

Just Published! New EPA Resource about Renewable Natural Gas

The U.S. EPA Landfill Methane Outreach Program (LMOP) is pleased to inform our Partners and other interested stakeholders about a **new EPA resource from LMOP, AgSTAR and Natural Gas STAR** that provides information about **renewable natural gas (RNG)**.

[An Overview of Renewable Natural Gas from Biogas](#) provides key information about the creation of RNG from biogas including:

- main feedstocks/sources,
- options for delivering and using RNG,
- benefits of these projects,
- counts of operational and potential projects by feedstock type,
- processes and technologies used in upgrading biogas to RNG,
- policies and incentives for as well as barriers to RNG project development, and
- example projects.

EPA appreciates the information, photos, graphics and other key inputs that came together in preparing this resource.

Sincerely,

The LMOP Team

To request removal from this email list, please reply to this message. For further information or questions about LMOP, please do not reply to this email message, but rather visit the [LMOP website](#). Thank you.
