USEPA Encourages States to Adopt Biological Objectives

State of California Bioassessment

Regional Indices Developed

California Stream Condition Index

Today

Triennial Review Biological Objectives
Basin Plan Amendment

1) Numeric Biological Objective for streams using the California Stream Condition Index (CSCI ≥ 0.79)
   a) Applies to wadeable streams (perennial and seasonal)
   b) Does not apply to:
      non-wadeable streams
      ephemeral streams
      streams with hardened bottoms

2) Program of Implementation
Adopting a Biological Objective for Streams

- Protect High Quality Streams
- Guide Meaningful Restoration

Tribal consult request letter sent Jan 13, 2022

Approved by San Diego Regional Board in December 2020

Going to State Board for approval in March 2022

Coming to EPA in Summer 2022
What is Steam Electric Power Generating?

- Steam electric plants use fossil fuels (such as coal, oil and natural gas) or nuclear power to heat water in boilers, which generates steam. The steam is used to drive turbines connected to electric generators.

- The plants generate wastewater in the form of chemical pollutants and thermal pollution (heated water) from their water treatment, power cycle, ash handling and air pollution control systems, as well as from coal piles, yard and floor drainage, and other miscellaneous wastes.

- These are regulated by industry specific limits called Effluent Limitation Guidelines implemented via NPDES Wastewater Permits.
Background

• In 2015, EPA issued a final rule (the 2015 Rule) updating the 1982 effluent limitations guidelines and standards (ELGs) for steam electric power plants. This rule was subject to multiple legal challenges and two administrative petitions for reconsideration specifically for FGD and BATW.

• On August 31, 2020, the final reconsideration rule (the 2020 Rule) was signed effective October 2020, containing revised ELGs for the above two waste streams.

• On January 20, 2021 President Biden directed federal agencies to review several rules including this one.

• On July 26, 2021, EPA announced that the Agency intends to publish a proposed rule (Supplemental Rule) by Fall of 2022 that will:
  • Consider membrane filtration for FGD (flue gas desulfurization) wastewater.
  • Consider whether revisions to bottom ash transport water (BATW) are warranted.
Tribal Outreach

• Changes in ELGs could result in changes in surface water quality, changes in air quality, and changes in intake water quantity and or quality.

• Eight Tribal areas Nation-wide were identified as being within the area of public water systems potentially impacted by these proposed ELG changes.

• Seven of the eight Tribal areas were in ND, SD, and NE. Only one area in Region 9 with potential impact identified is the Navajo Nation with impacts to areas in AZ, NM, and UT. (APS Four Corners Power Plant or FCPP)
Bottom Ash Transport Water

**Bottom Ash Transport Water (BATW)** is the water used to transport ash from combusted coal away from the boilers.

**Current Requirements**

- The 2020 Rule requires zero discharge of pollutants from BATW, based on use of a high efficiency recycle system like being designed at FCPP.
  - There is an allowance for a site-specific purge of up to 10% of the volume of transport water system (as determined appropriate by the permit authority) based on the need of the facility.
  - New proposed ELGs may limit or eliminate this allowance.
Steam Electric ELG Tribal Consultation Webinars:

February 1, 2022
Tribal Webinar and Listening Session
Webinar time: 1:00-2:30 EST

February 9, 2022
Tribal Webinar and Listening Session
Webinar time: 1:00-2:30 EST

EPA Contact: Tony Tripp
Phone: (202) 566-1419
Email: tripp.anthony@epa.gov
ELG Comment Deadlines

• January 18, 2022 is initiation of Tribal Consultation.

• March 15, 2022 is deadline for Requesting Government-to-Government Consultation Meeting

• March 29, 2022 is close of Tribal Consultation.

