REGULATION I.

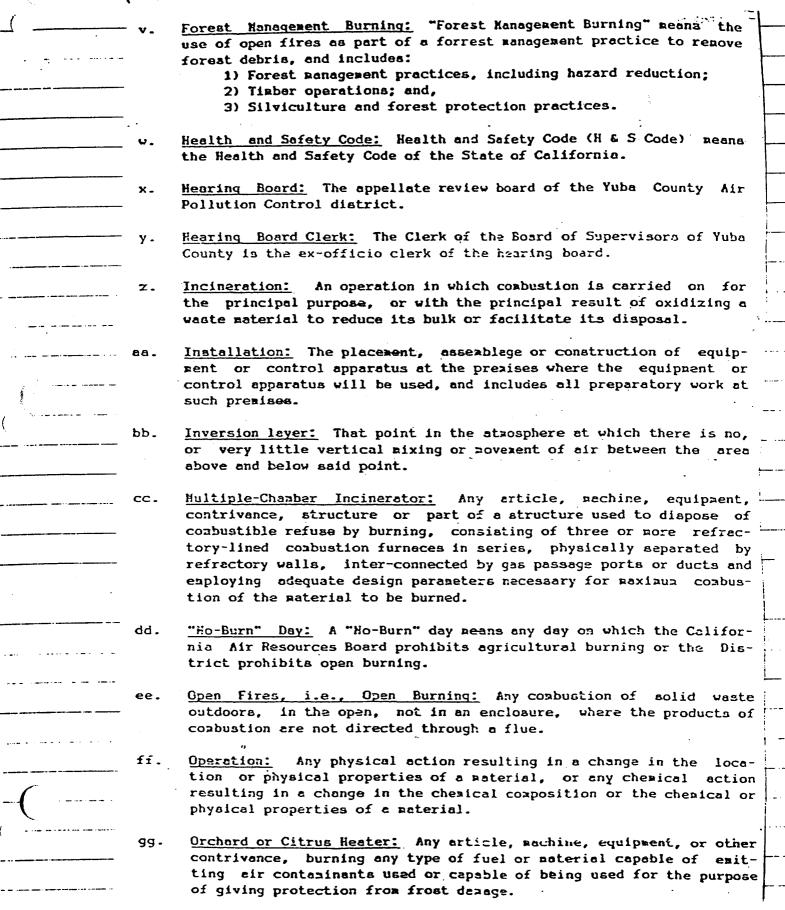

1915/79

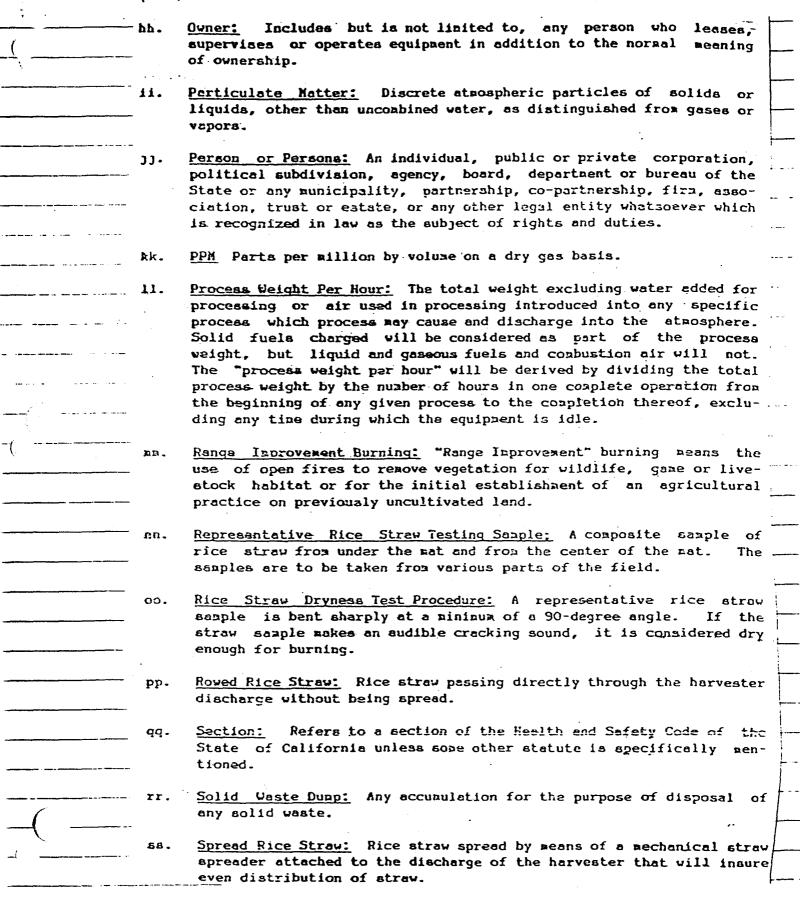

GENERAL PROVISIONS

Rule 1. TITLE: Rules and Regulations Governing Air Pollution Control in Yuba County.

- -Rule 1.1 <u>Definitions</u>: Unless the context requires otherwise, a definition set forth in this regulation shall govern the construction of these rules and regulations, unless and until rules and regulations are adopted by the District Air Pollution control Board which revises such definition.
 - a. Agricultural Burning: "Agricultural Burning" means open outdoor fires used in agricultural operations in the growing of crops; raising of fowls, enimals, or bees; forest management burning; range improvement burning; or the improvement of land for wildlife habitat, or disease or pest prevention.
 - b. Agricultural Wastes: "Agricultural Wastes" are defined as unwanted or unsaleable material produced wholly from agricultural operations which are directly related to growing of crops, fowls, animals or bees for the primary purpose of making a profit or a livelihood. This would also include grass and weeds in or adjacent to fields in cultivation or being prepared for cultivation, and materials not produced wholly from such operations but which are intimately related to the growing or harvesting of crops, and which are used in the field. Example: empty fertilizer and pesticide sacks, bags or cartons.
 - c. Agricultural Operations: The growing and harvesting of crops, including timber, or the raising of fowls, animals or bees, for the primary purpose of earning a living, or making a profit.
 - d. <u>Air Pollution Control Office:</u> The air pollution control officer of the Yuba County Air Pollution Control District, and his duly authorized representatives.
 - e. <u>Air Contaminant:</u> Includes smoke, dust, charred paper, soot, grime, carbon, ecide, fumes, games, odors, or particulate matter, or any combination thereof.
 - f. Approved Ignition Devices: "Approved Ignition Devices" includes those instruments or materials that will ignite open fires for agricultural burning without the production of black smoke by the ignition device.
