

July 21, 2023

**MEMORANDUM**

**SUBJECT:** Allotments of FY 2022 and 2023 Appropriations for the *Voluntary School and Child Care Lead Testing and Reduction Grant Program*, authorized under section 2107 of the Water Infrastructure Improvements for the Nation Act and amended by section 50110 of the Infrastructure Investment Job Act

**FROM:** Marietta Echeverria, Director  
Drinking Water Capacity Compliance Assistance Division

**TO:** Water Division Directors  
Regions 1-10

Attached are the FY 2022 and 2023 *Voluntary School and Child Care Lead Testing and Reduction Grant Program* allotments. Congress authorized this grant program under the Safe Drinking Water Act (SDWA) 1464(d), as amended by section 2107 of the Water Infrastructure Improvements for the Nation (WIIN) Act, to reduce exposure of children to lead. Through the enactment of the Bipartisan Infrastructure Law (BIL), also known as the Infrastructure Investment Job Act (IIJA) in November 2021, the grant program was further amended to include addressing lead exposure in drinking water at school and child care facilities through remediation. The total amount of appropriations available for this program is \$58,000,000 for participating states, territories, and tribes. Also included as part of this memo are the individual state and territory allotments and the total amount available to support the tribal program (which will be released by the Tribal Grant program at a later date).

Grantees must continue to work with the U.S. Environmental Protection Agency (EPA) regional offices in the implementation of their respective programs and confirm their intention to continue participation in the program.

Concurrent with the allotment distributions, EPA is releasing the revised grant implementation document and will post it at <https://www.epa.gov/dwcapacity/wiin-grant-voluntary-school-and-child-care-lead-testing-and-reduction-grant-program>. The implementation document contains detailed information on how EPA will award and administer grants that support eligible actions, such as those for remediation or replacement activities. Participating states and territories are required to submit approved workplan application packages at <https://www.grants.gov>.

For further information on the implementation of this grant program, to view the revised grant implementation document, eligibilities and frequently asked questions, more information is available at <https://www.epa.gov/dwcapacity/wiin-grant-voluntary-school-and-child-care-lead-testing-and-reduction-grant-program>.

If you have any questions about the allotment calculations, please call me, or have your staff contact Treda Grayson at 202-566-0916 or [grayson.treda@epa.gov](mailto:grayson.treda@epa.gov).

**Final FY 2022 and FY 2023 Allotments for  
Voluntary School and Child Care Lead Testing and Reduction Grant Program  
Based on Total Appropriations of \$58,000,000**

\*American Indian & Alaska Native Communities \$3,733,000
