

The graphic features a green background with a white diagonal banner in the top left corner that reads "SAVE THE DATE". At the top center, there are three icons: the U.S. flag, the recycling symbol, and a calendar icon for November 15. Below these icons is the text "U.S. EPA" and "America Recycles". The main title is "EPA's 2020 America Recycles Events". Below the title, the dates for the two events are listed: "America Recycles: Innovation Fair - Monday, November 16" and "America Recycles: Summit - Tuesday, November 17". A note states "These events are free, online, and open to the public. Register at www.epa.gov/amicarecycles". On the left side, there is a logo for "50 EPA at Progress for a Stronger Future". At the bottom, the EPA logo is on the left and the website URL "www.epa.gov/amicarecycles" is on the right.

On **November 16**, the second-annual [America Recycles Innovation Fair](#) will showcase entrepreneurs from across the recycling system online via virtual exhibit halls demonstrating their state-of-the-art products, services, outreach, and technologies. The virtual Innovation Fair will feature more than 40 exhibitors that are advancing the recycling system through strategies such as: deploying artificial intelligence robots to enhance operations at recycling facilities; using hard-to-recycle plastics in 3D printing materials; installing small system sorting units in stadiums and small communities; creating new construction materials from hard-to-recycle plastics; and using automated technology and recycled glass bottles from restaurants to create new glassware.

On **November 17**, at the [America Recycles Summit](#), EPA will announce the first National Recycling Goals and discuss how public, non-governmental, private sector, and other organizations can work together to achieve the National Recycling Goals and to implement the draft National Recycling Strategy. The Summit will feature opportunities to participate in public and private sector discussions about the future of recycling. Summit topics include bolstering markets for recyclables, improving strategies for reducing contamination in recycling, and enhancing recycling strategies in tribes and territories.

For a complete list of the Innovation Fair exhibitors, visit: <https://www.epa.gov/amicarecycles/epas-2020-america-recycles-innovation-fair>

Both events are free and open to the public. If you plan to attend, please register at: <https://amicarecycles.vfairs.com/>
