Mr. Daniel R. Border
Plant Manager
Morton International, Inc.
45 Ribaud Avenue East
P.O. Box 342
Silver Springs, New York 14550-0342

Dear Mr. Border:

**LIMITING HOURS OF OPERATION
EMISSION POINT 00027**

This is in response to your application for modification of the existing Certificate to Operate emission point 00027 for the standby stationary combustion installation at your 45 Ribaud Avenue East location. The special conditions contained in this letter have gone through public review and are incorporated in and become a part of the certificate.

These special conditions limit the amount of hours of operation for this source only which are allowed in any consecutive 12-month period to 500 hours. They also require tracking and recording monthly hours of operation. By accepting these state and federally enforceable limits and the issuance of a State Implementation Plan (SIP) revision by the Environmental Protection Agency (EPA), the facility would not be subject to Reasonably Available Control Technology (RACT) requirements of Part 227-2 and would not be subject to major facility permitting with respect to NO_x under draft Part 201 as it is currently drafted.

SPECIAL CONDITIONS

"This facility shall limit hours of operation to 500 during any consecutive 12-month period. A rolling 12-month total shall be computed monthly.

All operational records and corresponding calculations shall be kept on site for a minimum of five years. This information shall be made available to the NYSDEC inspector upon request and any exceedance shall be promptly reported to the Department."

Mr. Daniel Border

Administration questions regarding this matter may be directed to the Division of Regulatory Services at 716/851-7165. Technical questions should be directed to the Division of Air Resources, attention Mr. Joseph Sciascia at 716/851-7130.

Respectfully,

Richard P. Burey/for

Steven Doleski
Regional Permit Administrator
