Environmental Justice/ Title VI Discrimination Complaint Against ADEM

September 9, 2023

To Whom It May Concern,

Hi, I'm filing this complaint against ADEM provided discriminatory way I (b)(6) Privacy and African American Shiloh Community have been treated for five in a half year by ADEM. ADEM has discriminated and retaliated by closing complaint on using misinformation. July 03, 2023, Eric Moyers with ADEM stated that the reason they can't fix an ongoing storm water drainage flooding from U S Highway 84 forced onto the citizens homes, property and business is because there was a settlement agreement with some of the homeowners.

ADEM lack of response and how they have worked hand in hand with racial discrimination practiced by ALDOT that was charged with expanding U S HWY 84 thru the Shiloh Community causing stormwater drainage to flood residents homes, property and business creating a health problem of overflowing septic systems, sewer backup and mold in homes as well as subsidence and sink holes in residents yards and property.

EPA Region 4 was involved but was abruptly pulled off the case on February 18, 2022. Pamela Riley was working the case and after her discovery and findings she was removed and Mark Robinson, Ahmad Dromgoole took over the case and was quick to close it out by saying that they were sorry that we were having Stormwater flooding, but they have no regulatory tools to compel further action to address the Shiloh Community Stormwater flooding from U S HWY 84 onto homes, property and businesses. Homes are sinking due to stormwater from U S Hwy 84 forced onto the African American Shiloh Community homes, business and property by no fault of the citizens of Shiloh Community.

I (b)(6) Privacy just discovered a natural gas pipeline and the dangers associated with the close proximity to the back of my home less than 8 feet and my home is sinking toward this pipeline due to stormwater from U S Hwy 84 undermining the foundation of the home. This situation has gotten no response from ADEM or ALDOT. We are seeking assistance from EPA to

leverage support from ADEM, USDOT and Southeast Gas to move the natural gas pipeline away from my house and the Shiloh Community.

Regards/Sincerely/Best,

(b)(6) Privacy
