Importance:	High

Hi Nancy,

Our commercial biologist (Tyler Harp) further explained in more detail (attached word and PDF versions) why Syngenta believes exclusive use criteria III and IV are met for Benzovindiflupyr (Solatenol[™]) on 6 minor crops: cucumber, watermelon, squash, bell pepper, non-bell pepper (combined and starts on page 1), and ginseng (starts on page 15). Tyler and I really appreciate the EPA giving us the opportunity to further explain our case and rationale for extending the Solatenol patent by 3 years. We promised to have it to you by the 28th, so we're a day early. Thanks again for all of your help!

Best Regards, Adora

syngenta
