

# Support Brownfields Research & Share Strategies

Upcoming solicitation expected November 2022. Grant award expected Spring 2023.

EPA intends to award **one \$500,000 grant** to provide technical assistance support for land banking approaches for brownfields revitalization. The period of performance will be **4 years**.

## Grant 5: Research, Technical Assistance, and Related Outreach on Land Banking Approaches for Brownfields Revitalization

**Goal:** Introduce communities to various brownfields and land banking approaches and expand community use of land banks as a tool for brownfields revitalization.

Types of Activities that help communities understand land banking approaches for brownfields revitalization may include:

- Conducting research
- Developing guides on best practices
- Lessons learned
- Effective strategies and model approaches
- Promoting awareness of informational materials
- Providing direct technical assistance

## EPA intends to solicit applications for five new grant opportunities:

### National Technical Assistance Opportunities:

1. Nationwide Technical Assistance for Brownfields RLF Programs
2. Nationwide Technical Assistance to Nonprofits Seeking to Reuse Brownfields
3. Nationwide Technical Assistance to Local Government Leaders on Developing and/or Operating Brownfields Programs Within Their Jurisdictions

### National Research opportunities:

4. Minimizing displacement and gentrification resulting from brownfields reuse
5. Land bank strategies as tools for brownfields revitalization (Focus of this flyer)

Interested applicants can apply for one or multiple opportunities. See [list of eligible entities](#) for technical assistance and research grants. Each grant will be awarded as a cooperative agreement.

**More details will be provided when the grant solicitation opens! Please keep an eye on EPA's Brownfields Program website under Open Solicitations.**
