

Save the Date! LMOP at SOAR 2023 in April

Meet with LMOP at SOAR

April 2023

The U.S. EPA Landfill Methane Outreach Program (LMOP) is pleased to announce that we will be **presenting and exhibiting at** the Solid Waste Association of North America (SWANA)'s **Sustainability. Operations. Action. Resources. (SOAR)** event, to be held in **April of 2023**, in Atlanta, Georgia. Please visit the SOAR website for information about this event including the schedule and how to register.

LMOP will present on **"New Policies And Programs Impacting Landfill Methane Reduction And Avoidance"** the afternoon of **Wednesday, April 19, 2023**. We will discuss how renewed emphasis on achieving methane reductions is driving incentives for energy recovery projects, which can help landfills recoup the costs of collection systems.

We will be at **Exhibit Space #326** during Exhibit Hall hours—if you attend SOAR 2023, we hope you will stop by our booth to catch up on our **latest resources, provide updates on your landfill or project, or ask any questions you may have**. LMOP was pleased to recently welcome Klara Zimmerman to the LMOP team; Klara was previously an ORISE Fellow on the EPA Office of Water's Creating Resilient Water Utilities team. Both Klara and Lauren Aepli will be in attendance.

To request removal from this email list, please reply to this message. For further information or questions about LMOP, please do not reply to this email message, but rather visit the [LMOP website](#). Thank you.
