

Climate Pollution Reduction Grants: Accessing Data for the Co-Pollutant Emissions Analysis

Karl Seltzer

U.S. Environmental Protection Agency

CLIMATE POLLUTION REDUCTION GRANTS

**U.S. Environmental
Protection Agency**

- The Climate Pollution Reduction Grants (CPRG) program will provide grants to states, local governments, tribes, and territories to develop and implement plans for reducing greenhouse gas emissions and other harmful air pollution.
- Section 60114 of the Inflation Reduction Act provides an investment of \$5 billion to support efforts by states, municipalities, air pollution control agencies, tribes, and groups to develop and implement strong, local greenhouse gas reduction strategies.
- This two-phase grant program provides funding of \$250 million for noncompetitive planning grants, and \$4.6 billion for competitive implementation grants.

Planning Grant Deliverables

Priority Climate Action Plan (PCAP)

- A benefits analysis, including both base year estimates of co-pollutants (CAPs/HAPs) and anticipated co-pollutant emission reductions as plan measures are implemented and GHG reduction goals are met, is encouraged.

Comprehensive Climate Action Plan (CCAP)

- A benefits analysis, including both base year estimates of co-pollutants (CAPs/HAPs) and anticipated co-pollutant emission reductions as plan measures are implemented and GHG reduction goals are met, is required.

Status Report

- Updated benefits analysis from CCAP is required.

Online 2020 NEI Data Retrieval Tool

- To help CPRG applicants access data from the 2020 NEI, OAQPS has developed the [2020 NEI Data Retrieval Tool](#).
- Using this tool, users can select, view, and download data from the 2020 NEI at the SCC- and county-level for onroad, nonroad, and nonpoint sources, and at the facility-level for point sources.
 - In the tool, all onroad, nonroad, and nonpoint emissions are available in the “County Level Data” table, and point emissions are available in the “Facility Data” table.
