

CHECKLIST 2: IDENTIFYING POTENTIAL LEAD ISSUES

This checklist is part of the Local Lead Action Plan (LLAP) Guide and is meant to help local government officials identify potential issues from lead in their local area. Fill out the checklist completely.

Note: Using the Local Lead Action Plan Guide is voluntary.

Today's date:

Name of local area:

Name of local official (primary official filling out this checklist):

Email address of local official (primary official filling out this checklist):

Instructions:

For each question, check either "Yes" or "No", or "?" if you are unsure and/or would like to investigate the topic further. Resources for finding information about a particular question will appear in the Resources box if you check "No" or "?". Add any answers or notes in the "My Notes" column.

Contact your region's EPA lead contact if you have questions about this checklist or the LLAP Guide.

After filling out the checklist completely, click "Save Checklist" (button not compatible in web browsers) to save the completed checklist.

Potential Lead Issues Happening Now: Based on background knowledge and current observations, are there any lead issues that exist currently, or may be emerging, in the local area?					
Yes	No	?	Question	My Notes	Resources use selection tool  to copy/paste websites
In your local area, is there testing or available data indicating a potential issue with lead...					
			In paint in homes built before 1978?		
			In schools built before 1978?		
			In daycares or other child-occupied facilities?		

			In commercial or industrial structures (ex: bridges, water towers, etc.)?		
			In abandoned industrial or commercial sites and/or structures?		
			In the blood of children under the age of 6?		
			In the blood of other community members, including adults?		
			In ground or drinking water?		
			In soil?		
			In air?		

			In products used by community members?		
			In hobby, recreational, religious, and/or cultural practices and activities in which locals engage?		
			In other locations or parts of the local environment? Are there any other potential lead issues not previously mentioned?		

Lead-Contaminated Sites, Land or Structures

			Are there any sites, land and/or structures in your local area with known lead contamination? If so ,where?		
			Is lead at the sites, land and/or structures being removed or addressed?		
			Are there any sites, land and/or structures in your area with potential lead hazards? If so, where?		

			Are there any sites, land and/or structure in your area(s) being investigated or inspected for lead contamination?		
--	--	--	--	--	--

New Lead Hazards

			Are there new lead dust hazards from residential renovations, house flipping, and/or demolitions?		
--	--	--	---	--	--

			Are there new lead soil hazards from residential renovations, house flipping, and/or demolitions?		
--	--	--	---	--	--

			Are there new lead dust hazards from other construction and/or community development?		
--	--	--	---	--	--

			Are there new lead soil hazards from other construction and/or community development?		
--	--	--	---	--	--

			Are there new lead emissions in air from local industry?		
--	--	--	--	--	--

			Are there new lead hazards in drinking water?		
--	--	--	---	--	--

Briefly summarize the potential issues from lead for your local area and write related concerns and goals. Once you have completed all three checklists, this can assist you in developing your lead action plan using the Local Lead Action Plan Template.
