Region 10 Tribal Coordinator Staff Changes

The EPA Region 10 Tribal Trust and Assistance Branch currently has 14 staff available to serve each of the federally recognized tribes in Alaska, Idaho, Oregon, and Washington. Tribal coordinators fulfill dual roles, as liaisons between the tribes and the agency on environmental and agency issues, and as project officers for Indian Environmental General Assistance Program grants. TTAB strives to keep tribes and tribal consortia assigned to a tribal coordinator who serves their geographic region, while also trying to keep the number of tribes that each serves relatively balanced.

In late March we will bid a fond farewell to [JR Herbst](#), who is transferring to EPA Region 9 to work as a tribal coordinator. JR has been with TTAB for the past nine years as the Bristol Bay tribal coordinator, as staff lead on tribal consultation and coordination, and has provided support to the Region 10 Tribal Operations Committee. We are grateful to JR for his years of service and dedication to the tribes. If you would like to send JR well wishes, his email will remain the same. As JR departs TTAB, we welcome Catherine Vila in joining the TTAB in serving tribes as a project officer. Catherine is a long-time grants coordinator for Region 10.

Catherine Vila, EPA Grants Coordinator joins TTAB.

These staffing changes result in TTAB needing to shift tribal assignments. The tribal coordinators are in the process of notifying the affected tribes and transferring IGAP grants under the new assignment structure. If your tribe or consortia is notified of a change in your tribal coordinator, and

your organization submitted a FY2021 IGAP proposal, that notification will include information on the proposal review process for this grant cycle. Once all affected tribes are all notified, we will update the list of assignments on the EPA [Region 10 Tribal Contacts](#) website.

Thank you for your understanding and patience as we make these adjustments. Our goals are to ensure smooth transitions and award the grants in a timely manner so that you can continue the important work you do in support of your communities. Please contact **Stacy Murphy**, TTAB Manager with any questions or concerns at 206-553-2106 or murphy.stacy@epa.gov.

Pop Quiz

A leaky faucet dripping at the rate of one drip per second can waste how many gallons of water per year?

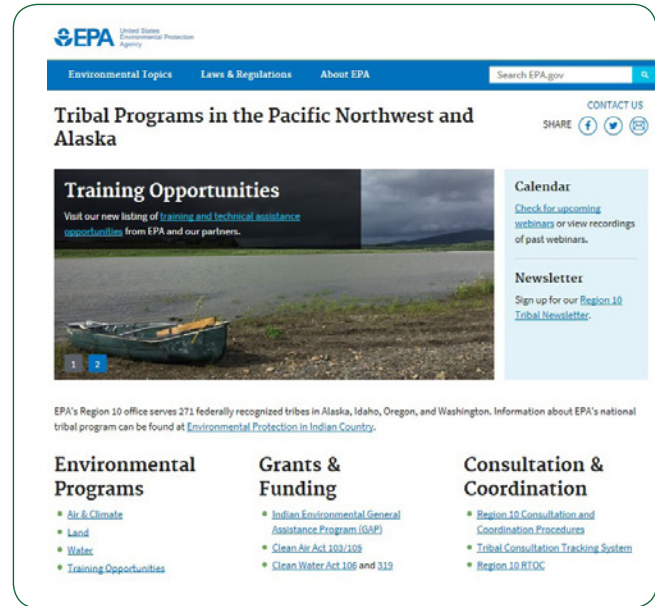

- A. 10
- B. 500
- C. 3,000
- D. 13,000

See answer on page 9.

Improvements to Region 10 Tribal Programs Website

We recently updated and redesigned our [Tribal Programs in the Pacific Northwest and Alaska](#) website to make it easier to find the information you need. The upgraded website provides quick and easy access to useful news, technical resources, and information. The site features a calendar of Region 10 tribal events, a new clean water page, a new Quality Assurance Project Plan page, and a new [Training and Technical Assistance for Tribes in Region 10](#) page. Please take a tour of the site and remember to add it as a favorite in your web browser's bookmarks.

The new [Quality Assurance Project Plans for Tribes in Region 10](#) website was designed to improve understanding of EPA's Quality Assurance Project Plan requirements. QAPPs are required for EPA grant recipients who want to conduct data collection - such as surveying, monitoring, or assessing environmental conditions in communities. A QAPP describes the plan for gathering and using environmental data. You'll find a variety of resources on the page, including QAPP templates, information on training, and how to obtain an example of an EPA approved QAPP on your topic. We hope the new site will be helpful in developing QAPPs and speeding up the approval process.

Overcoming Barriers to Sustainable Waste Management in Tribal Communities Report

The [Overcoming Barriers to Sustainable Waste Management in Tribal Communities](#) report identifies barriers faced by tribes in developing and implementing sustainable waste management programs, minimizing the generation of waste materials, achieving controlled and safe waste disposal practices, and cleaning up and closing open dumps.

