

Stormwater Funding and Financing Approaches Webinar Series

EPA Programs for Stormwater Funding and Financing

June 8, 2021, 3:00 – 4:00 PM EDT

The first in a series of EPA webinars on stormwater infrastructure funding, this event will highlight opportunities for funding and financing stormwater infrastructure through existing EPA programs.

Presenters:

Arielle Gerstein

Water Infrastructure Finance and Innovation Act (WIFIA) Program

The WIFIA program accelerates investment in water infrastructure by providing long-term, low-cost supplemental loans for regionally and nationally significant projects, including stormwater infrastructure.

Joy Hinkle

Georgia Environmental Protection Department, Nonpoint Source Program

Georgia has funded green infrastructure projects across the state through EPA's Section 319 Nonpoint Source Management grants.

Michael Goralczyk

Clean Water State Revolving Fund (CWSRF) and Sewer Overflow and Stormwater Reuse Municipal Grants Program

EPA's CWSRF program is a source of low-interest funding for stormwater management projects. The new Municipal Grants Program will provide grant funding to states to allocate for projects that address infrastructure needs for combined sewer overflows, sanitary sewer overflows, and stormwater management.
