

## NW Natural Seeks RNG Resources

As a service to our Partners and other stakeholders, EPA's Landfill Methane Outreach Program (LMOP) is sharing information about a **request for proposals (RFP)** from **Northwest Natural Gas Company (NW Natural)**. Please note that EPA is not affiliated in any way with the review and selection process. Information provided below is based on the RFP.

NW Natural, Oregon's largest natural gas utility, serves residential, commercial and industrial customers in the Pacific Northwest. State-level policies and rules give natural gas utilities in the Pacific Northwest the ability and incentive to procure renewable natural gas (RNG) for their customers. NW Natural is **seeking pipeline-quality RNG resources and/or the associated environmental attributes** from a variety of feedstocks and sources around the country, including renewable hydrogen.

NW Natural is soliciting proposals from qualified firms to **sell RNG from existing or future projects**. Delivery of the resource to NW Natural must begin no later than December 31, 2025.

The **deadline for questions** is **March 27, 2023**, and **proposals are due** by **April 17, 2023**. Questions and submissions must be sent to [renewables@nwnatural.com](mailto:renewables@nwnatural.com).

Please refer to the RFP on NW Natural's website at <https://www.nwnatural.com/about-us/environment/renewable-natural-gas> for complete information.
