As a service to our Partners and other stakeholders, EPA's Landfill Methane Outreach Program (LMOP) is sharing information about a request for proposals (RFP) from the City of Corpus Christi, Texas. Please note that EPA is not affiliated in any way with the review and selection process. Information provided below is based on the RFP.

Corpus Christi is seeking proposals from firms interested in and qualified to develop and implement a landfill gas (LFG) energy project at the Cefe Valenzuela Landfill. The selected proposer will be responsible for activities such as permitting, design, construction, financing, ownership and operations.

The landfill, which began operations in 2007, has more than 5 million tons of waste in place with a design capacity of about 67 million tons. An active gas collection and flare system is in place with an average flow rate of 1,050 standard cubic feet per minute in 2020. Potential proposers are welcome to visit the landfill prior to submitting a proposal.

- Non-mandatory (virtual) meeting: 10:00 AM [CT] on February 16, 2022
- Last day for requests for clarification: 5:00 PM [CT] on February 23, 2022
- Proposal deadline: 2:00 PM [CT] on March 9, 2022

Please refer to the RFP, available from Corpus Christi’s Supplier Portal, for complete details.

To request removal from this email list, please reply to this message. For further information or questions about LMOP, please do not reply to this email message, but rather visit the LMOP website. Thank you.
