The WIIN Act addresses, supports, and improves America’s drinking water infrastructure. The three grants were established to promote public and environmental health by providing investment in the nation’s small and disadvantaged communities, their public water systems, and schools and child care facilities to address lead exposure in drinking water, other contaminants, and compliance issues. In November 2021, the grant programs under WIIN were amended by the Infrastructure Investments and Jobs Act (IIJA), also known as the Bipartisan Infrastructure Law (BIL).

### Updates from BIL
- Since inception, over 24,000 schools and child care facilities have been tested for lead in drinking water using WIIN grant funding.

### Highlights
- Grants have been awarded to over 40 states, territories, and tribal communities using FY18, FY19, and FY21 funding.

### Who Receives Funding
- States, territories, and tribes
- Public water systems; tribes; nonprofit organizations; municipalities; and states, interstate, or intermunicipal agencies

### Timing
- Annually, eligible applicants can submit workplan application packages to grants.gov on a continuous basis for available grant funding. Applicants should be aware of Regional EPA deadlines to submit grant packages to be awarded funding in each fiscal cycle.

### Objective
- Reduce lead exposure in drinking water through lead service line replacement (LSLR) and treatment improvement projects for public water systems and remediation projects in schools and child care facilities.

### Funding Amount*
- **$26M (FY2021)**
  - Anticipated: $27.5M (FY22); Est. $36M (FY23)**
- **$20M (FY2023)**
  - Anticipated: $22M (FY22); Est. $180M (FY23)**
- **$26.5M (FY2023)**
  - Anticipated: $27.5M (FY22); Est. $36M (FY23)**

### Types of Grant
1. **Small, Underserved, and Disadvantaged Communities (SUDC)**
2. **Voluntary School and Child Care Lead Testing and Reduction**
3. **Improvements for the Nation (WIIN) Act Grants**

### WIIN Grant
- Reducing Lead in Drinking Water
- Voluntary School and Child Care Lead Testing and Reduction
- Improvements for the Nation (WIIN) Act Grants

### Funding
- **$20M (FY2023)**
  - Anticipated: $22M (FY22); Est. $180M (FY23)**
- **$26M (FY2021)**
  - Anticipated: $27.5M (FY22); Est. $36M (FY23)**
- **$26.5M (FY2023)**
  - Anticipated: $27.5M (FY22); Est. $36M (FY23)**

### Updates
- FY21 state allotments were announced for states, territories, and tribes on March 15, 2021. The FY22 funding allotments will be made available in early FY23.

### WIIN Grants
- Small, Underserved, and Disadvantaged Communities (SUDC)
- Voluntary School and Child Care Lead Testing and Reduction
- Improvements for the Nation (WIIN) Act Grants

### Estimated Funding*
- **Est. $36M (FY23)**
  - Anticipated: $38M (FY22); Est. $180M (FY23)**
- **Est. $80M (FY23)**
  - Anticipated: $82M (FY22); Est. $180M (FY23)**

*Please note BIL did not appropriate funding to the 3 original WIIN grants, it only amended eligibilities and requirements. The WIIN grants continue to receive annual appropriations.

**Estimates are not final and subject to change based on final appropriations.
