

2011 Cleanup and Next Steps

Carol Campbell

Assistant Regional Administrator

Ecosystems Protection and Remediation

Outline

- Overview of Cleanup Technologies
- Residential and Commercial Properties Libby and Troy (OU4 & 7)
- Resources Available to You
- Next Steps

Overview of Cleanup Technologies

- Removal
- Capping
- Containment

Residential and Commercial Properties

- Goal of 150 cleanups in 2011

Residential and Commercial Properties

- **Continue with improvements made since 2007**
 - Remove visible vermiculite and detectible levels of asbestos
 - Sample yards more extensively to better capture areas of contamination
 - Use only topsoil from outside Libby valley

New 2011 Plan To Strengthen Cleanup

- Neighborhood approach
- Alleys
- Discrete non-contaminated areas
- Buffer zones
- Plants and small trees
- All fill material from outside Libby valley
- Topsoil quality

Residential and Commercial Properties

- **Activity Based Sampling**
 - Indoor Residential
 - Outdoor Residential
 - Recreational
 - Occupational

Next Steps – EPA’s Commitment

- We are committed to continuing the cleanup in Libby and Troy.
- Significant progress has been made in reducing exposure to LA.
- We need your input as we move forward.

We Want to Hear From You

- Parallel process of public involvement while the independent scientific review of toxicity values continues.
- We want to engage you in the next steps discussion.
 - How would you like to be involved?
 - What alternatives for clean up should be considered?
 - What practices or restrictions can you live with?
