Mr. Josh Peters  
On-Scene Coordinator  
U.S. Environmental Protection Agency, Region 5  
Superfund and Emergency Management Division  
2565 Plymouth Road  
Ann Arbor, MI 48105

We are in the process of ensuring this document is accessible to all audiences. If you need assistance accessing this document, or any material on the EPA East Palestine, Ohio emergency response web pages, please contact the Region 5 Public Information Officer on-call at: R5\_EastPalestine@epa.gov

**Subject:** **Data Validation Report**  
**E Palestine Site - ER**  
**EPA Contract No.: 68HE0519D0005**  
**Task Order/Task Order Line Item No.: 68HE0520F0032/0001EB201**  
**Document Tracking No. 2299**

Dear Mr. Peters:

Tetra Tech, Inc. (Tetra Tech) is submitting this data validation report for 26 air samples (including 2 field duplicate samples) collected at the E Palestine site. The samples were collected between October 21 to 23, 2023, and were analyzed for volatile organic compounds by Eurofins Air Toxics, LLC. The final laboratory data package was received on October 26, 2023.

Analytical data were evaluated in general accordance with the Tetra Tech *Quality Assurance Project Plan, East Palestine Train Derailment Site, East Palestine, Columbiana County, Ohio*, Revision 3 (April 2023), the Tetra Tech *Quality Assurance Project Plan, Superfund Technical Assessment and Response Team (START V)*, EPA Region 5, Revision 4 (August 2022), and the *National Functional Guidelines (NFG) for Organic Superfund Methods Data Review* (November 2020).

No rejection of results was required for these data packages. The results may be used as qualified based on the findings of this validation effort.

If you have any questions regarding this data validation report, please contact me via the project manager.

Sincerely,

Celina Barnett- Digitally signed by Celina Barnett-Cashman

<b>Field QC Blanks</b>	None		

## INTRODUCTION

This checklist summarizes the Stage 2A validation performed on the subject laboratory report, in accordance with the U.S. Environmental Protection Agency (EPA) *Guidance for Labeling Externally Validated Laboratory Analytical Data for Superfund Use* (January 2009). Analytical data were evaluated in general accordance with the Tetra Tech *Quality Assurance Project Plan, East Palestine Train Derailment Site, East Palestine, Columbiana County, Ohio, Revision 3* (April 2023), the Tetra Tech *Quality Assurance Project Plan, Superfund Technical Assessment and Response Team (START V), EPA Region 5, Revision 4* (August 2022), and the EPA *National Functional Guidelines (NFG) for Organic Superfund Methods Data Review* (November 2020).

## OVERALL EVALUATION

No rejection of results was required for this data package. The results may be used as qualified based on this validation effort.

### Data completeness:

Within Criteria	Exceedance/Notes
N	Laboratory control sample (LCS)/LCS duplicate (LCSD) relative percent differences (RPD) and chain of custody (COC) form were not included in the Level I laboratory report. The laboratory provided the COC form separately and the LCS/LCSD RPDs were included in the Level IV laboratory report. No qualifications were applied.

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**Sample preservation, receipt, and holding times:**

Within Criteria	Exceedance/Notes
N	The residual canister receipt vacuums in the laboratory report were recorded as positive values. The laboratory was contacted and confirmed that all values were negative, even though the minus signs were missing, and that the laboratory used the following convention for recording Summa canister vacuums and pressures: vacuums were recorded as positive values using the unit of inches of mercury ("Hg), and positive pressures were recorded using the unit pounds per square inch (psi). No qualifications were applied.