 - g. Alteration or Hodification: Any addition to, enlargement of, replacement of, or any major modification or change of the design, capacity, process, or arrangement, or any increase in the connected loading of equipment or control apparatus, which will significantly increase or affect the kind or amount of air contaminants emitted.

·	_ 1~((
	- tt.	Source: A source is a point or source of emissions in a plant where an individual operation of one source would not affect the rest of the operation.	
	uu	Source Operation: Means the last operation preceding the emission of an air contaminant which operation: 1) Results in the separation of the air contaminant from the	
	-	process material, or in the conversion of the process ma- terial into air contaminants as in the case of combustion of fuel, and, 2) Is not an air pollution abatement operation.	
	vv.	Standard Conditions: As used in these Regulations, refers to a gas temperature of sixty (60) degrees Fahrenheit and a gas pressure of fourteen and seven-tenths (14.7) pounds per square inch absolute.	
		Standard Dry Cubic Foot of Gas: The exount of gas that would occupy a volume of one(1) cubic foot, if free of water vapor at standard conditions.	
	····

Rule 1.2 VALIDITY. If any regulation, rule, subdivision, mentence, clause or phrase of these Rules and Regulations, if for any reason, is found to be unconstitutional or invalid, such decision shall not affect the validity of the remaining portions of these Rules and Regulations. The Air Pollution Control Bearchereby declares that it would have adopted these Rules and Regulations and every regulation, rule, subdivision, sentence, clause, and phrase thereof irrespective of the fact that any one or more regulations, rules, subdivision sentences, clauses, or phrases be declared unconstitutional or invalid.

03/30/8/

Rule 1-3 EFFECTIVE DATE: These Rules and Regulations shall take effect on July 24, 1980. and supercede all previous Rules and Regulations governing air pollution control in Tuba County.

