Energy & Store Development Conference

**Table 3 Relative Refrigeration Requirements with Varying Store Ambient Conditions**

Refrigerator Model	70°F db					78°F db		
	Relative Humidity, %					Relative Humidity, %		
	30	40	55	60	70	50	55	65
Multideck dairy	0.90	0.95	1.00	1.08 <sup>a</sup>	1.18 <sup>b</sup>	0.99	1.08 <sup>a</sup>	1.18 <sup>b</sup>
Multideck low-temperature	0.90	0.95	1.00	1.08 <sup>a</sup>	1.18 <sup>b</sup>	0.99	1.08 <sup>a</sup>	1.18 <sup>b</sup>
Single-deck low-temperature	0.90	0.95	1.00	1.08 <sup>a</sup>	1.15	0.99	1.05	1.15
Single-deck red meat	0.90	0.95	1.00	1.08 <sup>a</sup>	1.15	0.99	1.05	1.15
Multideck red meat	0.90	0.95	1.00	1.08 <sup>a</sup>	1.18 <sup>b</sup>	0.99	1.08 <sup>a</sup>	1.18 <sup>b</sup>
Low-temperature reach-in	0.90	0.95	1.00	1.05 <sup>a</sup>	1.10	0.99	1.05 <sup>a</sup>	1.10

*Note:* Package warm-up may be more than indicated. Standard flood lamps are clear PAR 38 and R-40 types.

<sup>a</sup>More frequent defrosts required.

<sup>b</sup>More frequent defrosts required plus internal condensation (not recommended).
