repaired and is not currently adding any pollutants into navigable waters, thus negating a necessary element of a continuing CWA violation." The dissent also stated that ongoing ground water migration from a spill site does not amount to a CWA violation and cannot support a citizen suit. According to the dissent, "a point source must currently be involved in the discharging activity by adding, conveying, transporting, or introducing pollutants to the navigable waters" to support an ongoing CWA violation.

On April 26, 2018, Kinder Morgan filed a petition seeking en banc review of the decision. If our petition is denied, we will have 90 days from the date of denial to file a Petition for Cert. to SCOTUS. Given the dissent and the amicus briefs submitted in support of Kinder Morgan, this case may be a strong candidate for review by SCOTUS.

We understand EPA has issued a Request for Comments on Clean Water Act ("CWA" or "the Act") Coverage of "Discharges of Pollutants" via a Direct Hydrologic Connection to Surface Water, 83 Fed. Reg. 7126 (Feb. 20, 2018). However, this case need not be decided on the hydrologic connection issue. Instead, as the dissent pointed out, a point source must currently be involved in the discharging activity for CWA jurisdiction to attach. To hold otherwise is a fundamental shift in CWA enforcement authority from the States and EPA to citizen's suits. It is important to note that the State of South Carolina has not only the primary authority to regulate nonpoint source and groundwater pollution, but it is actually exercising that authority and is aggressively overseeing the remediation of the spill. As is, the Fourth Circuit's decision will allow any citizen's group to override remedial decisions and approvals made by the State. Congress intended citizen's suits to be an adjunct to a lack of State or Federal enforcement, not supplant such oversight. Additionally, SCOTUS expressly ruled that unless the discharge of a pollutant is ongoing at the time a citizen's suit complaint is filed, any violation is wholly in the past. *Gwaltney of Smithfield, Ltd. v. Chesapeake Bay Found., Inc.*, 484 U.S. 49 (1987). Numerous courts have held that the mere continuing residual effects resulting from a discharge or migration of residual contamination from previous releases are not equivalent to a continuing discharge. *Hamker v. Diamond Shamrock Chem. Co.*, 756 F.2d 392 (5th Cir. 1985); see also *Sierra Club v. El Paso Gold Mines, Inc.*, 421 F.3d

1133, 1140 (10th Cir. 2005); *Wilson v. Amoco Corp.*, 33 F. Supp. 2d 969, 975 (D. Wyo. 1998), *Aiello v. Town of Brookhaven*, 136 F. Supp. 2d 81, 120-21 (E.D.N.Y. 2001); *Friends of Santa Fe Cty. v. LAC Minerals, Inc.*, 892 F. Supp. 1333, 1354 (D.N.M. 1995).

As such, we believe it is important for EPA to protect its CWA jurisdiction and assert that when a point source is no longer actively discharging that this past violation, while continuing to be subject to State and Federal enforcement authority, is not subject to citizen's suits under the CWA. Thus, we recommend EPA filing an amicus-curiae supporting Kinder Morgan's Petition for Cert if filed.

EMBARGOED UNTIL 8 AM CDT, WEDNESDAY, MAY 23, 2018

ExxonMobil Announces Greenhouse Gas Reduction Measures

- Methane emissions to drop 15 percent, flaring reduced by 25 percent by 2020
- Improving industry-leading energy efficiency in refining and chemical manufacturing

IRVING, Texas – ExxonMobil today announced greenhouse gas reduction measures that are expected to lead to significant improvements in emissions performance by 2020, including a 15 percent decrease in methane emissions and a 25 percent reduction in flaring. The company also announced its intention to improve its industry-leading energy efficiency in refining and chemical manufacturing facilities.

ExxonMobil invests in lower-emission energy solutions such as cogeneration, flare reduction, energy efficiency, biofuels, carbon capture and storage and other technologies. ExxonMobil has spent more than \$9 billion on lower-emission energy solutions since 2000.

“We have a longstanding commitment to improve efficiency and mitigate greenhouse gas emissions,” said Darren W. Woods, chairman and chief executive officer. “Today’s announcement builds on that commitment and will help further drive improvements in our business.”