7/25/73 Vuba Co

REGULATION II. PROHIBITIONS

- 2. VISIBLE EMISSIONS. A person shall not discharge into the atmosphere from any single source of emission whatsoever, any air contaminant for a period or periods aggregating more than three minutes in any one hour which is:
 - a) As dark or darker in shade as that designated as No. 2 on the Ringlemann Chart, as published by the United States Bureau of Mines, or
 - b) of such opacity as to obscure an observer's view to a degree equal to or greater than does smoke described in subsection a) above.

Rule 2.1 EXCEPTIONS TO RULE 2. The provisions of Rule 2 do not apply to:

- a) Smoke from fires set by or permitted by any public officer if such fire is set or permission given in the performance of the official duty of such officer, and such fire in the opinion of such officer is necessary:
 - 1) For the purpose of the prevention of a fire or health hazard which cannot be abated by any other means, or
 - 2) For the instruction of public employees in the methods of fighting fires.
- b) Set pursuant to permit on property used for industrial purposes for the purpose of instruction of employees in methods of fighting fire.
- c) Agricultural operations in the growing of crops, or raising of fowls, animals, or bees.
- d) The use of an orchard or citrus grove heater which does not produce unconsumed solid carbonaceous matter at a rate in excess of one (1) gram per minute.
- e) The use of other equipment in agricultural operations in growing of crops, or paising of fowls or animals.
- f) Smoke from fires set pursuant to an Open Durning Permit issued by the Air Pollution Control Officer
- g) Smoke from fires set for the improvement of watershed, range or pasture.
- h) As provided in the Health and Safety Code (Sec. 39297.2), nothing in these Rules and Regulations shall be construed to prohibit burning for the disposal of combustible or flammable solid waste of a single or two family dwelling on its premises.

- i) As provided in Health and Safety Code (Sec. 39297.3), nothing in these Rules and Regulations shall be construed to prohibit burning for right-of-way clearing by a public entity or utility or for levee and ditch maintenance.
- Rule 2.2 EMISSION CONTROL FOR USED MOTOR VEHICLES. Each 1955 through 1962 model year used car in the District shall be required to be equipped with an approved crankcase emission control device at the time of transfer of owner-ship.
- Rule 2.3 The Air Pollution Control Officer is empowered to issue permits for open burning.
- Rule 2.4 OPEN FIRES. No person shall, after December 31, 1971, use open fires for the purpose of disposal of petroleum wastes, demolition debris, tires, tar, trees, wood waste, or other combustible or flammable solid or liquid waste; or for metal salvage or burning of automobile bodies.
- Rule 2.5 EXCEPTIONS TO RULE 2.4. Nothing in these Rules and Regulations shall be construed as Impiting the authority granted under other provisions of law:
 - a) To any public officer to set or permit a fire when such fire is, in his opinion, necessary for any of the following purposes:
 - 1) for the purpose of the prevention of a fire hazard which cannot be abated by any other means, or
 - 2) the instruction of public employees in the methods of fighting fire, or
 - 3) set pursuant to permit on property used for industrial purposes for the purpose of instruction of employees in the methods of fighting fires, or
 - 4) set pursuant to a limited time extension granted by the State Air Resources Board to the County of Yuba for the use of open fires for the purpose of solid waste disposal at a County-operated dumpsite.
 - b) To set or cause to be set, backfires necessary to save life or valuable property pursuant to Section 4426 of the Public Resources Code.
 - c) To abate fires pursuant to Chapter 2 (commencing with Sec. 13025) of Part 1 of Division 12 of the California Health and Safety Code.
 - d) AS PROVIDED IN SEC. 39297.2 OF THE HEALTH AND SAFETY CODE, nothing in these Rules and Regulations shall be construed as prohibiting burning for the disposal of combustible or flammable solid waste of a single or two-family dwelling on its premises.
 - e) AS PROVIDED IN SEC. 39297.3 OF THE HEALTH AND SAFETY CODE, nothing in these Rules and Regulations shall be construed to prohibit burning for right-of-way clearing by a public entity or utility or for levee and ditch maintenance.

RULES AND REGULATIONS GOVERNING AIR POLLUTION CONTROL IN YUBA COUNTY

(Amendment - June 14, 1983, underlined below.)