**Method blanks:**

Within Criteria	Exceedance/Notes
N	<p>TO-15 scan (2310543-10A): Acetone was detected in the method blank at a level between the method detection limit (MDL) and reporting limit (RL). Acetone in samples EPD-DW-C-102323 and EPD-WA-02-102323 were greater than ten times the blank value; therefore, no qualifications were necessary. All remaining acetone sample results were detected below the RL; therefore, qualified as nondetect (flagged U) at the RL.</p> <p>TO-15 SIM (2310543-10B): 1,4-Dichlorobenzene was detected in the method blank at a level between the MDL and RL. All 1,4-dichlorobenzene sample results were nondetect; therefore, no qualifications were necessary.</p>

**Field blanks:**

Within Criteria	Exceedance/Notes
NA	

**Surrogates and labeled compounds:**

Within Criteria	Exceedance/Notes
Y	

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**MS/MSDs:**

Within Criteria	Exceedance/Notes
NA	

**Laboratory duplicates:**

Within Criteria	Exceedance/Notes
NA	

**Field duplicates:**

Within Criteria	Exceedance/Notes
Y	

**LCSs/LCSDs:**

Within Criteria	Exceedance/Notes
Y	

**Sample dilutions:**

Within Criteria	Exceedance/Notes
Y	Canister dilution factors ranged from 1.29 to 1.59. While no qualifications were applied, the data user should be aware of increased RLs for sample dilutions.

**Re-extraction and reanalysis:**

Within Criteria	Exceedance/Notes
NA	

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**MDLs/RJs:**

Within Criteria	Exceedance/Notes
Y	Detections between the MDL and RL were reported and qualified as estimated (flagged J) by the laboratory.

**Tentatively identified compounds:**

Within Criteria	Exceedance/Notes
Y	Tentatively identified compounds (TICs) were detected in most samples. The laboratory qualified known TICs as tentatively identified (flagged NJ). The laboratory qualified unknown TICs as estimated (flagged J). The laboratory qualified the results for 2-ethyl-1-hexanol and butyl acrylate as manually searched, but nondetect (flagged U), and during validation these results were qualified as manually searched for, but not found in the sample (flagged U,NF).

**Other [Continuing Calibration]:**

Within Criteria	Exceedance/Notes
Y	

**TETRA TECH**

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**Overall Qualifications:**

See results summary pages attached for changes to the laboratory qualifiers based upon this validation. The following is a list of qualifiers and definitions that may be used for the validation of this data package:

J	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased high.
J-	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased low.
NF	The tentatively identified compound was manually searched for but was not found in the sample.
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated value is the approximate concentration of the analyte in the sample.
R	The sample result is rejected as unusable due to serious deficiencies in one or more quality control criteria. The analyte may or may not be present in the sample.
U	The analyte was analyzed for but was not detected at or above the associated value (reporting limit).
UJ	The analyte was analyzed for but was not detected at or above the associated value (reporting limit), which is considered approximate due to deficiencies in one or more quality control criteria.

<b>Laboratory Report No.</b>	2310544AA		
<b>Analyses</b>	Volatile organic compounds (VOCs) by EPA method TO-15 in scan and selected ion monitoring (SIM) modes		
<b>Samples and Matrix</b>	Five air samples		
<b>Collection Date(s)</b>	10/22/2023		
<b>Field Duplicate Pairs</b>	None		
<b>Field QC Blanks</b>	None		

## INTRODUCTION

This checklist summarizes the Stage 2A validation performed on the subject laboratory report, in accordance with the U.S. Environmental Protection Agency (EPA) *Guidance for Labeling Externally Validated Laboratory Analytical Data for Superfund Use* (January 2009). Analytical data were evaluated in general accordance with the Tetra Tech Quality Assurance Project Plan (QAPP), *East Palestine Train Derailment Site, East Palestine, Columbiana County, Ohio*, Revision 3 (April 2023), the Tetra Tech Quality Assurance Project Plan, *Superfund Technical Assessment and Response Team (START V), EPA Region 5, Revision 4* (August 2022), and the EPA National Functional Guidelines (NFG) for Organic Superfund Methods Data Review (November 2020).

## OVERALL EVALUATION

No rejection of results was required for this data package. The results may be used as qualified based on this validation effort.

