**Subject: Data Validation Reports
E Palestine Site - ER
EPA Contract No.: 68HE0519D0005
Task Order/Task Order Line Item No.: 68HE0520F0032/0001EB201
Document Tracking No. 1721**

Dear Mr. Peters:

Tetra Tech, Inc. (Tetra Tech) is submitting these data validation reports for thirty-four air samples, including three field duplicate samples, collected at the E Palestine site. The samples were collected on March 11-13 and 17, 2023, and were analyzed for volatile organic compounds by Eurofins Air Toxics, LLC. The final laboratory data package was received on March 22, 2023.

Analytical data were evaluated in general accordance with the Tetra Tech *Quality Assurance Project Plan, Superfund Technical Assessment and Response Team (START V), EPA Region 5, Revision 3* (January 2022), and the EPA *National Functional Guidelines (NFG) for Organic Superfund Methods Data Review* (November 2020).

No rejection of results was required for these data packages. The results may be used as qualified based on the findings of this validation effort.

If you have any questions regarding this data validation report, please call me at (509) 688-5957.

Sincerely,

A handwritten signature in blue ink that appears to read "Debbie Kutsal".

Deb Kutsal

2303293, AND 2303429**

DATA VALIDATION CHECKLIST – STAGE 2A
EPA REGION 5 START CONTRACT

Site Name	E Palestine Site - ER		TO/TOLIN No.	68HE0520F0032/0001EB201
Document Tracking No.	1721a			
Data Reviewer (signature and date)	 March 23, 2023		 3/24/23	 27 March 2023
Laboratory Report No.	2303287		Laboratory	Eurofins Air Toxics, LLC, Folsom CA
Analyses	Volatile organic compounds (VOCs) by EPA Method TO-15 in scan and selected ion monitoring (SIM) modes			
Samples and Matrix	Nine air samples including one field duplicate			
Collection Date(s)	03/11/2023			
Field Duplicate Pairs	EPD-WA-01-031123/EPD-WA-11-031123			
Field QC Blanks	None			

INTRODUCTION

This checklist summarizes the Stage 2A validation performed on the subject laboratory report, in accordance with the U.S. Environmental Protection Agency (EPA) *Guidance for Labeling Externally Validated Laboratory Analytical Data for Superfund Use* (January 2009). Analytical data were evaluated in general accordance with the Tetra Tech *Quality Assurance Project Plan, Superfund Technical Assessment and Response Team (START V), EPA Region 5, Revision 4* (August 2022), and the EPA *National Functional Guidelines (NFG) for Organic Superfund Methods Data Review* (November 2020).

OVERALL EVALUATION

No rejection of results was required for this data package. The results may be used as qualified based on the findings of this validation effort..

Data completeness:

Within Criteria	Exceedance/Notes
N	No LCS RPDs were provided in the Level II laboratory report. The lab provided RPDs separately. No qualifications were applied.

DATA VALIDATION CHECKLIST – STAGE 2A
EPA REGION 5 START CONTRACT

Sample preservation, receipt, and holding times:

Within Criteria	Exceedance/Notes
N	Starting and ending canister vacuum/pressure values on the chain-of-custody (COC) form are all positive and should not be. The field team leader was contacted and confirmed that they are actually negative values and that the field team inadvertently omitted the negative signs. Additionally, the canister receipt vacuum/pressure values in the laboratory report are also positive and should not be. The laboratory was contacted and confirmed that all these values are negative, even though the minus signs are missing, and that the laboratory uses the following convention for recording Summa canister vacuums and pressures: vacuums are recorded as positive values using the unit of inches of mercury ("Hg), and positive pressures are recorded using the unit pounds per square inch (psi). No qualifications were applied because all canister pressures were within acceptance criteria.

Method blanks:

Within Criteria	Exceedance/Notes
N	TO-15 SIM: Method blank contained 1,4-Dichlorobenzene. The 1,4-Dichlorobenzene result for sample EPD-UW-01-031123 was qualified as estimated with a possible high bias (flagged J+).

Field blanks:

Within Criteria	Exceedance/Notes
NA	

Surrogates and labeled compounds:

Within Criteria	Exceedance/Notes
Y	

MS/MSDs:

Within Criteria	Exceedance/Notes
NA	

DATA VALIDATION CHECKLIST – STAGE 2A
EPA REGION 5 START CONTRACT

Laboratory duplicates:

Within Criteria	Exceedance/Notes
NA	

Field duplicates:

Within Criteria	Exceedance/Notes
Y	

LCS/LCSDs:

Within Criteria	Exceedance/Notes
N	TO-15: The LCS/LCSD recoveries were greater than QC limits for 3-Chloropropene. No field samples results were affected because 3-chloropropene was not found in the field samples.