Rule 3.9 - STORAGE OF PETROLEUM PRODUCTS:

For petroleum storage tanks with a storage capacity of 15,000 liters (39,630 gallons) of a petroleum product with a true vapor pressure of 1.5 or greater, such tanks shall to a pressure tank or shall be equipped with either a vapor recovery system or a floating roof as described in this Rule. Underground storage and dispensing tanks of JP-4 Jet fuel with an annual throughput volume of less than 20,000,000 gallons of JP-4 Jet fuel are exempt from the requirements of this Rule. Tanks subject to this Section shall be in compliance by September 30, 1982.

The following definitions shall apply to storage of petroleum products:

- a. A "pressure tank" is a tank which maintains working pressure sufficient at all times to prevent hydrocarbon vapor or gas loss to the atmosphere.
- b. A "vapor recovery system" consists of a vapor gathering system capable of collecting the hydrocarbon vapors and gases discharged and a vapor disposal system capable of processing such hydrocarbon vapors and gases so as to prevent their emission to the atmosphere, with all tank gauging and sampling devices gas-tight except when gauging or sampling is taking place.
- c. A "floating roof" consists of a pontoon-type or double-deck type roof resting on the surface of the liquid contents and equipped with closure seals to close the space between the roof edge and tank wall. The control equipment provided for in the Rule shall not be used if the gasoline or petroleum distillate has a vapor pressure of 11.0 pounds per square inch absolute or greater under actual storage conditions. All tank gauging and sampling devices shall be gas-tight except when gauging or sampling is taking place.

LDF/mbw 6/29/83

3/30/81 Viba

٠

capacity of logous liters (39,630 gallons) of a petroleum product into true vapor pressure of 1.5 or greater, such tanks chall be a pressure to k or chall be equipped with either a vapor recovery system or a floating of an describe in this Rule. Tanks subject to this fection shall be in compliance by September 30, 1982.

The following offinitions shall apply to storage of Petroleum products;

a. A "pressure tank" is a tank which maintains working pressure rufficient at all times to prevent hydrocarbon apor or gos loss to the atmosphere.

b. A "vapor recovery system consists of a vapor gathering system capable of collecting the hydrocarbon bors and gases discharged and a vapor disposal system capable of processing such hydrocarbon vapors and gases to as to prevent their emission to the atmosphere, with all tank gauging and campling derices gastifit except when gauging or sampling is terminable.

c. A "floating roof" consists of a pentoon-type or double-deck type roof resting on the surface of the liquid contents and equipped with closure scale to close the space between the roof edge and bear wall. The control equipment provided for in the Rule shall not be used it the gasuline or petroleum distillate has a vapor pressure of 11.0 pounds pet square inch absolute or greater under actual storage conditions. All tank a using and sampling devices shall be gas-tight except when gauging or sampling devices shall be gas-tight except when gauging or sampling series.

Rule 3.12 Oreanic Sovenis:

a. A person shall not discharge into the atmosphere more than 15 pounds of organic materials in any one day nor more than 3 pounds in any one hour, from any article, machine, equipment or other contrivance, in unich any organic solvent or any material containing organic solvent comes into contact with flame or is baked, heat-cured or heat-polymenical, in the presence of oxygen, unless said discharge had been reduced by the least 85 per cent. Those pertions of any series of articles, machines, equipment or other contrivances designed for processing a certification web, string or wire which emit organic materials and using operations described in the Section shall be collectively subject to compliance, with this Section.
b. A person shall not discharge into the atmosphere mere than AD complete of

• A person shall not discharge into the atmosphere mere than AD caucha of organic materials in any one day, nor more than B pounds in any one hour from any article, machine, equipment or other contrivance used under conditions other than described in Section 'a' of this Fule, for employing,

III-6

or applying, any photochemically reactive solvent, as defined in Section 'l' of this Rule, or material containing such photochemically reactive solvent unless said discharge has been reduced by at least 85 per cent. Emissions of organic materials into the atmosphere resulting from air or heated drying of products for the first 12 hours after their removal from any article, machine, equipment, or other contrivance described in this Section shall be included in determining compliance with this Section. Emissions resulting from baking, heat-curing, or heat-polymerizing as described in Section 'a' of this Rule shall be excluded from determination of compliance with this Section. Those portions of any series of articles, machines, equipment or other contrivances designed for processing a continuous web, strip or wire which emit organic materials and using operations described in this Section shall be collectively subject to compliance with this Section.

