

Monica Linnenbrink, Acting Deputy Director, in EPA's National Center for Computational Toxicology

[Mailing Address](#)

linnenbrink.monica@epa.gov

Area of Expertise: Monica Linnenbrink brings a wealth of expertise gained from multiple leadership positions in the private sector, state government and federal government to the EPA's National Center for Computational Toxicology. She is an expert in developing and implementing stakeholder outreach efforts to engage all involved groups. Her work has required her to develop collaborations that advance shared goals, whether that be in the private sector or in government at both the state and federal level. She has extensive experience developing and implementing a legislative agenda while overseeing government contracts at both the state and federal level.

Education:

- B.S., University of Florida, Gainesville, FL; Public Relations, Business and Computer Science
- M.P.A., Florida State University, Tallahassee, FL; Public Administration

Professional Experience:

- EPA Office of Research and Development Award: Communications work during BP Oil Spill
- EPA Office of Research and Development Impact Award
- EPA Scientific Achievement Award
- ACI (Association for Conservation Information) Board Member, 2003-2007