### Data completeness:

<b>Within Criteria</b>	<b>Exceedance/Notes</b>
N	<p>Laboratory control sample (LCS)/LCS duplicate (LCSD) relative percent differences (RPD) and chain of custody (COC) form were not included in the Level I laboratory report. The laboratory provided the COC form separately and the LCS/LCSD RPDs were included in the Level IV laboratory report. No qualifications were applied.</p> <p>Sample EPD-WA-05-102223 was voided due to damage during collection.</p>

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**Sample preservation, receipt, and holding times:**

Within Criteria	Exceedance/Notes
N	<p>The residual canister receipt vacuums in the laboratory report were recorded as positive values. The laboratory was contacted and confirmed that all values were negative, even though the minus signs were missing, and that the laboratory used the following convention for recording Summa canister vacuums and pressures: vacuums were recorded as positive values using the unit of inches of mercury ("Hg), and positive pressures were recorded using the unit pounds per square inch (psi). No qualifications were applied.</p> <p>The laboratory report receiving notes case narrative states "Samples EPD-DW-C-102223, EPD-UW-G-102223 and EPD-WA-03-102223 were not received at Eurofin Air Toxics, LLC on 10/24/2023 despite notation on the COC. The samples were subsequently received on 10/25/2023 and were added to the analytical request." The laboratory reported the results received on 10/25/2023 separately. No qualifications were applied.</p>

**Method blanks:**

Within Criteria	Exceedance/Notes
N	TO-15 SIM (2310544A-07B): Benzene and naphthalene were detected in the method blank at levels between the method detection limit (MDL) and reporting limit (RL). All benzene sample results were greater than ten times the blank value; therefore, no qualifications were necessary. All naphthalene sample results were nondetect; therefore, no qualifications were necessary.

**Field blanks:**

Within Criteria	Exceedance/Notes
NA	

**Surrogates and labeled compounds:**

Within Criteria	Exceedance/Notes
Y	

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**MS/MSDs:**

Within Criteria	Exceedance/Notes
NA	

**Laboratory duplicates:**

Within Criteria	Exceedance/Notes
NA	

**Field duplicates:**

Within Criteria	Exceedance/Notes
N	The site-specific QAPP specifies the collection of 1 field duplicate sample per 10 samples. However, fewer than 1 field duplicate sample per 10 samples are included in this sample delivery group. No qualifications were applied based on professional judgement.

**LCSs/LCSDs:**

Within Criteria	Exceedance/Notes
N	<p>TO-15 scan (2310544A-09A/2310544A-09AA): The percent recoveries of 1,2,4-trichlorobenzene and hexachlorobutadiene were below the site-specific QAPP acceptance criteria in the LCS and LCSD. All 1,2,4-trichlorobenzene and hexachlorobutadiene sample results were qualified as estimated with possible low bias (flagged UJ).</p> <p>TO-15 scan (2310544A-09B/2310544A-09BB): The percent recoveries of 1,4-dichlorobenzene in the LCS and LCSD and naphthalene in the LCS exceeded the site-specific QAPP acceptance criteria. All 1,4-dichlorobenzene sample results were qualified by the laboratory as estimated (flagged UJ); therefore, no further qualifications were applied. The average percent recovery of LCS and LCSD was within acceptance criteria; therefore, no qualifications were necessary.</p>

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**Sample dilutions:**

Within Criteria	Exceedance/Notes
Y	Canister dilution factors ranged from 1.47 to 1.66. While no qualifications were applied, the data user should be aware of increased reporting limits for sample dilutions.

**Re-extraction and reanalysis:**

Within Criteria	Exceedance/Notes
NA	

**MDLs/RLs:**

Within Criteria	Exceedance/Notes
Y	Detections between the MDL and RL were reported and qualified as estimated (flagged J) by the laboratory.

**Tentatively identified compounds:**

Within Criteria	Exceedance/Notes
Y	Tentatively identified compounds (TICs) were detected in most samples. The laboratory qualified known TICs as tentatively identified (flagged NJ). The laboratory qualified unknown TICs as estimated (flagged J). The laboratory qualified the results for 2-ethyl-1-hexanol and butyl acrylate as manually searched, but nondetect (flagged U), and during validation these results were qualified as manually searched for, but not found in the sample (flagged U,NF).

