

My name is (b)(6) Privacy and I am filing a civil rights complaint against The County of Kalamazoo and EGLE of Michigan. Both governments receive funding from the EPA. Both entities are violating the Civil Rights Act of 1964 because they are discriminating on the basis of race. The Northside of Kalamazoo is predominately african american and is located in a frontline community in Kalamazoo, Michigan. The EPA EJ score is 91%. The Kalamazoo County Brownfield and EGLE permitted to expand and gave millions of dollars to a polluter known to be out of compliance for toxic releases into the air and water. The releases are causing health problems to community members. Doctors and MDHHS are giving reports on high asthma hospitalizations in this neighborhood. Several lawsuits and other governments and media are investigating. EGLE had also given zero fines or enforcement against Graphic Packaging, the polluter. EGLE recently found Graphic Packaging operating without an air permit but did not shut them down. EGLE has a copy of a toxicology report saying there is a severe health risk to the public but still has not enforced the clean air act despite the company currently leaking high amounts of hydrogen sulfide from an open waste water clarifier that requires a cap. Hundreds of air complaints have been filed. I have many files of evidence to back up this complaint.

Thank you,

(b)(6) Privacy