Sample dilutions:

Within Criteria	Exceedance/Notes
Y	Canister dilution factors are 1.22 for sample EPD-UW-01-031123, 1.26 for sample EPD-WA-04-031123, 1.34 for sample EPD-WA-01-031193, 1.23 for sample EPD-WA-11-031193, 1.43 for sample EPD-WA-02-031193, 1.25 for samples EPD-WA-06-031193 and EPD-WA-07-031193, 1.20 for sample EPD-WA-03-031193, and 1.36 for sample EPD-DW-01-031193.

Re-extraction and reanalysis:

Within Criteria	Exceedance/Notes
NA	

DATA VALIDATION CHECKLIST – STAGE 2A
EPA REGION 5 START CONTRACT

MDLs/RLs:

Within Criteria	Exceedance/Notes
Y	Detections between the method detection limit (MDL) and reporting limit (RL) were reported and qualified as estimated (flagged J) by the laboratory.

Tentatively identified compounds:

Within Criteria	Exceedance/Notes
Y	Tentatively identified compounds (TICs) were detected in some of field the samples. The known TICs were qualified as tentatively identified (flagged NJ). In addition, 2-ethyl-1-hexanol and butyl acrylate were manually searched for in all samples. The non-detect results for these two compounds were flagged as not found (U, NF).

Other [none]:

Within Criteria	Exceedance/Notes
NA	

DATA VALIDATION CHECKLIST – STAGE 2A
EPA REGION 5 START CONTRACT

Overall Qualifications:

See results summary pages attached for changes to the laboratory qualifiers based upon this validation. The following is a list of qualifiers and definitions that may be used for the validation of this data package:

J	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased high.
J-	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased low.
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated value is the approximate concentration of the analyte in the sample.
R	The sample result is rejected as unusable due to serious deficiencies in one or more quality control criteria. The analyte may or may not be present in the sample.
U	The analyte was analyzed for, but was not detected at or above the associated value (reporting limit).
UJ	The analyte was analyzed for, but was not detected at or above the associated value (reporting limit), which is considered approximate due to deficiencies in one or more quality control criteria.
NF	The tentatively identified compound was manually searched for but was not found in the sample.

DATA VALIDATION CHECKLIST – STAGE 2A
EPA REGION 5 START CONTRACT

Site Name	E Palestine Site - ER		TO/TOLIN No.	68HE0520F0032/0001EB201
Document Tracking No.	1721b			
Data Reviewer (signature and date)	 March 23, 2023		 3/24/23	 27 March 2023
Laboratory Report No.	2303291		Laboratory	Eurofins Air Toxics, LLC, Folsom CA
Analyses	Volatile organic compounds (VOCs) by EPA Method TO-15 in scan and selected ion monitoring (SIM) modes			
Samples and Matrix	Nine air samples, including one field duplicate			
Collection Date(s)	03/13/2023			
Field Duplicate Pairs	EPD-WA-05-031323/EPD-WA-55-031323			
Field QC Blanks	None			

INTRODUCTION

This checklist summarizes the Stage 2A validation performed on the subject laboratory report, in accordance with the U.S. Environmental Protection Agency (EPA) *Guidance for Labeling Externally Validated Laboratory Analytical Data for Superfund Use* (January 2009). Analytical data were evaluated in general accordance with the Tetra Tech *Quality Assurance Project Plan, Superfund Technical Assessment and Response Team (START V), EPA Region 5, Revision 4* (August 2022), and the EPA *National Functional Guidelines (NFG) for Organic Superfund Methods Data Review* (November 2020).

OVERALL EVALUATION

No rejection of results was required for this data package. The results may be used as qualified based on the findings of this validation effort. .

Data completeness:

Within Criteria	Exceedance/Notes
N	No LCS RPDs were provided in the Level II laboratory report. The lab provided RPDs separately. No qualifications were applied.

DATA VALIDATION CHECKLIST – STAGE 2A
EPA REGION 5 START CONTRACT

Sample preservation, receipt, and holding times:

Within Criteria	Exceedance/Notes
N	Starting and ending canister vacuum/pressure values on the chain-of-custody (COC) form are all positive and should not be. The field team leader was contacted and confirmed that they are actually negative values and that the field team inadvertently omitted the negative signs. Additionally, the canister receipt vacuum/pressure values in the laboratory report are also positive and should not be. The laboratory was contacted and confirmed that all these values are negative, even though the minus signs are missing, and that the laboratory uses the following convention for recording Summa canister vacuums and pressures: vacuums are recorded as positive values using the unit of inches of mercury ("Hg), and positive pressures are recorded using the unit pounds per square inch (psi). No qualifications were applied because all canister pressures were within acceptance criteria.

