

# 2022 SmartWay Rail Carrier Partner Tool:

## What's New in this Version?

**Version 2.0.21 of the Rail Tool contains updates and revisions to the prior version, 2.0.20. These updates have been implemented to enhance the usefulness, clarity and accuracy of the Tool, and are summarized below:**

-  Partners may designate their fleets as "internal use only" if that fleet is used exclusively as part of a composite fleet to be submitted by their company in the SmartWay Logistics tool. This designation allows only the "parent" multimodal carrier to see and select this rail fleet in the Online Logistics Tool.
-  Validation has been added to require an explanation of inputs if grams of CO<sub>2</sub> per gross ton-mile and per revenue ton-mile are out of range.
-  Miscellaneous text and format updates for clarification.
