Notes:

1) There are no changes to the jurisdictions' allocations of CBIG, CBRAP, and Local Government funding in FY23.

2) Jurisdictions have the flexibility to apply their Local Government funding to either their CBIG or CBRAP grants.

3) Jurisdictions must apply the Most Effective Basins - Annual Appropriate funding to their CBIG grant, unless EPA approval is obtained to award funding to CBRAP.

4) Infrastructure funding will be awarded as a separate grant from each jurisdictions' CBIG and CBRAP grants.

5) EPA makes no commitment of annual funding amounts for any fiscal year(s), as funds may be limited based on funding availability, satisfactory performance, Agency priorities, contributions from other state and federal agencies, partners, and organizations, and other applicable considerations
