

Yearly Reports of the ABSTC Compliance Assurance Program Submitted to EPA

Registrants of Bt corn are required to submit an annual report to EPA detailing activities conducted under the IRM Compliance Assurance Program (CAP). This information is compiled by the Agricultural Biotechnology Stewardship Technical Committee (ABSTC), a consortium of the Bt registrants. These CAP reports include data from grower surveys on refuge compliance and the results of on-farm assessments.

The table below lists the CAP reports received by EPA to date. Individual studies are identified by MRID numbers. Reports are not available for some years (2001 – 2004), though the compliance data from these years has been summarized in other EPA documents.

Year	MRID#
2000	453205-03
2001	No report submitted