Method blanks:

Within Criteria	Exceedance/Notes
N	TO-15 scan: Method blank contained Carbon Disulfide at a concentration below the reporting limit (RL). The carbon disulfide result for all field samples was qualified as not detected (flagged U) at the RL.

Field blanks:

Within Criteria	Exceedance/Notes
NA	

Surrogates and labeled compounds:

Within Criteria	Exceedance/Notes
Y	

MS/MSDs:

Within Criteria	Exceedance/Notes
NA

Sample dilutions:

Within Criteria	Exceedance/Notes
Y	Canister dilution factor is 1.36 for sample EPD-UW-01-031323, 1.30 for sample EPD-WA-04-031323, 1.34 for sample EPD-WA-01-031393, 1.31 for sample EPD-WA-02-031393, 1.32 for sample EPD-WA-06-031393, 1.35 for sample EPD-WA-05-031323, 1.28 for sample EPD-WA-55-031393, 1.34 for sample EPD-DW-01-031393, and 1.36 for sample EPD-WA-03-031393.

Re-extraction and reanalysis:

Within Criteria	Exceedance/Notes
NA	

MDLs/RRLs:

Within Criteria	Exceedance/Notes
Y	Detections between the method detection limit (MDL) and reporting limit (RL) were reported and qualified as estimated (flagged J) by the laboratory.

DATA VALIDATION CHECKLIST – STAGE 2A
EPA REGION 5 START CONTRACT

Tentatively identified compounds:

Within Criteria	Exceedance/Notes
Y	Tentatively identified compounds (TICs) were detected in the field samples. The known TICs were qualified as tentatively identified (flagged NJ). In addition, 2-ethyl-1-hexanol and butyl acrylate were manually searched for in all samples. The nondetect results for these two compounds were flagged as not found (U, NF).

Other [none]:

Within Criteria	Exceedance/Notes
NA	

Overall Qualifications:

See results summary pages attached for changes to the laboratory qualifiers based upon this validation. The following is a list of qualifiers and definitions that may be used for the validation of this data package:

J	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased high.
J-	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased low.
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated value is the approximate concentration of the analyte in the sample.
R	The sample result is rejected as unusable due to serious deficiencies in one or more quality control criteria. The analyte may or may not be present in the sample.
U	The analyte was analyzed for, but was not detected at or above the associated value (reporting limit).
UJ	The analyte was analyzed for, but was not detected at or above the associated value (reporting limit), which is considered approximate due to deficiencies in one or more quality control criteria.
NF	The tentatively identified compound was manually searched for but was not found in the sample.

Site Name	E Palestine Site - ER		TO/TOLIN No.	68HE0520F0032/0001EB201
Document Tracking No.	1721c			
Data Reviewer (signature and date)	 March 23, 2023		 3/24/23	 28 March 2023
Laboratory Report No.	2303293R1		Laboratory	Eurofins Air Toxics, LLC, Folsom CA
Analyses	Volatile organic compounds (VOCs) by EPA Method TO-15 in scan and selected ion monitoring (SIM) modes			
Samples and Matrix	Nine air samples, including one field duplicate			
Collection Date(s)	03/12/2023			
Field Duplicate Pairs	EPD-WA-05-031223/EPD-WA-55-031223			
Field QC Blanks	None			

INTRODUCTION

This checklist summarizes the Stage 2A validation performed on the subject laboratory report, in accordance with the U.S. Environmental Protection Agency (EPA) *Guidance for Labeling Externally Validated Laboratory Analytical Data for Superfund Use* (January 2009). Analytical data were evaluated in general accordance with the Tetra Tech *Quality Assurance Project Plan, Superfund Technical Assessment and Response Team (START V), EPA Region 5, Revision 4* (August 2022), and the EPA *National Functional Guidelines (NFG) for Organic Superfund Methods Data Review* (November 2020).

OVERALL EVALUATION

No rejection of results was required for this data package. The results may be used as qualified based on the findings of this validation effort..

Data completeness:

Within Criteria	
N	No LCS RPDs were provided in the Level II laboratory report. They are provided in the Level IV reports, however. No qualifications were applied.