c. A person shall not discharge into the atmosphere more than 3,000 pounds of organic materials in any one day, nor more than 450 pounds in any one hour from any article, machine, equipment or other contrivance in which any non-photochemically reactive organic solvent or any material containing such solvent is employed or applied, unless said discharge has been reduced by at least 85 per cent. Emissions of organic materials into the atmosphere resulting from air or heated drying of products for the first 12 hours after their removal of any article, machine, equipment; or other contrivance described in this Section shall be included in determing compliance with this Section. Emissions resulting from baking, or heat-polymerizing as described in Section 'a' of this Rule, shall be excluded from determination of compliance with this Section. Those portions of any series of articles, machines, equipment, or other contrivances designed for processing-a continuous web, strip or wire which emit organic materials and use operations described in this Section shall be collectively subject to compliance with this Section.

d. A person shall not sell or offer for sale for use in containers of one quart capacity or larger, any architectural coating containing photochemically reactive solvent, as defined in Section '1' of this Rule.

e. A person shall not employ, apply, evaporate or dry any architectural coating purchased in containers of one quart capacity or larger, containing photochemically reactive solvent, as defined in Section '1' of this Rule.

f. A person shall not thin or dilute any architectural coating with a photochemically reactive solvent, as defined in Section 'l' of this Rule.

For the purpose of this Rule, an architectural coating is defined as a coating used for residential or commercial buildings and their appurtenances or industrial buildings.

h. A person shall not, during any one day dispose of a total of more than 1½ gallons of ary photochemically reactive solvent, as defined in Section 'l' of this Rule, or of any material containing more than 1½ gallons of any such photochemically reactive solvent by any means which will permit the evaporation of such solvent into the atmosphere.

i. Emissions of organic materials into the atmosphere from the clean-up with photochemically reactive solvent, as defined in Section 'l' of this Rule of any article, machine, equipment or other contrivances described in Sections 'a', 'b' or 'c', of this Rule, shall be included with the other emissions of organic materials from that article, machine, equipment or other contrivances for determining compliance with this Rule.

j. Emissions of organic materials into the atmosphere required to be controlled by Section 'a'. 'b' or 'c', of this Rule, shall be reduced by:

 Incineration, provided that 90 per cent or more of the carbon in the organic material being incinerated is oxidized to carbon dioxide; or,

2) Adsorption; or,

Processing in a manner determined to be not less effective than 'l', or '2', above.

k. For the purposes of this Rule, organic solvents include dilutents and thinners and are defined as organic materials which are liquid at standard conditions and which are used as dissolvers, viscosity reducers or cleaning agents, except that such materials which exhibit a boiling point higher than 220 degrees Fahrenheit at 0.5 millimeter mercury absolute pressure or having an equivalent vapor pressure shall not be considered to be solvents unless exposed to temperatures exceeding 220 degrees Fahrenheit.
 for the purpose of this Rule, a photochemically reactive solvent is any

For the purpose of this Rule, a photochemically reactive solvent is any solvent with an aggregate of more than 20 per cent of its total volume composed of the chemical compounds classified below or which exceeds any of the following individual percentage composition limitations, referred to the total volume of solvent:

 A combination of hydrocarbons, alcohols, aldehydes, esters, ethers or ketones having a olefinic or cycle-olefinic type of unsaturation;

5 per cent;

 A combination of aromatic compounds with eight or more carbon atoms to the moecule except ethylbenzene: 8 per cent;

 A combination of ethylbenzene, ketones having branched hydrocarbon structures, trichloroethylene or toluene: 20 per cent.

Whenever any organic solvent or any constituent of an organic solvent may be classified from its chemical structure into more than one of the above groups of organic compounds, it shall be considered as a member of the most reactive chemical group, that is that group having the least allowable per cent of the total volume of solvents.

