

REMINDER: LMOP Request for Partner Contact Updates

Dear LMOP Partner primary contact,

Your organization is a valued Partner of the Landfill Methane Outreach Program (LMOP). We emailed you at the beginning of August requesting that you review your Partner information in an attached Excel file and provide us with any necessary updates by **August 22, 2023**. **If you did not receive that email or need it resent for any reason, please reply to this email with that request.**

Ensuring your contact information and organization description are up to date will help us continue to provide you with landfill gas energy information and ensure that your LMOP Partner listing on our website is accurate.

A quick update on LMOP activities:

- In June 2023, we hosted a webinar about options project owners have when their power purchase agreement is expiring. To view the recording and slides for this webinar or others, visit the [Proceedings for LMOP Events](#) section of the LMOP website.
- LMOP co-presented at the S.O.A.R. event in April 2023 about policies and programs impacting reductions of landfill methane emissions; our [presentation is available online](#).
- In December 2022, we published an enhanced version of the LMOP [National Map of LFG Energy Projects and Municipal Solid Waste Landfills](#) on the LMOP website. The map now incorporates layers for Tribal lands and environmental justice demographic data.

We appreciate your commitment to LMOP and your ongoing recognition of the environmental, energy and economic benefits of landfill gas recovery.

Sincerely,

Lauren Aepli and Klara Zimmerman
U.S. EPA LMOP