The report also provides a variety of strategies that could be implemented to help overcome those barriers and includes examples of *Strategies in Action* to illustrate the potential effectiveness of the various strategies.

An Infrastructure Task Force Work Team authored the report. The ITF was created in 2007 to develop and coordinate federal activities for delivering water infrastructure, wastewater infrastructure, and solid waste management services to tribal communities.

To learn more about the ITF, access the report and others like it, check out EPA's [Infrastructure Task Force Tribal Solid Waste Management](#) website.

National Tribal Water Council Seeks At-Large Member

The National Tribal Water Council is a technical and scientific body established to advocate for the interests of federally recognized tribes in matters pertaining to water. The council is currently accepting applications from tribal water professionals for an at-large member.

Member duties include reviewing and discussing water-related issues in Indian country, assisting the council in informing tribes on a wide variety of water issues, developing position papers and response documents on water-related issues affecting tribes, participating in monthly conference calls and biannual meetings. To learn more, check out the [National Tribal Water Council](#) website. To express your interest, contact **Elaine Wilson** by phone at 480-340-2306 or elaine.wilson@nau.edu.

Alaska News

AIEO and Region 10 Engagements in Alaska

In February, EPA’s American Indian Environmental Office Director Scott Mason traveled to Anchorage, AK to meet with the EPA Region 10 Alaska Operations Office (including several tribal coordinators) and participate in the Alaska Forum on the Environment.

During the Alaska Forum, AIEO Director Mason, along with AIEO Program Analyst Paige Lieberman, and AOO Deputy Director Tami Fordham, shared comments with tribal officials and Alaska Native Claims Settlement Act corporation representatives on EPA’s draft *Guiding Principles for Consulting with Alaska*

Native Claims Settlement Act Corporations (Guiding Principles). EPA’s draft Guiding Principles document outlines how EPA consults with ANCSA corporations when a regulatory action has direct effects on an ANCSA corporation. Details about the opportunity to consult on EPA’s Guiding Principles are available on page 4.

During his trip to Alaska, AIEO Director Mason had opportunities to discuss AIEO priorities and the Indian Environmental General Assistance Program with tribal officials, tribal staff, and state and federal representatives. He participated in discussions where he heard about successful grants, including IGAP as a catalyst for environmental change, new resources, and education. EPA Regional Administrator **Chris Hladick** also attended the Alaska Forum.

AIEO and Region 10 Engagements in Alaska

He joined Alaska Department of Environmental Conservation Commissioner Jason Brune for a keynote panel discussing current priorities of the EPA and Alaska DEC. Administrator Hladick also opened the Alaska Marine Debris Summit alongside Senator Dan Sullivan (who joined by video) on the final day of the Alaska Forum. Both he and Senator Sullivan shared encouraging news about future marine debris funding sources and commitment by the federal government.

RTOC

The Region 10 Regional Tribal Operations Committee is a partnership between EPA and elected tribal representatives to further tribal environmental objectives at the regional level, serve as a liaison between the EPA and tribes regarding information exchange, and provide assistance to the National Tribal Operations Committee.

Upcoming RTOC Meetings

March 17-20 • Quarterly Meeting • Seattle, WA

[Submit Meeting Discussion Topics](#)

REGION 10 TRIBAL ENVIRONMENTAL LEADERS 2020 SUMMIT

2020 Tribal Environmental Leaders Summit

FORMAL DATE CHANGE!

September 23-25 • Anchorage, AK

It is important to the RTOC to have representation from all our region’s tribes in Alaska, Idaho, Oregon, and Washington attend the conference. The committee changed the dates from **May 6-8** to **September 23-25**. Thank you for your feedback on the date change. As we understand tribal life and subsistence, we ultimately must choose a date and make the best of it. We hope you can manage to work this into your schedule and look forward to seeing you in the fall.

We will update the [TELS registration](#) website with new information in April or May of 2020.

Tribal Consultation

*A full list of consultation opportunities is available in
[EPA's Tribal Consultation Opportunities Tracking System](#)*

Guiding Principles for Consulting with ANCSA Corporations

END DATE: **April 14.**

In 2004, Congress directed all federal agencies to consult with corporations established by the **Alaska Native Claims Settlement Act** in 1971 “on the same basis as Indian tribes under Executive Order No. 13175.” EPA has a long history of engaging with ANCSA corporations on matters for which it consults with federally recognized tribes in Alaska and now seeks to formalize this process.