DATA VALIDATION CHECKLIST – STAGE 2A
EPA REGION 5 START CONTRACT

Sample preservation, receipt, and holding times:

Within Criteria	Exceedance/Notes
N	<p>The chain-of-custody (COC) form was not signed by the sampler and does not include the time of relinquishment.</p> <p>The sample identification on the original COC form for sample EPD-DW-01-031223 did not match the entry on the sample tag. A revised COC form was provided by the client on 3/16/2023 with the correct sample ID.</p> <p>A revised COC form was provided by the client on 3/15/23, correcting the final field vacuum pressure for sample EPD-WA-55-031223, and the data package was reissued on 3/17/2023.</p> <p>Starting and ending canister vacuum/pressure values on the COC form are all positive and should not be. The field team leader was contacted and confirmed that they are actually negative values and that the field team inadvertently omitted the negative signs. Additionally, the canister receipt vacuum/pressure values in the laboratory report are also positive and should not be. The laboratory was contacted and confirmed that all these values are negative, even though the minus signs are missing, and that the laboratory uses the following convention for recording Summa canister vacuums and pressures: vacuums are recorded as positive values using the unit of inches of mercury ("Hg), and positive pressures are recorded using the unit pounds per square inch (psi). No qualifications were applied because all canister pressures were within acceptance criteria.</p>

Method blanks:

Within Criteria	Exceedance/Notes
N	TO-15 scan: Method blank reported Carbon Disulfide. The following were qualified as not detected (U) at the Reporting Limit (RL): EPD-WA-05-031223, EPD-WA-55-031223, and EPD-UW-01-031223.

Field blanks:

Within Criteria	Exceedance/Notes
NA	

DATA VALIDATION CHECKLIST – STAGE 2A
EPA REGION 5 START CONTRACT

Surrogates and labeled compounds:

Within Criteria	Exceedance/Notes
Y	

MS/MSDs:

Within Criteria	Exceedance/Notes
NA	

Laboratory duplicates:

Within Criteria	Exceedance/Notes
NA	

Field duplicates:

Within Criteria	Exceedance/Notes
Y	

LCSs/LCSDs:

Within Criteria	Exceedance/Notes
N	TO-15: The LCS/LCSD recoveries were greater than QC limits for 3-Chloropropene. No samples were affected because none contained detectable 3-chloropropene.

Sample dilutions:

Within Criteria	Exceedance/Notes
Y	Canister dilution factors were 1.29 for sample EPD-WA-04-031223, 1.30 for sample EPD-WA-01-031223, 1.47 for sample EPD-DW-01-031223, 1.61 for sample EPD-WA-02-031223, 1.34 for sample EPD-WA-06-031223, 1.36 for sample EPD-WA-05-031223, 1.62 for sample EPD-WA-55-031223, 1.32 for sample EPD-WA-01-031223, and 1.33 for sample EPD-WA-03-031223.

DATA VALIDATION CHECKLIST – STAGE 2A
EPA REGION 5 START CONTRACT

Re-extraction and reanalysis:

Within Criteria	Exceedance/Notes
NA	

MDLs/RLs:

Within Criteria	Exceedance/Notes
Y	Detections between the method detection limit (MDL) and reporting limit (RL) were reported and qualified as estimated (flagged J) by the laboratory.

Tentatively identified compounds:

Within Criteria	Exceedance/Notes
Y	Tentatively identified compounds (TICs) were detected in the samples. The known TICs were qualified as tentatively identified (flagged NJ). In addition, 2-ethyl-1-hexanol and butyl acrylate were manually searched for in all samples. The non-detect results for these two compounds were flagged as not found (U, NF).

Other [none]:

Within Criteria	Exceedance/Notes
NA	

DATA VALIDATION CHECKLIST – STAGE 2A
EPA REGION 5 START CONTRACT

Overall Qualifications:

See results summary pages attached for changes to the laboratory qualifiers based upon this validation. The following is a list of qualifiers and definitions that may be used for the validation of this data package:

J	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased high.
J-	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased low.
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated value is the approximate concentration of the analyte in the sample.
R	The sample result is rejected as unusable due to serious deficiencies in one or more quality control criteria. The analyte may or may not be present in the sample.
U	The analyte was analyzed for, but was not detected at or above the associated value (reporting limit).
UJ	The analyte was analyzed for, but was not detected at or above the associated value (reporting limit), which is considered approximate due to deficiencies in one or more quality control criteria.
NF	The tentatively identified compound was manually searched for but was not found in the sample.