**Other [Continuing Calibration]:**

Within Criteria	Exceedance/Notes
N	CCV 2310544A-08B had low percent recovery of 1,4-dichlorobenzene. All 1,4-dichlorobenzene sample results were qualified by the laboratory as estimated (flagged UJ). No further qualifications were applied.

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**Overall Qualifications:**

See results summary pages attached for changes to the laboratory qualifiers based upon this validation. The following is a list of qualifiers and definitions that may be used for the validation of this data package:

J	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased high.
J-	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased low.
NF	The tentatively identified compound was manually searched for but was not found in the sample.
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated value is the approximate concentration of the analyte in the sample.
R	The sample result is rejected as unusable due to serious deficiencies in one or more quality control criteria. The analyte may or may not be present in the sample.
U	The analyte was analyzed for but was not detected at or above the associated value (reporting limit).
UJ	The analyte was analyzed for but was not detected at or above the associated value (reporting limit), which is considered approximate due to deficiencies in one or more quality control criteria.

#### INTRODUCTION

This checklist summarizes the Stage 2A validation performed on the subject laboratory report, in accordance with the U.S. Environmental Protection Agency (EPA) *Guidance for Labeling Externally Validated Laboratory Analytical Data for Superfund Use* (January 2009). Analytical data were evaluated in general accordance with the Tetra Tech *Quality Assurance Project Plan (QAPP), East Palestine Train Derailment Site, East Palestine, Columbiana County, Ohio, Revision 3* (April 2023), the Tetra Tech *Quality Assurance Project Plan, Superfund Technical Assessment and Response Team (START V), EPA Region 5, Revision 4* (August 2022), and the EPA *National Functional Guidelines (NFG) for Organic Superfund Methods Data Review* (November 2020).

#### OVERALL EVALUATION

No rejection of results was required for this data package. The results may be used as qualified based on this validation effort.

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**Data completeness:**

Within Criteria	Exceedance/Notes
N	Laboratory control sample (LCS)/LCS duplicate (LCSD) relative percent differences (RPD) and chain of custody (COC) form were not included in the Level I laboratory report. The laboratory provided the COC form and LCS/LCSD RPDs separately. No qualifications were applied.

**Sample preservation, receipt, and holding times:**

Within Criteria	Exceedance/Notes
N	<p>The residual canister receipt vacuums in the laboratory report were recorded as positive values. The laboratory was contacted and confirmed that all values were negative, even though the minus signs were missing, and that the laboratory used the following convention for recording Summa canister vacuums and pressures: vacuums were recorded as positive values using the unit of inches of mercury ("Hg), and positive pressures were recorded using the unit pounds per square inch (psi). No qualifications were applied.</p> <p>The laboratory report receiving notes case narrative states "Samples EPD-DW-C-102223, EPD-UW-G-102223 and EPD-WA-03-102223 were not received at Eurofin Air Toxics, LLC on 10/24/2023 despite notation on the COC. The samples were subsequently received on 10/25/2023 and were added to the analytical request." The laboratory reported the results received on 10/24/2023 separately. No qualifications were applied.</p>

**Method blanks:**

Within Criteria	Exceedance/Notes
N	TO-15 scan (2310544B-10A): Carbon disulfide was detected in the method blank at a level between the method detection limit (MDL) and reporting limit (RL). All carbon dioxide sample results were nondetect; therefore, no qualifications were applied.

**Field blanks:**

Within Criteria	Exceedance/Notes
NA	

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**Surrogates and labeled compounds:**

Within Criteria	Exceedance/Notes
Y	

**MS/MSDs:**

Within Criteria	Exceedance/Notes
NA	

**Laboratory duplicates:**

Within Criteria	Exceedance/Notes
NA	

**Field duplicates:**

Within Criteria	Exceedance/Notes
N	The site-specific QAPP specifies the collection of 1 field duplicate sample per 10 samples. However, fewer than 1 field duplicate sample per 10 samples are included in this sample delivery group. No qualifications were applied based on professional judgement.