EPA is proposing to consult with ANCSA corporations on any regulatory action that has substantial direct effects on an ANCSA corporation and imposes significant compliance costs. EPA invites you and your designated consultation representative(s) to participate in this process. A *Guiding Principles for Consulting with Alaska Native Claims Settlement Act Corporations* document establishes principles relevant to consulting with ANCSA corporations. The Guiding Principles document, and the proposed consultation process is available on the EPA's [Tribal Consultation Opportunities Tracking System](#) website.

CONTACT: **Paige Lieberman** • 202-564-9957 • Lieberman.paige@epa.gov

Draft Plan for Federal Certification for Applicators of Restricted Use Pesticides

END DATE: **May 1.**

The *Draft EPA Plan for the Federal Certification of Applicators of Restricted Use Pesticides within Indian Country* (EPA Plan) is a plan for the certification of applicators of restricted use pesticides (RUPs) in Indian country based on the certification requirements enumerated at 40 CFR Part 171. The *EPA Plan* allows the use of RUPs in those areas of Indian country not covered by any other EPA-approved certification plan.

EPA administers routine maintenance activities associated with the implementation of this *EPA Plan*, including application processing, database management and recordkeeping, and conducting inspections and enforcement actions as appropriate.

Tribal Consultation: Draft Plan for Federal Certification of Applicators of Restricted Use Pesticides

During consultation, EPA will review the new standards and requirements for state, tribal, and federal agency certification programs for pesticide applicators when applying restricted use pesticides. To learn more, check out EPA’s [Federal Certification to Apply Restricted Use Pesticides in Indian Country](#) website.

A tribal consultation session will be offered by Skype and teleconference on **April 6** at 9:00 a.m. Pacific Time. To join by phone, call **1-866-299-3188** and enter code **202-566-0603**.

Grants

Community-Scale Air Toxics Ambient Monitoring

NOTICE OF INTENT TO APPLY DUE: **March 4.**

APPLICATIONS DUE: **March 30.**

Funds are available for projects designed to assist state, local, and tribal air agencies in identifying and characterizing air toxics, also known as hazardous air pollutants (HAPs), through work that falls into one of four categories. Those categories are community-scale monitoring; near-source monitoring; evaluating new and emerging testing methods for air toxics; and, analyzing existing air toxics data and developing or enhancing analytical, modeling, and/or implementation tools.

Air toxics, also known as hazardous air pollutants, are linked to cancer or other serious health effects. Under the Clean Air Act, EPA regulates 187 listed air toxic pollutants. While grant applications may address any air toxic pollutant, air toxics of particular interest to EPA include ethylene oxide, chloroprene, benzene, 1,3-butadiene, and metals such as hexavalent chromium, nickel, and arsenic.

The total estimated funding for this competitive opportunity is approximately \$5,000,000. The amount of federal funding requested by an applicant must not exceed \$750,000. EPA anticipates awarding approximately 10 to 20 assistance agreements from this announcement.

Details are available on EPA’s [Community-Scale Air Toxics Ambient Monitoring](#) website.

An air monitoring station near Harrah WA

Photo: John Livingston

Pollution Prevention Grant Program

APPLICATIONS DUE: **March 31.**

EPA is offering a grant competition to fund two-year assistance agreements for projects that provide technical assistance to develop and adopt source reduction practices — also known as pollution prevention or P2. P2 means reducing or eliminating pollutants from entering any waste stream or otherwise released into the environment prior to recycling, treatment, or disposal. EPA is encouraging P2 because implementing these practices can result in reductions in toxic pollutants, the use of water, energy, and other raw materials, while also lowering business costs.

States, state entities, federally recognized tribes, and intertribal consortia are eligible to apply. Individual grant awards may be in the range of \$40,000-\$500,000 for the two-year funding period. Additional details about this opportunity are available on EPA's [Grant Programs for Pollution Prevention](#) website.

Training & Technical Assistance

Rural Alaska Landfill Operator (RALO) Training

March 10-12, Anchorage, AK

April 7-9, Anchorage, AK

May 12-14, Anchorage, AK

The **Rural Alaska Landfill Operator** course is for the designated landfill operator and administrator in a village with a Class III landfill or open dump, and focuses on the duties of the landfill operator, their personal safety, and the safety of the village.

Emphasis is placed on the importance of the landfill operator's role to keep the village clean and the landfill free from harmful substances. Participants will learn about landfill regulations and requirements, household hazardous waste, waste separation and screening, waste reduction and segregation, recycling, personal protection equipment and much more.

These courses are hosted by The Alaska Forum, Inc. with trainers and expertise provided in cooperation with Solid Waste Administration of North America, Alaska Chapter. The Alaska Forum is providing a limited number of \$500 scholarships for qualified travel expenses for landfill operators employed in their village. Registration is available on the Alaska Forum, Inc. [Rural Alaska Landfill Operator Training](#) website.

