2022 Diesel Emissions Reduction Act (DERA) State Grants Overview

May 2, 2022
Topics

1. Overview
2. Funding for 2022
3. Status of Currently Open 2020 or Earlier State Grants
4. Key Changes for 2022
5. Eligibility
6. Cost Shares
7. Next Steps
8. VW Mitigation Trust
9. Lessons Learned/Tips
10. Tools and Resources
Overview of DERA State Grants

• AKA: State Clean Diesel Grant Program
• Annual funding opportunity since 2008
  – Reauthorized in 2010 and again in December of 2020 through FY2024
• Allocates funds to eligible states and territories to establish programs that reduce harmful heavy-duty diesel emissions
• States/territories can use funding for grant or rebate programs
Funding for 2022

• Total of $92 million allocated to DERA in EPA’s FY 2022 budget
  – ~$27.6 million set aside for the State Program
    • 30% of $92 million total
  – 2/3 of $27.6 million is split between the states and territories as their base funding amount
    • If some states/territories do not participate, their base funds will be reallocated among the participating states based on population (2020 census)
  – 1/3 of $27.6 million is set aside for the matching incentive (bonus)
    • States/territories that provide a voluntary match that equals or exceeds the base amount qualify for a bonus amount from EPA equal to ½ the base amount
### Funding for 2022 (cont.)

*Estimated funding assuming all states and territories participate:*

Currently Open State Grants

• Most states participating in the 2019-2020 State Grants received extensions through 9/30/2022
  – These states can request 2022 State Grants and start work on those grants while wrapping up their 19-20 State Grants

• In general, any remaining DERA State Grants from 2020 or earlier must ensure that these grants are completed by September 30, 2022, in order for the state to receive 2022 funding

• Requests to extend 2020 and older state grants and also receive a 2022 award will be evaluated by the EPA Regional program office on a case-by-case basis
Key Changes for 2021-2022

1. 2022 DERA State Grants will be funded as supplemental amendments to existing 2021 DERA State Grants or, if a state does not have a 2021 State grant, as a new award.

2. No programmatic changes from 2021.
Key Changes for 2021-2022 (cont.)

Changes from 2021, still in effect:

1. No more engine model year (EMY) eligibility floor. Instead, there are new ownership, usage, and remaining life requirements.
2. To meet usage requirements, mileage/hours from multiple units can be summed if those units will be scrapped and replaced with a single unit.
3. Tier 3 engines now allowed for nonroad engine replacements with EPA approved best achievable technology analysis
4. Tier 4 nonroad engines/equipment can now be replaced with zero emission engines/equipment
Ownership, Usage, and Remaining Life

• The existing vehicle must be fully operational.
• The participating fleet owner must have owned and operated the vehicle during the 2 years prior to upgrade.
• The existing vehicle must have at least 3 years of remaining life at the time of upgrade. Remaining life is the fleet owner’s estimate of the number of years until the unit would have been retired from service if the unit were not being upgraded or scrapped because of the grant funding.
• Highway Usage: 7,000 miles/year during 2 years prior to upgrade.
  – School Buses may use mileage from calendar year (Jan-Dec) 2019.
• Nonroad, Locomotive, and Marine Usage:
  – Agricultural Pumps: 250 hours/year during 2 years prior to upgrade.
  – All Other Nonroad Engines: 500 hours/year during 2 years prior to upgrade.
  – Locomotive and Marine Usage: 1,000 hours/year during 2 years prior to upgrade.
Ownership, Usage, and Remaining Life (cont.)

- Documentation Requirements: Participating fleet owners must attest to the ownership, usage, and remaining life requirements in a signed eligibility statement. The documentation is not required at the time of application, but is required if the project is selected for funding. This documentation is to verify the eligible use of grant funds. A sample eligibility statement may be found at: www.epa.gov/dera/state
## Eligible Equipment