Data Reviewer (signature and date)			Technical Reviewer (signature and date)	 28 March 2023
Laboratory Report No.	2303429		Laboratory	Eurofins Air Toxics, LLC, Folsom CA
Analyses	Volatile organic compounds (VOCs) by EPA Method TO-15 in scan and selected ion monitoring (SIM) modes			
Samples and Matrix	Seven air samples			
Collection Date(s)	03/17/2023			
Field Duplicate Pairs	None			
Field QC Blanks	None			

INTRODUCTION

This checklist summarizes the Stage 2A validation performed on the subject laboratory report, in accordance with the U.S. Environmental Protection Agency (EPA) *Guidance for Labeling Externally Validated Laboratory Analytical Data for Superfund Use* (January 2009). Analytical data were evaluated in general accordance with the Tetra Tech *Quality Assurance Project Plan, Superfund Technical Assessment and Response Team (START V), EPA Region 5, Revision 4* (August 2022), and the EPA *National Functional Guidelines (NFG) for Organic Superfund Methods Data Review* (November 2020).

OVERALL EVALUATION

No rejection of results was required for this data package. The results may be used as qualified based on the findings of this validation effort. .

Data completeness:

Within Criteria	Exceedance/Notes
N	No LCS RPDs were provided in the Level II laboratory report. The lab provided RPDs separately. No qualifications were applied.

DATA VALIDATION CHECKLIST – STAGE 2A
EPA REGION 5 START CONTRACT

Sample preservation, receipt, and holding times:

Within Criteria	Exceedance/Notes
N	<p>Starting and ending canister vacuum/pressure values on the chain-of-custody (COC) form are all positive and should not be. The field team leader was contacted and confirmed that they are actually negative values and that the field team inadvertently omitted the negative signs. Additionally, the canister receipt vacuum/pressure values in the laboratory report are also positive and should not be. The laboratory was contacted and confirmed that all these values are negative, even though the minus signs are missing, and that the laboratory uses the following convention for recording Summa canister vacuums and pressures: vacuums are recorded as positive values using the unit of inches of mercury ("Hg), and positive pressures are recorded using the unit pounds per square inch (psi). No qualifications were applied because all canister pressures were within acceptance criteria.</p> <p>There is a sizable difference between the field-measured ending vacuum pressures and the lab-measured sample receipt vacuum pressures for all samples. This suggests that the canisters had leaks that allowed them to fill up to atmospheric pressure between the end of the sampling event and the time of the sample's receipt at the lab. Such leaks might have contaminated the samples or in the very least diluted the samples with air unintended for sampling. Thus, because the samples may have been contaminated with air from unknown locations that were not intended to be sampled from, the results for the sample should be used with caution.</p>

Sample dilutions:

Within Criteria	Exceedance/Notes
Y	Canister dilution factors are 1.39 for sample EPD-WA-01-031723, 1.37 for sample EPD-WA-02-031723, 1.45 for sample EPD-WA-06-031723, 1.31 for samples EPD-DW-01-031723 and EPD-UW-01-031723, 1.29 for sample EPD-WA-05-031723, and 1.40 for sample EPD-WA-03-031723.

Re-extraction and reanalysis:

Within Criteria	Exceedance/Notes
NA	

MDLs/RLs:

Within Criteria	Exceedance/Notes
Y	Detections between the method detection limit (MDL) and reporting limit (RL) were reported and qualified as estimated (flagged J) by the laboratory.

Tentatively identified compounds:

Within Criteria	Exceedance/Notes
Y	Tentatively identified compounds (TICs) were detected in the samples. The known TICs were qualified as tentatively identified (flagged NJ). In addition, 2-ethyl-1-hexanol and butyl acrylate were manually searched for in all samples. The non-detect results for these two compounds were flagged as not found (U, NF).

Other [none]:

Within Criteria	Exceedance/Notes
NA

Overall Qualifications:

See results summary pages attached for changes to the laboratory qualifiers based upon this validation. The following is a list of qualifiers and definitions that may be used for the validation of this data package:

J	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased high.
J-	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased low.
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated value is the approximate concentration of the analyte in the sample.
R	The sample result is rejected as unusable due to serious deficiencies in one or more quality control criteria. The analyte may or may not be present in the sample.
U	The analyte was analyzed for, but was not detected at or above the associated value (reporting limit).
UJ	The analyte was analyzed for, but was not detected at or above the associated value (reporting limit), which is considered approximate due to deficiencies in one or more quality control criteria.
NF	The tentatively identified compound was manually searched for but was not found in the sample.
