Part 71 Permit Amendment
Enterprise Services LLC
Lindrith Compressor Station

BACKGROUND: Lindrith submitted a Part 71 permit amendment to incorporate the synthetic minor NSR issued by EPA on March 7, 2018

Lindrith
Compressor Station,

Regulations:

Administrative 40.71(d)(i)-(v)	Minor Modification 40.71(e)(1)	Enterprise
	Permit modification is a revision to a Part 71 permit that cannot be accomplished under the provisions for administrative amendment	
Incorporates in part 71 permit the requirements from preconstruction review permits under an EPA authorized program [40.71(d)(v)]		Incorporates the synthetic minor permit issued on March 7, 2018 by R6- no other changes.  final permit 2-23-18.pdf
60 days to issue	90 days to issue	
No public notice or notice to adjacent states	Notification to adjacent tribes/states within 5 working days of a complete application	

EPA review of the regulations indicate that the permit meets all the requirements for an administrative permit amendment since the synthetic minor NSR permit went through the 30 day public comment/public participation identical to a Part 71 permit public participation process.

Therefore, the synthetic minor permit will be incorporated by reference to the Part 71 permit Number R6NM-03-R1. This permit will need to be renewed on November 4, 2020 and the terms and conditions of the synthetic minor NSR permit will be incorporated directly into the part 71 permit.