• Tribes may submit written comments or request further information via e-mail to: benware.richard@epa.gov or (202) 566-1369

• Additional meetings or webinars may be scheduled and, if so, will be posted to the TCOTs website at https://tcots.epa.gov.
Pacific Ocean Aquafarms

Ongoing Engagement Opportunity
Project Background

• Net pet aquaculture facility proposed to be located off the coast of Southern California
  • Two proposed sites: Long Beach and San Diego

• Currently undergoing environmental review under the National Environmental Policy Act (NEPA)
  • More info: https://www.fisheries.noaa.gov/national/aquaculture/pacific-ocean-aquafarms-proposed-action-and-alternatives

• EPA’s role is to issue Clean Water Act NPDES permit. Currently in “pre-application” phase.
Engagement Opportunity

- We are asking for information from tribes to support NPDES permit development and Environmental Impact Statement (EIS) development (siting, potential NHPA overlap, etc.)
- Early coordination letter sent out to tribal leaders and THPOs in March 2021.
- EPA will offer government-to-government consultation after NPDES permit application is received.

Tribal Engagement Opportunities for National and Regional Water Actions 2022

**National Consultations**

**Revised Definition of "Waters of the United States":** EPA and Army will publish a proposed rule, "Revised Definition of "Waters of the U.S." This proposed rule will take public comment and then go through a public rulemaking process. EPA will publish a final rule in the Federal Register.

**Offer to Consult:** December 7th, 2021 - February 7th, 2022.

**Submit Comments:** To the docket, [here](https://www.regulations.gov).

**Request Agency Consultation:** Contact Rose Kwock at cwwotus@epa.gov before the end of comment period.

**Virtual Public Hearing:** January 12th (7-10am PT), register [here](https://www.regulations.gov); January 13th (11am-2pm PT) register [here](https://www.regulations.gov). Information on how to participate will be available on EPA's [website](https://www.epa.gov). There is also anticipated engagement via regional roundtable discussions.

**Region 9 Contact:** Sahnye Cohen, email sahnye.cohen@epa.gov

**Tribal CWA 319 Equity Engagement:** On September 27 Lynda Hall shared a memo, entitled **Near-term Actions to Support Environmental Justice in the Program.** In the memo EPA commits to take actions to ensure equitable and fair access to the benefits of cleaner water provided by the Section 319. Specifically, the memo strongly encourages action in FY22 by state NPS programs to begin incorporating approaches to enhance environmental equity funding programs. Additionally, the memo commits EPA’s national NPS program to several actions in FY22 in support of this goal, including seeking input from tribes, state agencies, and local grantees. Recognizing that this will be a shared learning experience, we are convening a series of equity-focused discussions to support ongoing dialogue with the NPS community as this work goes forward.

**Listening Sessions:** Kick-off Engagement Call with 319 Grantees 12/9, 11am-12pm PST, register [here](https://www.regulations.gov). Stay tuned for Regional 319 Equity Discussion Comments.

**Region 9 Contact:** Howard Kahan, email kahan.howard@epa.gov

**HQ Contact:** Steve Epstein, email steve.epstein@epa.gov

**Federal Baseline Water Quality Standards for Indian Reservations:** In September 2016, EPA published an advance notice of proposed rulemaking (ANPRM) on whether to establish federal baseline water quality standards for waters on Indian reservations that do not yet have standards under the Clean Water Act (CWA) and, if so, what these standards should be and how they should be implemented. During a 90-day public comment period, EPA received more than 300 comments from tribal governments and associations; state officials, agencies, and associations; private citizens; and private entities. EPA’s goal in initiating this rulemaking is to provide clarity on the existing gaps in CWA protection of reservation waters.

**Offer to Consult:** 06/15/2021 - 09/13/2021

**Submit Written Feedback:** to Mary Lou Souza, Email: souza.marylou@epa.gov

**Region 9 Contact:** Kate Pinkerton, Email: Pinkerton.kate@epa.gov or Terry Fleming, email: Fleming.Terrance@epa.gov

**Water Quality Standards Regulatory Revisions to Protect Tribal Reserved Rights:** Tribes hold many reserved rights to resources on lands and waters within their jurisdiction, through treaties and equivalent agreements with the U.S. government. The U.S. Constitution defines treaties as supreme law, which supersedes other federal, state, and local laws. The proposed rulemaking would require tribes to apply for water quality standards to protect their reserved rights. This would help ensure that EPA’s existing water quality standards do not interfere with tribes’ reserved rights.

**Offer to Consult:** 06/15/2021 - 09/13/2021
