

How to Plan Projects Using the Uniform Federal Policy for Quality Assurance Project Plans (UFP QAPP)

Self-Directed Training Workshop

Use the materials on the DVD to present your own half-day workshop. The purpose of the workshop is to enable participants to conduct successful scoping meetings in support of the systematic planning process and to explore the roles and responsibilities of Remedial Project Managers and others involved in the hazardous waste cleanup process.

The materials on the DVD may be tailored to meet the training needs of your participants.

The workshop is designed for small groups (ideally 6 to 12 participants). Through the use of the Facilitator's Guide and video clips, the facilitator guides the participants to discover for themselves how to conduct a successful scoping meeting in support of the systematic planning process.

These training materials were developed by the Intergovernmental Data Quality Task Force (IDQTF).

DVD Contents:

- Facilitator's and Participant's Guides
- Presentation Slides
- Video Files
- Reference Documents, including:
 - UFP QAPP Manual
 - UFP QAPP Workbook