**LCSs/LCSDs:**

Within Criteria	Exceedance/Notes
N	TO-15 scan (2310544B-11A/2310544B-11AA): The percent recovery of ethanol exceeded the site-specific QAPP acceptance criteria in the LCSD. The average percent recovery of LCS and LCSD was within the site-specific QAPP acceptance criteria; therefore, no qualifications were applied.

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**Sample dilutions:**

Within Criteria	Exceedance/Notes
Y	Canister dilution factors ranged from 1.32 to 1.58. While no qualifications were applied, the data user should be aware of increased reporting limits for sample dilutions.

**Re-extraction and reanalysis:**

Within Criteria	Exceedance/Notes
NA	

**MDLs/RLs:**

Within Criteria	Exceedance/Notes
Y	Detections between the MDL and RL were reported and qualified as estimated (flagged J) by the laboratory.

**Tentatively identified compounds:**

Within Criteria	Exceedance/Notes
Y	Tentatively identified compounds (TICs) were detected in most samples. The laboratory qualified the results for 2-ethyl-1-hexanol and butyl acrylate as manually searched, but nondetect (flagged U), and during validation these results were qualified as manually searched for, but not found in the sample (flagged U,NF).

**Other [Continuing Calibration]:**

Within Criteria	Exceedance/Notes
N	CCV 2310544B-10A had high percent recovery of freon 11. All freon 11 sample results were qualified as estimated (flagged J).

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**Overall Qualifications:**

See results summary pages attached for changes to the laboratory qualifiers based upon this validation. The following is a list of qualifiers and definitions that may be used for the validation of this data package:

J	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased high.
J-	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased low.
NF	The tentatively identified compound was manually searched for but was not found in the sample.
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated value is the approximate concentration of the analyte in the sample.
R	The sample result is rejected as unusable due to serious deficiencies in one or more quality control criteria. The analyte may or may not be present in the sample.
U	The analyte was analyzed for but was not detected at or above the associated value (reporting limit).
UJ	The analyte was analyzed for but was not detected at or above the associated value (reporting limit), which is considered approximate due to deficiencies in one or more quality control criteria.

<b>Field QC Blanks</b>	None		

## INTRODUCTION

This checklist summarizes the Stage 2A validation performed on the subject laboratory report, in accordance with the U.S. Environmental Protection Agency (EPA) *Guidance for Labeling Externally Validated Laboratory Analytical Data for Superfund Use* (January 2009). Analytical data were evaluated in general accordance with the Tetra Tech Quality Assurance Project Plan (QAPP), *East Palestine Train Derailment Site, East Palestine, Columbiana County, Ohio*, Revision 3 (April 2023), the Tetra Tech Quality Assurance Project Plan, *Superfund Technical Assessment and Response Team (START V), EPA Region 5, Revision 4* (August 2022), and the EPA National Functional Guidelines (NFG) for Organic Superfund Methods Data Review (November 2020).

## OVERALL EVALUATION

No rejection of results was required for this data package. The results may be used as qualified based on this validation effort.

### Data completeness:

<b>Within Criteria</b>	<b>Exceedance/Notes</b>
N	Laboratory control sample (LCS)/LCS duplicate (LCSD) relative percent differences (RPD) and chain of custody (COC) form were not included in the Level I laboratory report. The laboratory provided the COC form and LCS/LCSD RPDs separately. No qualifications were applied.

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**Sample preservation, receipt, and holding times:**

Within Criteria	Exceedance/Notes
N	The residual canister receipt vacuums in the laboratory report were recorded as positive values. The laboratory was contacted and confirmed that all values were negative, even though the minus signs were missing, and that the laboratory used the following convention for recording Summa canister vacuums and pressures: vacuums were recorded as positive values using the unit of inches of mercury ("Hg), and positive pressures were recorded using the unit pounds per square inch (psi). No qualifications were applied.

