

2020 SmartWay Logistics Company Partner Tool: What's New in this Version?

Version 2.0.19 of the Logistics Company Partner Tool contains a number of updates and revisions to the prior version, 2.0.18. These updates have been implemented to enhance the usefulness and clarity of the Tool, and are summarized below:

-  USDOT numbers may now be eight digits (up from a maximum length of seven digits previously); the Composite Fleet Details screen, Truck Fleet Details screen, and Logistics Business Unit Details screen have been updated to accept up to eight digits for the USDOT number.
-  Users can now enter payloads as low as 0.001 tons on the Activity screen.
-  The Internal Metrics report has been undated to display five decimals for all pollutants.
-  Miscellaneous text and format updates for clarification.
