

The background of the slide is a photograph of a water treatment facility. It shows a large concrete dam or spillway with multiple rows of spillway gates. Water is cascading over the gates, creating a series of white, frothy rapids. The overall color palette is dominated by blues and greys, with the white foam of the water providing a high-contrast element. The image is slightly blurred, giving it a sense of motion and scale.

Title An Overview of the "New Normal" and Water Rate Basics

Website <http://pacinst.org/app/uploads/2013/06/pacinst-new-normal-and-water-rate-basics.pdf>

Description White paper describing the trends shaping the "new normal" in California and why it is leading to increasing water prices and changes in water rate structures. The paper also covers the three most common water-rate structures -- flat rates, uniform volumetric rates, and block or tiered rates -- and gives examples of how they are applied.
