As a service to our Partners and other stakeholders, EPA's Landfill Methane Outreach Program (LMOP) is sharing information about **two upcoming webinars related to new EPA solid waste and recycling grant programs**. Please note that LMOP is not involved with planning or hosting these webinars.

You are invited to join **virtual conversations and feedback sessions** with EPA to discuss new Bipartisan Infrastructure Law funding for solid waste infrastructure and recycling education and outreach. The next two sessions are **May 24th** and **May 25th**; there are also sessions planned for June if you cannot attend in May. You can provide written feedback if not able to attend the webinars.

---

**New Recycling Education and Outreach Funding Opportunity**

**Tuesday, May 24th | 2:00 pm – 3:30 pm [ET]**

**Webinar Registration**

This session will cover an EPA funding program currently under development:

- **Education and Outreach Grants** – $75,000,000 ($15 million per year nationally), focused on improving material recycling, recovery, management and reduction. EPA was also directed to develop a model recycling program toolkit for states, Tribes and local governments.

EPA is seeking feedback on:

- **Education and Outreach Needs**: What are the challenges you and your community face when it comes to how to recycle? What are your most needed educational resources? What would enable you or your community to reach your recycling education and outreach goals?
- **Measurement**: What would be ideal measure(s) of recycling education and outreach program success, and what is needed to collect and use these data?
New Solid Waste Infrastructure and Recycling Funding Opportunity

Wednesday, May 25th | 2:00 pm – 3:30 pm [ET]

Webinar Registration

This session will cover an EPA funding program currently under development:

- **Solid Waste Infrastructure and Recycling Grants** – $275,000,000 ($55 million per year nationally), which supports improvements to local post-consumer materials management (including municipal recycling programs) and assists local waste management authorities in making improvements to local waste management systems.

EPA is seeking feedback on:

- **Infrastructure Needs and Priorities**: What are your greatest needs or challenges when it comes to recycling? What projects or activities should EPA consider eligible for funding as part of the recycling infrastructure grant program? What is the ideal amount of funding per grant that would enable you and/or your community to reach your recycling goals?
- **Measurement**: What would be ideal measure(s) of recycling program success, and what is needed to collect and use these data?

For additional information on these grants, all the new funding opportunities, and the Bipartisan Infrastructure Law, see:

- EPA webpage: **Solid Waste Infrastructure for Recycling Grant Program**
- White House document: **Building a Better America, A Guidebook to the Bipartisan Infrastructure Law for State, Local, Tribal, and Territorial Governments, and Other Partners** (see pages 446-449)