ExxonMobil is undertaking a number of initiatives to significantly reduce methane emissions. XTO Energy’s leak-detection-and-repair efforts and operational improvements at U.S. production and midstream sites have reduced estimated methane emissions across ExxonMobil operations by 2 percent in the past year. Combined with additional measures outside the U.S. focused on the most significant sources of methane, ExxonMobil expects to achieve a 15 percent reduction of methane emissions by 2020 compared with 2016.

ExxonMobil is one of eight global energy companies that supports guiding principles on methane reduction. The principles focus on continually reducing methane emissions, advancing strong performance across gas value chains, improving accuracy of methane emissions data and advocating sound policies and regulations on methane emissions. ExxonMobil is a founding member of the API’s Environmental Partnership, which is focused initially on reducing methane and volatile organic compound emissions.

Efforts associated with oil and gas production and processing are expected to lower natural gas flaring across ExxonMobil operations by about 25 percent by 2020 compared with 2016. The most significant reductions are expected to occur in operations in West Africa and include use of third-party infrastructure.

ExxonMobil is a charter member of the Global Gas Flaring Reduction Public-Private Partnership, which is committed to developing commercial opportunities to reduce flaring. The partnership is comprised of oil-producing countries, international and state-owned oil companies and the World Bank.

Further greenhouse-gas emissions reduction efforts will target ExxonMobil's global refining and chemicals manufacturing network with the goal of improving existing industry-leading energy efficiency performance.

ExxonMobil is the most energy efficient refining company in the U.S. and internationally. The company has achieved a 10 percent improvement in energy efficiency across its global refining operations following an effort launched in 2000. ExxonMobil refining operations ranked in the first quartile for energy efficiency in every Solomon Refining Industry Survey over the past decade. Advanced efficiency technologies and techniques have helped ExxonMobil's chemical business reduce its net greenhouse gas emissions intensity by nearly 7 percent since 2013.

ExxonMobil remains committed to mitigating emissions from its operations and helping consumers reduce their emissions, including through efficient fuels, lubricants and lightweight plastics.

ExxonMobil continues to support research that leads to technology breakthroughs and participates in constructive dialogue on policy options.

About ExxonMobil

ExxonMobil, the largest publicly traded international oil and gas company, uses technology and innovation to help meet the world's growing energy needs. ExxonMobil holds an industry-leading inventory of resources, is one of the largest refiners and marketers of petroleum products, and its chemical company is one of the largest in the world. For more information, visit www.exxonmobil.com or follow us on Twitter at www.twitter.com/exxonmobil.

Cautionary Statement: Statements of future events or conditions in this release are forward-looking statements. Actual future results, including emission reductions, timing and costs and efficiency gains, could differ materially depending on political or regulatory developments; technical or operating factors; timely completion of planned projects; and other factors described under the caption "Factors Affecting Future Results" on the Investors page at exxonmobil.com.

Hi Andy,

I hope you've been well, and congratulations on your confirmation as EPA Deputy Administrator! I'm not sure if you recall, but I used work for Bill Johnson as his scheduler before joining Duke this past August. I love that I get to cross paths with so many familiar folks!

Louis asked that I RSVP for your ceremonial swearing-in celebration – he plans to be there on May 4th.

Enjoy your weekend!

Subject: FW: Invitation to NERO Annual Dinner

Hi there,

OGC/Ethics understands that you have received an invitation from the National Energy Resources Organization (NERO). You have been invited to attend as their guest at their annual awards dinner to be held this year on June 21, 2018, at the Capitol Hill Hyatt Regency Hotel. I am writing to confirm that, if you decide to attend this event, you may do so consistent with the Standards of Ethical Conduct for Employees of the Executive Branch and the Trump Ethics Pledge. NERO is not a federally registered lobbyist, so this invitation does not trigger any concerns under the lobbying gift ban.

The gift offered is an evening reception and dinner sponsored by NERO. I have confirmed that the organization is offering you a complimentary ticket, so we must analyze it according to the gift rules. Generally, federal employees are prohibited from accepting gifts given because of their official position or given by a prohibited source (typically, a person either regulated by or seeking to do business with the EPA). In this instance, the gift of free attendance is offered to you either because of your official position or because you were formerly associated with NERO. Irrespective of the reason for your invitation, OGC/Ethics concludes that you may attend.

