

## Speaking Opportunities for LMOP Partners

### Opportunity for LMOP Partners to Speak During Webinars

U.S. EPA LMOP is planning to host multiple webinars over the next year and **we welcome our Partners to participate as speakers**. We are especially interested in presentations about project case studies, best practices in landfill gas (LFG) energy recovery or landfill emissions mitigation, and organic waste management.

If you are interested in **speaking during an LMOP webinar**, please email the following information to [lmop@epa.gov](mailto:lmop@epa.gov) by **Friday, June 4, 2021**.

**Please include:** the presenter's name, organization and contact information; a title and abstract (250-word maximum) for the proposed topic; length of presentation time expected (e.g., 10, 15 or 20 minutes); and whether you would like to present a set of slides or participate in a panel discussion.

Example topics could include:

- *Innovative technologies or end uses of LFG.*
- *Co-location of anaerobic digestion at landfills.*
- *Effects of alternative organic waste management on methane emissions.*
- *Role of LFG in achieving corporate sustainability goals.*
- *Innovative partnership structures or financing strategies.*

We are open to joint presentations by 2 or 3 speakers who collaborated on a topic, e.g., a landfill owner and their LFG energy project developer or other project partner.

**Please note that we will not consider presentations focused on marketing products or services.**

You can view presentations from previous LMOP events on our website at [epa.gov/lmop/landfill-methane-outreach-program-webinars-and-events#proceedings](https://epa.gov/lmop/landfill-methane-outreach-program-webinars-and-events#proceedings).

*To request removal from this email list, please reply to this message. For further information or questions about LMOP, please do not reply to this email message, but rather visit the [LMOP website](https://epa.gov/lmop). Thank you.*