For the purpose of this Rule, organic materials are defined as chemical compounds of carbon excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides, metallic carbonates and ammonium carbonate.

n. A person incinerating, adsorbing, or otherwise processing organic materials pursuant to this Rule shall provide, properly install and maintain in calibration, in good working order and in operation, devices as specified in an Authorization to Construct or a Permit to Operate, or as specified by an Air Pollution Control Officer for indicating temperatures, pressures, rates of flow or other operating conditions necessary to determine the degree and effectiveness of air pollution control.

o. Any person using organic solvents or any materials containing organic solvents shall supply written evidence of the chemical composition, physical properties and amount consumed for each organic solvent used.

p. The provisions of this Rule shall not apply to:

 The manufacture of organic solvents or the transport or storage of organic solvents or materials containing organic solvents;

 The spraying or other employment of insecticides, pesticides or herbicides;

 The employment, application, evaporation or drying of saturated halogenated hydrocarbons or perchloroethylene;

3-III

- 4) The use of any material in any article, machine, equipment or other contrivance described in Section 'a', 'b', 'c', or 'i', of this Rule, if:
 - The volatile content of such material consists only of water and organic solvents; and,
 - b) The organic solvents comprise not more than 20 per cent by volume of said volatile content; and,
 - The volatile content is not photochemically reactive as defined in Section 'l' of this Eule; and,
 - d) The organic solvent or any material containing organic solvent does not come into contact with flame.
- 5) The use of any material in any article, machine, equipment or other contrivance described in Sections 'a', 'b', 'c', or 'i', of this Rule,
 - The organic solvent content of such material does not exceed 20 per cent by volume of said material; and,
 - The volatile content is not photochemically reactive as defined in Section 'l' of this Rule; and,
 - c) The organic solvent or any material containing organic solvent does not come into contact with flame.
- 6) The use of equipment for which other requirements are specified by or which are exempt from air pollution control requirements by said Prohibitions.
- 7) In addition to other restrictions contained in these regulations:
 - a) A person shall not use, in any dry-cleaning operation, organic solvents containing 4 per cent or more by volume of any photochemically reactive organic material as defined in Section 'l', of this Rule, unless the emissions of the discharged organics are reduced by 90 per cent or more by use of any of the methods described in Section 'i', of this Rule.
- described in Section 'j', of this Rule.

 b) A person shall not discharge into the atmosphere any organic materials from surface degreesing operations unless they are either reduced by at least 85 per cent, or unless such materials are not photochemically reactive as defined in Section 'l', of this Rule.
 - c) A person shall not manufacture nor use any photochemically reactive solvent as defined in Section '1' of this Rule for the purpose of thinning or diluting any metal surface coating.

Rule 3.14 Solvent Degressing: After January 1, 1980, any containers of solvent which exceed 5) gallons capacity shall contain instructions to store in a closed condition.

111-9

3/30/81 Keba

REGULATION IV

STATIONARY EMISSION SOURCES

PERMIT SYSTEM AND REGISTRATION

Rule 4.0 General Requirements:

a. No person shall cause or permit the construction or modification of any source without first obtaining, as required by regulations, an authority to construct or modify from the Air Pollution Control Officer so as to comply with applicable rules and regulations and ambient air quality standards.

b. The air pollution officer shall not approve such construction or modification runless the applicant demonstrates, to the satisfaction of the air pollution control officer, that the new or modified source can be expected to comply with all applicable regulations and will not prevent the attainment or maintenance of air quality standards.

Rule 4.1 Permits Required:

- Anthorization to Construct: Any person building, erecting, altering or replacing any article, machine, equipment or other contrivance, the use of which may cause the issuance of air contaminants or the use of which may eliminate or reduce or control the issuance of air contaminants, shall first obtain written authorization for such construction from the Air Pollution Control Officer. An Authorization to Contstruct shall remain in effect until the Permit to Operate the equipment for which the application was filed is granted or denied or the application is cancelled.
- b. Permit to Operate: Before any article, machine, equipment or other contrivance, for which an Authorization to Contruct has been issued, may be operated or used, a Permit to Operate shall first be obtained from the air pollution control officer for any article, machine, equipment or contrivance described in Section 'a' of this Rule until the information required pursuant to the Rules and Regulations is presented to the air pollution control officer and such article, machine, equipment or contrivance is altered, if necessary and made to conform to the standards set forth in these Rules and Regulations.
- Rule 4.2 Existing Erission Sources: It is required that all owners or operators of existing equipment, machinery, contrivance or places of business that send -emissions into the atmosphere, be registered with the air pollution control officer. Such registration shall be on a form provided by the air pollution control district.
- Rule 4.3 Exemptions from Permit and Registration: (New and existing operations). An Authorization to Construct or Permit to Operate registration shall not be required for:
 - a. Venicles as defined by the Vehicle Code of the State of California, but not including any article, machine, equipment or other contrivance mounted on such vehicle that would otherwise require a permit under the provisions of these Rules and Regulations.
 - b. Vehicles used to transport passengers or freight.