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>School Buses</td>
<td>Includes diesel powered school buses of Type A, B, C and D. To be eligible as a school bus a vehicle should meet the definition of a school bus as defined by the National Highway Transportation Safety Administration. This definition includes but is not limited to: 1) A bus that is used for purposes that included carrying students to and from school or related events on a regular basis; 2) Be identified with the words “School Bus”; and 3) Be painted National School Bus Glossy Yellow.</td>
</tr>
<tr>
<td>Transit Buses</td>
<td>Includes Class 5+ diesel powered medium-duty and heavy-duty transit buses.</td>
</tr>
<tr>
<td>Medium-duty or heavy-duty trucks</td>
<td>Includes diesel powered medium-duty and heavy-duty highway vehicles with gross vehicle weight rating (GVWR) as defined below:</td>
</tr>
<tr>
<td></td>
<td>Class 5 (16,001 - 19,500 lbs GVWR);</td>
</tr>
<tr>
<td></td>
<td>Class 6 (19,501 - 26,000 lbs GVWR);</td>
</tr>
<tr>
<td></td>
<td>Class 7 (26,001 - 33,000 lbs GVWR);</td>
</tr>
<tr>
<td></td>
<td>Class 8 (33,001 lbs GVWR and over)</td>
</tr>
<tr>
<td>Marine Engines</td>
<td>Includes diesel powered Category 1, 2, and 3 marine engines and vessels.</td>
</tr>
<tr>
<td>Locomotives</td>
<td>Includes diesel powered line-haul, passenger, and switch engines and locomotives.</td>
</tr>
<tr>
<td>Nonroad engines, equipment or vehicles</td>
<td>Includes diesel powered engines, equipment and vehicles used in construction, handling of cargo (including at ports and airports), agriculture, mining, or energy production (including stationary generators and pumps).</td>
</tr>
</tbody>
</table>
Eligible Projects

• Eligible clean diesel projects are outlined in the State Program Guide on our website: www.epa.gov/dera/state

• Common projects include:
  – Vehicle replacements
  – Engine replacements
  – Verified exhaust retrofits (e.g., DPFs)
  – Verified idle reduction technology (e.g., fuel operated heaters)

</table>
Next Steps – NOIP

• Notices of Intent to Participate (NOIP) are due Monday, May 9, 2022
  – NOIPs can be electronically signed

• EPA will use the NOIPs to determine participation and final allocations

• EPA will then notify participants of their final allocations by Thursday, May 12, 2022
Next Steps - Work Plan

- Work Plan and Budget Narrative and the Fleet Description spreadsheet are due to your EPA Regional contacts no later than Thursday, June 2, 2022 for their review.
  - Templates are posted on our website.
- Fleet Description: Provide a best estimate of equipment/technology to be impacted by 2022 State Grant Funds. Projects listed on this sheet at the time of application are not binding.
- EPA Regions will review and offer feedback.
Next Steps - Final Application Submission

• States/territories must submit their application on Grants.gov no later than Friday, June 17, 2022
  1. Standard Form (SF) 424, Application for Federal Assistance
  2. Standard Form (SF) 424A, Budget Information
  3. Key Contacts Form
  4. EPA Form 4700-4, Preaward Compliance Review
  5. Certification Regarding Lobbying (Grants.gov Lobbying Form)
  6. EPA-reviewed Project Narrative Work Plan and Budget Narrative
  7. EPA-reviewed Fleet Description spreadsheet
Next Steps – Award and Project Period

- EPA will finalize awards by September 30, 2022
- Project Period will begin by October 1, 2022
- Project Period will end September 30, 2023
VW Mitigation Trust - Overview

• 50 states, DC, Puerto Rico, and federally recognized tribes are eligible to become beneficiaries with ~$3 billion available
  – Each beneficiary will receive a specific allocation of funds that can be used for any of the listed eligible mitigation actions
  – The allocation structure is primarily based on the number of registered illegal Volkswagen vehicles within the boundaries of the beneficiary
  – Appendix D lists 9 eligible mitigation actions (EMAs) as well as a 10th EMA, the “DERA Option”
## VW Mitigation Trust – Eligible Mitigation Actions

### Eligible Mitigation Projects

1. Class 8 local freight trucks and port drayage trucks
2. School/shuttle/transit bus
3. Locomotive switchers
4. Ferries/tugboats
5. Ocean going vessel shorepower
6. Class 4-7 local trucks
7. Airport ground support equipment
8. Forklifts and cargo handling equipment at ports
9. Light duty ZEV supply equipment (up to 15% of allocation)

### DERA Option (#10)

- Option to use Trust Funds for actions eligible under DERA (may or may not be eligible under VW EMAs)
- Beneficiaries may use Trust Funds for their DERA non-federal voluntary match
- State and Tribal DERA grants only
VW Mitigation Trust – DERA Option

• Most of the eligible project types under the DERA Option allow Trust funds to pay for only a certain percentage of the project.
• In addition, DERA grants generally require a mandatory cost-share.
• Trust funds cannot be used to meet this non-federal mandatory cost-share requirement.
• Mandatory cost-share funds cannot count towards the state’s voluntary matching funds to qualify for the matching incentive (bonus).
Example A: Trust funds can be used to match the EPA base funding for State DERA grants

- State’s DERA allocation in 2022 is ~$200,000
- State uses $200,000 in Trust funds as the 1:1 voluntary non-Federal match
- State bonus is 50% of the base amount $100,000
- Total State grant is $500,000
  - State will receive $300,000 from DERA and $200,000 from the Trust

Example B: Trust funds can be greater than the 1:1 voluntary match above

- State’s DERA allocation in 2022 is ~$200,000
- State may use a larger amount - $1,000,000 in this example - in Trust funds
- State bonus DERA amount of $100,000
- State’s DERA Clean Diesel Grant program for 2022 would be $1.3 million
  - State will receive $300,000 from DERA and $1,000,000 from the Trust.
VW Mitigation Trust - Reporting

- A Beneficiary which chooses the DERA Option must submit DERA Quarterly Programmatic Reports and a Final DERA Programmatic Report to EPA as required under the DERA grant terms and conditions.

