Alternative RACT proposal and petition for alternative compliance schedule.

The permittee shall operate Source ID 101 and 102 in accordance with the following work practice requirements:

- (1) Each source shall be inspected, operated and maintained as per manufacturers specification and good air pollution control practices.
- (2) All mixer covers remain closed, except when production, sampling, maintenance, or inspection procedures require access.
- (3) The permittee shall maintain a visual leak inspection and maintenance plan which shall include, at minimum, the following:
 - (a) An inspection schedule,
 - (b) Methods for documenting the date and results of each inspection and any repairs that were made, and
 - (c) The time frame between identifying a leak and making the repair, which shall adhere to the following:
 - (1) A first attempt at repairs, including tightening of packing glands, shall be made no later than five (5) working days after the leak is detected.
 - (2) Final repairs shall be made within fifteen (15) working days, unless the leaking equipment is to be replaced by a new purchase, in which case repairs shall be completed within three (3) months.
