

EPA Drupal WebCMS Rich Text Editor Quick Reference

December 2016

Add Definitions – Inserts a pop-up definition for a term from pre-defined libraries.

Add files and images - Opens a dialog to upload or choose files from the library.

Anchor - Inserts or edits an anchor link.

Archive - Inserts the Search EPA Archives link.

Block Quote – Inserts a blockquote.

Bold - Makes text bold.

Bulleted list - Inserts or removes an unordered (bulleted) list.

Copy - Copies the selected content.

Cut - Cuts the selected content.

Decrease Indent - Decreases the indent of the selected block element (e.g., paragraph, list item)

EPA email alerts - Inserts configurable widget for people to subscribe to email list services.

Exit EPA - Inserts an inline Exit EPA icon which links to EPA's External Link disclaimer. For use following links.

Exit EPA (multiple links) - Creates a box that says: "The following links exit the site" and contains an exit EPA icon that links to EPA's External Link disclaimer. For use before a group of links.

File information - Inserts file information code (use immediately after links to PDFs or other non-webpage files). You fill in the data about the file. Does not insert file type in link text - you must do that yourself.

Formatting styles - Opens a dropdown list to let you select a style. What choices you see depends

on where your cursor is in the editor window (e.g., a paragraph, a list, a table).

Free Viewers – Inserts a link to EPA's Free Viewers page.

Iframe - Opens a dialog to create or edit an iframe.

Indent - Indents the selected block element (e.g. paragraph, list item)

Insert abbreviation - Opens a dialog to create an abbreviation and its explanation, which appears when someone mouses over the abbreviation.

Insert EPA box - Opens a dialog to create a basic information box. (All other boxes are created in Panelizer.)

Insert Horizontal Line - Inserts an <hr /> tag.

Insert special characters - Selects special characters from a list, inserts them into page.

Italic - Makes text italicized.

Link - Opens a dialog to create or edit a hyperlink.

New! flag - Applies a 30-day auto-expiring New! image to the left of the selected text.

Numbered list - Inserts or removes an ordered (numbered) list.

Outdent - see Decrease Indent

Paragraph format - Opens a dropdown list to create paragraph or header type, or create a <div>.

Paste (default) - Opens a dialog to paste copied content with whatever formatting it already has.

Paste as plain text - Opens a dialog to paste copied content stripped of any formatting.

Paste from Word - Opens a dialog to paste content copied from Microsoft Word without its pernicious Word formatting.

PDF disclaimer box - Inserts a PDF disclaimer box on the page.

Redo – Repeats last edit (only available after you've used Undo).

Remove format - Clears all the formatting for the selected text.

Select All - Selects all the text within the Editor window.

Spell check - Opens a dialog that lets you configure Spell Checker As You Type (SCAYT).

Subscript - Creates subscript text.

Superscript - Creates superscript text.

Table - Opens a dialog that lets you configure a table that will be inserted into the page.

Top of Page - Inserts a Top of Page link.

Undo - Undoes last edit (only available after you've made some edit to the page).

Unlink - Removes the link from wherever the cursor is (you do not need to select the entire link text first). Link text remains.
