

EPA Projects 52 Counties would not Meet the Strengthened Standard in 2032

EPA projected future fine particle pollution levels only for counties with monitoring data and within the contiguous 48 states. Modeled emissions are developed from a 2018 base year and used in projecting 2016-2020 monitoring data. Projected emissions reflect expected reductions from federal regulations that have been finalized as of March 2023.

State	County
Arizona	Maricopa
California	Alameda
California	Calaveras
California	Contra Costa
California	Fresno
California	Imperial
California	Kern
California	Kings
California	Los Angeles