Equipment utilized exclusively in connection with any structure, which structure is designed for and used exclusively as a dwelling for not more than two (2) families.

The following equipment:

1) Comfort air conditioning or comfort ventilating systems which are not designed to remove air contaminants generated by or released from specific units or equipment;

Refrigeration units except those used as, or in conjunction with air pollution control equipment;

3) Water-cooling towers and water-cooling ponds not used for evaporativecooling or process water, or not used for evaporative cooling of water from barometric jets or from barometric condensers.

Equipment used exclusively for steam cleaning;

5) Presses used exclusively for extrucing metals, minerals, processes6) Residential incinerators when used for burning of paper or leaves. Presses used exclusively for extruding metals, minerals, plastics or wood;

Space heaters.

- ſ. Equipment used in eating establishments for the purpose of preparing food for human consumption.
- Self-propelled mobile construction equipment other than pavement burners. Other sources of minor significance specified by the Air Pollution Control Officer.
- Agricultural implements used in agricultural operations.

Standards for Granting Applications: Rule 4.4

Before Authorization to Construct or Permit to Operate is granted, the Air Pollution Control Officer may require the applicant to provide and maintain such facilities as are necessary for sampling and testing purposes in order to secure information that will disclose the nature, extent, quantity or degree of air contaminants discharged into the atmosphere from the article, machine equipment or other contrivance described in the Authorization to Construct or Permit to Operate. In the event of such a requirement, the Air Pollution Control Officer shall notify the applicant in writing of the required size, number, and location of sampling holes; the size and location of the sampling platform; the access to the sampling platform; and the utilities for operating the sampling and testing equipment. The platform and access shall be constructed in accordance with the General Industry Safety Orders of the State of California.

In acting upon an application for a Permit to Operate, the air pollution control officer finds that the article, machine, equipment or other contrivance has not been constructed in accordance with the Authorization to Construct, he shall deny the Permit to Operate. The air pollution control officer shall not accept any further application for Permit to Operate the article, machine, equipment or other contrivance so constructed until he finds that the article, machine, equipment or other contrivance is in

accordance with the Authorization to Construct.

The fact that an Authorization to Construct or modify or a Permit to Operate an article, machine, equipment or other contrivance described therein shall have been issued by the Air Pollution Control Officer shall not be an endorsement of such article, machine, or other contrivance, nor shall it be deemed or construed to be a warranty, guarantee or representation on the part of the Air Pollution Control Officer that emission standards may not be exceeded by such article, machine, equipment or other contrivance. In every instance, the person, firm, or corporation to whom such authorization or permit is issued shall be and remain responsible under these regulations for each and every instance wherein emission standards are exceeded by the article machine, equipment or other contrivance described in the permit, and the fact of issuance or authorization shall not be a defense to or mitigation of any charge of violation.

IV-2

Rule 4.5 Conditional Approval: The Air Pollution Officer may issue an Authorization to Construct or a Permit to Operate, subject to conditions which will bring the operation of any article, machine, equipment or other contrivence within the permit standards of these regulations, in which case the conditions shall be specified in writing. Commencing work under such an Authorization to Construct, or operation under such a Permit to Operate, shall be deemed acceptance of all the conditions so specified. The Air Pollution Control Officer shall issue an authority to construct or a permit to operate with revised conditions upon receipt of a new application, if the applicant demonstrates that the facility, article, machine, equipment, or other contrivance can operate within the permit standards under the revised conditions.