EPA Residential Wood Smoke Workshop

March 10-12, New Orleans, LA

The Residential Wood Smoke Workshop will cover a wide range of topics, including regulatory, voluntary, and technical with a focus on sharing lessons learned. The workshop's target audience includes state, local, and tribal agencies; regional organizations, federal agencies, and non-profit organizations.

The workshop will be held in conjunction with the Hearth, Patio and Barbeque Association Trade Show/Expo. Workshop participants will have the opportunity to tour the trade show floor and see firsthand various hearth technologies operating - including wood, wood pellet, coal and gas stoves, a wood-fired central heating system, and meet with industry representatives.

The workshop is being coordinated and supported by EPA, the Western States Air Resources Council, the Northeast States for Coordinated Air Use Management, and the National Tribal Air Association. Registration information is available on the [2020 Residential Wood Smoke Workshop](#) website.

CONTACT: **Larry Brockman** • brockman.larry@epa.gov

Underground Storage Tank Boot Camp

The Institute for Tribal Environmental Professionals is partnering with Oneida Nation to offer Tribal UST Boot Camps. The workshops will provide in depth detail and hands on experience in assessing, inspecting, and evaluating all facets of Underground Storage Tank system installation and operation. Attendees will be able to go into a large mockup of a UST facility, where they will have access to everything both above and below-ground. In addition to classroom instruction and hands-on training, attendees will visit a tribal UST facility. UST Boot Camps are available on the following dates and locations.

April 7-9, Arlington, TX

Priority will be given to tribes in EPA Regions 4, 6, 7, 9 and 10, and limited to 20 students.

Register by **March 23** on ITEP's [UST Boot Camp Workshop website](#).

April 21-23, Oneida, WI

Priority will be given to tribes in EPA Regions 5 and 8. Register by **April 7** on ITEP's

[UST Boot Camp Workshop](#) website.

Implementing and Managing Tribal Recycling Programs

April 28-30, Mobile, AL

During this ITEP course you will hear from other tribal professionals who oversee successful recycling programs, visit the Poarch Band of Creek Indians' Recycling Facility, participate in a waste audit activity, and ask questions of several local recycling business representatives. This course will have a strong emphasis on understanding current recycling trends, management issues, and creating sustainable and efficient operations. In addition to lectures, panel discussions, and site visits, there will be small group activities and time to interact with your colleagues. For details, check out ITEP's [Waste and Response Training Schedule](#) website.

Qualified Sampler Training (Water Quality and Soil Sampling)

May 11-13, Anchorage, AK

This Zender Environmental Health and Research Group training will involve one classroom day, two field days at a local creek, and a hands-on instruction day. Attendees will learn how to take water and soil samples to send for laboratory contaminant testing, how to test on-site for surface water fecal coliform, and how to sample and monitor for the basic water quality parameters using a YSI probe and turbidity meter.

Passing this course satisfies the State of Alaska training requirements to become a qualified sampler. Trainees with approved QAPPs and appropriate sampling equipment can receive free follow-up assistance to help them complete the State’s requirement for supervised work in the field. If you attend and complete the training you can earn University of Alaska Fairbanks course credit for the ENVI 110 Introduction to Water Quality class. Details are available on the [Zender Environmental Health and Research Group](http://Zender Environmental Health and Research Group website) website.

EPA Diver Training

May 11-15, Pensacola, FL

EPA hosts [Diver Training](#) that’s catered to those needing to conduct scientific and light work diving. Every year EPA offers the class to federal, tribal, state, and local government divers with a work-related need at no-cost, to meet EPA’s and our partners program needs. Training includes SCUBA, tethered SCUBA, and surface supply introduction with rescue skills training.

EPA divers practice open water rescue techniques

Pop Quiz Answer from Page 1

A leaky faucet dripping at the rate of one drip per second can waste how many gallons per year?

- A. 10
- B. 500
- C. 3,000**
- D. 13,000

EPA encourages you to hunt down the drips in your home during **Fix a Leak Week, March 16-22**. EPA’s [Fix a Leak Week](#) website offers tips to identify and fix leaks.

To see all of the information on the poster ⇨
in full size, go to: <https://go.usa.gov/xdpBT>.

THE FACTS ON LEAKS

- 10** percent of homes have leaks that waste 90 gallons or more per day.
- 3,000 gallons** per year (per year) from a leaky faucet dripping at the rate of one drip per second can waste more than.
- 1** trillion gallons of wasted water each year and is equal to annual household water use in nearly.
- 11** million homes.
- 13,000** gallons of water savings for the average family.
- 10** percent on their water bills.
- 10 Drips** per minute wastes more than **500** gallons per year.
- Repair** leaks by checking faucet washers and gaskets for wear and replacing them if necessary.
- Homeowners** can save.
- Look for WaterSense** means EPA Certified.