In analyzing the situation, we determined that the WAG exception is available because the reception will be widely attended, there will be a diversity of views represented, and there is an opportunity for the exchange of ideas. In order to utilize this gift exception, OGC/Ethics must also make a written determination that we believe your attendance is in the Agency's interest. We do, in fact, conclude that there is an Agency interest in your attendance. If you do attend, then you will need not report this gift on your next financial disclosure report because we are evaluating your gift at the government rate (\$75), which is BELOW the reporting threshold (currently \$390). We note that there is a marked price differential between the government rate and the member/non-member rates (members pay \$450, while non-members pay \$900). Because you are a government employee, you qualify for the government rate, so that is the price point we are using to evaluate your ticket.

I appreciate that you were recently affiliated with NERO as a non-fiduciary director. Under the federal impartiality rules, you have a "covered relationship" with them. See 5 CFR 2635.502(b)(1)(iv). That said, this event takes place after business hours, and you will not be speaking or otherwise presenting information on behalf of the agency. Based on the facts before me, I don't see any reason to conclude that your attendance would raise any concern about a loss of impartiality in performing your official EPA duties.

Please note that this event is a fundraiser. Therefore, NERO cannot use or reference your official position or title or any authority associated with your public office in furtherance of the fundraising effort. You may not actively or visibly participate in the promotion, production, or presentation of the event, which means that you cannot sit at a head table nor stand in a receiving line. You should be placed by NERO wherever they wish to seat you and cannot be seated at the request of any sponsoring entity that has bought a table.

Please let me know if you have any questions.

Regards,
justina

Subject: FW: Invitation to NERO Annual Dinner

Justina, I would like to attend this dinner. I have been invited as a guest of NERO. Ideally I would like to attend without paying the government rate since they are a non-profit and have invited me. If that's not possible I'll buy a ticket. Thanks.

Hi Andy,

I hope all is well! Attached, and below, is the invitation to the annual dinner. The Government rate for an individual ticket is \$75. I have also attached an informational page addressing the ethics questions we typically receive for our events. Happy to address any other questions they may have. Also, can we

add you/your EPA email address to our distribution list so that you receive all invites?

National Energy Resources Organization

2018 Annual Awards Dinner – Thursday, June 21, 2018

Federal Government Ethics – Frequently Asked Questions (5/30/18)

- 1.) Who are the sponsors of the event: National Energy Resources Organization (NERO).
- 2.) Are those sponsoring the event non-profit, 501(c)3? or a media organization: Yes, NERO is a 501(c)3.
- 3.) What is the purpose of the event? Is the event a fundraiser? The event is an annual awards dinner, at which NERO will recognize Majority Whip, Rep. Steve Scalise, and Senator Heidi Heitkamp, for their outstanding contributions to the energy industry; individuals who are retiring or have recently retired after several years in the energy industry; and traditional recognition awards for NERO members. Funds will be used to cover the cost of this event, and any amount exceeding that will be used for other NERO-sponsored activities and events.
- 4.) What other types of people are expected to attend? (For example, members from throughout a given industry; other Federal, state, or local government officials; etc.)

Members of NERO, as well as non-members, consisting of executives from public and private utilities, corporations, and associations; state and federal regulators; attorneys; energy retailers; federal and state government employees

NERO's invited guests also consist of: Senators, Members of Congress; House and Senate staff / Federal and state government employees; others as requested

- 5.) Will the attendees represent a range of persons interested in a given matter? If Yes, what matter?

Yes; Energy.

- 6.) Approximately how many people are expected to attend? Approximately 250-300.

- 7.) What is the monetary value of the gift of free attendance (conference fee and/or food, refreshments, entertainment, instruction, and materials furnished to all attendees as an integral part of the event) and how was this cost determined? (Attach separate sheet, if necessary.) Approximately \$75 - \$125 for cocktail reception, sit-down dinner and dessert reception. Total estimated cost of these was divided by an estimated number of attendees.