4.6 Standards for Authority to Construct and Permit to Operate:

plicability and Exemptions:

Section a. through j. of this rule shall apply to new stationary sources
or modifications which result in either:

A net increase in emissions from any stationary source of 250 pounds or more excluding seasonal sources, during any day of any pollutant for which there is a national ambient air quality standard (excluding carbon monoxide), or any precursor to such a pollutant.

b) A net increase in emissions from seasonal sources of 50 tons per year (or 1,000 pounds per day) for particulate matter.

c) A net increase in emissions of 1,000 or more pounds during any day of carbon monoxide

2) New sources and modifications as defined in a.l) shall be exempt from the requirements for offsets (Section e), Although Eest Available Control Technology (BACT) for those pollutants defined in a.l) is still required providing the source:

a) Which uses innovative control equipment or processes which will likely result in a significantly lower emission rate from the stationary source than would have occurred with the use of previously recognized best available centrol technology, and which can be expected to serve as a model for technology to be applicated similar stationary sources within the state resulting in a substantial air quality benefit, provided the applicant establishes by modeling that the new stationary source or modification will not cause the violation of any national ambient air quality standard at the point of maximum ground level impact. This exemption shall apply only to pollutants which are controlled by the innovative control equipment or processes. The Air Pollution Control Officer shall obtain concurrence from the Sacramento Valley Basinwide Air Pollution Control Council after properly notified public hearing prior to grenting an exemption pursuant to this subsection, and findings of such hearing sent to ARB for concurrence

Officer of denial or conditional approval of an Authorization to Control Officer of denial or conditional approval of an Authorization to Construct or a Permit to Operate, the applicant may petition the hearing board, in writing, for a public hearing. The hearing toard, after notice and a public hearing may sustain or reverse the action of the Air Pollution Control Officer; such order may be subject to specified conditions.

Rule 4.12 Implementation Flans: The Air Pollution Control Officer may issue a permit to contract for a new stationary source or modification which is subject to Sectione. of Rule 4.6 only if all district regulations contained in the State Implementation Flan approved by the Environmental Protection Agency are being carried out in accordance with that plan.

REGULATION IX

ENFORCE ENT PROCEDURE

- Rule 9.0 Enforcement: The Rules and Regulations of the Yuba County Air Pollution Control District and all State statutes so authorizing and concerning air pollution controls shall be enforced by the Air Follution Control Officer and any officer as authorized by the State and/or local law.

 This Rule specifically includes inspectors and officers of the Yuba County Air Pollution Control District.
- Rule 9.1 <u>Bnission Monitoring:</u> The Air Pollution Control Officer may require the owner or operator of any air contaminant source to install, use and maintain monitoring equipment; sample emissions; establish and maintain records; and make periodic emission reports. All of these actions shall be accomplished in a manner approved by the Air Pollution Control Officer.
- Rule 9.2 Records and Reports: Are Pollution moritoring records and such fuel composition data as deemed necessary shall be recorded, compiled and submitted on forms furnished by the Air Pollution Control Officer.
- Rule 9.3 Tests: All tests shall be made and the results calculated in accordance with test procedures approved by the Air Pollution Control Officer. All tests shall be made under the direction of person qualified by training and experience in the field of air pollution control and approved by the Air Pollution Control Officer.
 - a. The Air Podlution Control Officer may conduct tests of emissions of air contaminants from any source. Upon request of the Air Pollution Control Officer, the person responsible for the source to be tested shall provide necessary holes in stacks or ducts and such other sale and proper sampling and testing facilities, exclusive of instruments and sensing devices as may be necessary for proper determination of the emission of air contaminants.
- Mile 9.4 <u>Field Inspection</u>: Each source of air pollution subject to permit or registration shall be inspected or tested at such intervals of time so that no extended periods of violations will occur.
- Rule 9.5 <u>Air Pollution Equipment Scheduled Maintenance</u>: In the case of shut-down or re-start of air pollution equipment for necessary scheduled maintenance, the intent to shut down such equipment shall be reported to the Air Pollution Control Officer at least twenty-four (24) hours prior to the planned shut-down. Such prior notice shall include, but is not limited to the following:
 - a. Identification of the specific facility to be taken out of service as well as its location and permit number;
 - b. The expected length of time that the air pollution control equipment will be out of service;
 - The nature and quantity of emissions of air contaminants likely to occur during the shut-down period;
 - d. Measures such as the use of off-shift labor and equipment that will be taken to minimize the length of the shut-down period;
 - The reasons that it would be impossible or impractical to shut down the source operation during the maintenance period;
 - During testing period moderate emission of air pollution will be allowed.