- A Beneficiary may submit its DERA reports to the Trustee to fulfill reporting obligations for the portion of its Trust funds using the DERA Option.
Lessons Learned/Tips

1. States/territories must publish their State Program awards within 60 days of granting funds
   • Online notice must include the total number and dollar amount of rebates, grants, or loans provided, as well as a breakdown of the technologies funded.

2. States/territories may fund local or state mandates
   • Cannot use funds for federal Supplemental Environmental Projects (SEPs)
   • Cannot use funds for federally mandated projects

3. Do not use other federal funds on your DERA State Grant projects
   • E.g., No mixing CMAQ and DERA
Lessons Learned/Tips - Waivers

• EPA will consider waiver requests from programmatic requirements on a case-by-case basis.
• Waivers will only be approved for non-statutory and non-regulatory requirements. Sufficient justification for the waiver must be provided by the state.
• States must obtain EPA approval for any waiver request before conducting any work or expending any funds on a project involving a waiver request. Any questions regarding waivers should be directed to the EPA Project Officer.
Lessons Learned/Tips - Administrative

• Keep your EPA PO in the loop
  – Inform them of potential issues early
  – Ask questions if you are unsure of program rules or requirements

• Actively track progress
  – Continually compare your progress to planned schedule/milestones in your work plan
  – Communicate with subgrantees and vendors often.
    • Grantees are ultimately responsible for the project.

• Document, Document, Document
  – Pictures are a great tool, and can also be used for press
Lessons Learned/Tips - Partnerships

If a DERA grant recipient intends to fund target fleets that they do not own and operate, they have the option to:

1. Make a subaward
   - Can fund a project partner’s direct and indirect costs such as personnel and travel

2. Provide participant support costs (e.g., rebate) to a project partner
   - If the DERA grant recipient is only funding a project partner’s equipment and installation costs, they may choose to provide participant support costs rather than a subaward to avoid the extensive subaward monitoring and management requirements
     - Rebates should be listed under the “Other” budget category
     - See Section XIII (Appendix A: How to Fund Projects and Partnerships) of the Program Guide for more details.
Lessons Learned/Tips - Administrative

• Drawing down grant funds
  – Only draw down funds for work that has been completed (invoiced, etc.)
  – Grantees may not draw down and ‘hold’ money in their account – must be used to pay invoice or pay employees, etc.
  – Generally, percentage of funds drawn down should correspond with percentage of work completed on the grant
    • EPA tracks this amount, and uses it to get general idea of project progress
  – In some cases, funds won’t be drawn until the end of the project (delivery of a replaced vehicle, etc.)
Lessons Learned/Tips - Technical Tips

• For on-highway vehicles, only Class 5 (16,001 lb GVWR) and above are eligible for DERA funding
  – School buses under Class 5 may also be funded (see pg. 6 of Program Guide)

• All projects must use EPA or CARB verified technologies or certified engine configurations
Lessons Learned/Tips - Scrappage

• Vehicles and engines that are replaced must be scrapped to ensure emission reductions
• Cut 3” hole in engine block to disable engine for vehicle and engine replacements
• Cut chassis rails in half to disable chassis for vehicle replacements
• Be sure to obtain evidence of appropriate disposal including photos of the following:
  – VIN tag
  – Side profile of equipment
  – Engine tag showing serial number, engine family number, and engine model year;
  – Before and after photos of destroyed engine;
  – Cut frame rails
Lessons Learned/Tips - Reporting

• Begin open and frequent communication with fleets, vendors, and any other participants
  o Don’t assume they know the program, or program requirements (verified technologies, etc.)

• Keep organized documents records – and please save them in a shared place
  o Competitive Procurement (cost and price analysis)
  o Scrappage – Photos and documentation
  o Invoices
Lessons Learned/Tips - Reporting

- Quarterly reports must be submitted to your PO
- Close out process:
  - All work must be completed and all costs incurred during the Project Period
  - Final report
  - Coordinate with PO regarding any other close out documentation
## Timeline