**Method blanks:**

Within Criteria	Exceedance/Notes
N	TO-15 SIM (2310545-10B): Naphthalene was detected in the method blank at a level between the method detection limit (MDL) and reporting limit (RL). All naphthalene sample results were detected below the RL; therefore, qualified as nondetect (flagged U) at the RL.

**Field blanks:**

Within Criteria	Exceedance/Notes
NA	

**Surrogates and labeled compounds:**

Within Criteria	Exceedance/Notes
Y	

**MS/MSDs:**

Within Criteria	Exceedance/Notes
NA	

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**Laboratory duplicates:**

Within Criteria	Exceedance/Notes
NA	

**Field duplicates:**

Within Criteria	Exceedance/Notes
Y	

**LCSs/LCSDs:**

Within Criteria	Exceedance/Notes
N	<p>TO-15 scan (2310545-12A/2310545-12AA): The percent recoveries of 1,4-dioxane, 2-hexanone, bromodichloromethane, and ethanol exceeded the site-specific QAPP acceptance criteria in the LCS and LCSD. All 1,4-dioxane sample results were nondetect, therefore no qualifications were applied. The average percent recovery of LCS and LCSD was within the site-specific QAPP acceptance criteria for 2-hexanone and bromodichloromethane; therefore, no qualifications were applied. All ethanol sample results were qualified as estimated with possible high bias (flagged J+). The RPD of dibromochloromethane of LCS/LCSD exceeded the site-specific QAPP acceptance criteria. All dibromochloromethane sample results were nondetect; therefore, no qualifications were applied.</p> <p>TO-15 SIM (2310545-12B/2310545-12BB): The percent recoveries of chloromethane exceeded the site-specific QAPP acceptance criteria in the LCS and LCSD. All chloromethane sample results were qualified as estimated (flagged J).</p>

**Sample dilutions:**

Within Criteria	Exceedance/Notes
Y	Canister dilution factors ranged from 1.33 to 1.68. While no qualifications were applied, the data user should be aware of increased RLs for sample dilutions.

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**Re-extraction and reanalysis:**

Within Criteria	Exceedance/Notes
NA	

**MDLs/RRLs:**

Within Criteria	Exceedance/Notes
Y	Detections between the MDL and RL were reported and qualified as estimated (flagged J) by the laboratory.

**Tentatively identified compounds:**

Within Criteria	Exceedance/Notes
Y	Tentatively identified compounds (TICs) were detected in most samples. The laboratory qualified unknown TICs as estimated (flagged J). The laboratory qualified the results for 2-ethyl-1-hexanol and butyl acrylate as manually searched, but nondetect (flagged U), and during validation these results were qualified as manually searched for, but not found in the sample (flagged U,NF).

**Other [Continuing Calibration]:**

Within Criteria	Exceedance/Notes
N	CCV 2310545-11A had high percent recovery of 1,4-dioxane. All 1,4-Dioxane sample results were qualified as estimated (UJ).

**DATA VALIDATION CHECKLIST – STAGE 2A**  
**EPA REGION 5 START CONTRACT**

**Overall Qualifications:**

See results summary pages attached for changes to the laboratory qualifiers based upon this validation. The following is a list of qualifiers and definitions that may be used for the validation of this data package:

J	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased high.
J-	The analyte was positively identified; the associated value is the approximate concentration of the analyte in the sample and may be biased low.
NF	The tentatively identified compound was manually searched for but was not found in the sample.
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated value is the approximate concentration of the analyte in the sample.
R	The sample result is rejected as unusable due to serious deficiencies in one or more quality control criteria. The analyte may or may not be present in the sample.
U	The analyte was analyzed for but was not detected at or above the associated value (reporting limit).
UJ	The analyte was analyzed for but was not detected at or above the associated value (reporting limit), which is considered approximate due to deficiencies in one or more quality control criteria.
