

# 2017 NATIONAL LAKES ASSESSMENT

## Nutrient Pollution

46%

Elevated  
Nitrogen

45%

Elevated  
Phosphorus

Nutrient pollution was the most widespread stressor measured

## Biological Condition

Biological condition based on  
macroinvertebrate communities

Poor 45 %    Good 34%    Fair 20%

Chlorophyll *a*, indicates the amount of algae and cyanobacteria present and was in excess in 45% of lakes

## Chemical Indicators

The herbicide atrazine was detected in 30% of lakes and exceeded the EPA "concentration level of concern" in 0.5% of lakes

Microcystins were detected in 21% of lakes and levels exceeded the EPA recreational criterion in 2% of lakes
