## NCP Sorbent Product List

This Sorbent Product List identifies known sorbent materials and products and serves as reference for considering the use of such products when responding to an oil discharge.

**Under 40 CFR 300.915(g)(1)**, the Sorbent Product List covers sorbent products that consist solely of the materials, or any combination thereof, identified in § 300.915(g)(1)(i)-(iii). No technical data are required to be submitted to EPA. A sorbent product covered by § 300.915(g)(1) is considered generically listed on the Sorbent Product List whether or not the sorbent product is specifically identified by name, brand, or trademark. OSCs should be aware that a sorbent product that consist solely of the materials, or any combination thereof, listed in § 300.915(g)(1)(i)-(iii), but not specifically identified on the Sorbent Product List by name, brand, or trademark, are generically listed on the Sorbent Product List.

**Under 40 CFR 300.915(g)(2)**, the Sorbent Product List covers sorbent products that consist of one or more nature organic substances, inorganic/mineral compounds, and/or synthetic compounds not specifically identified in 40 CFR 300.915(g)(1) and meets the definition of a sorbent. Sorbent product submitters provided information for EPA review as applicable under § 300.915(g)(2) and § 300.955(a) and (b) for EPA to determine whether the product meets the definition of sorbent under § 300.5.

**NOTE:** Response actions, including the use of sorbents, are subject to OSC oversight under the NCP.

Please call the **NCP Product Schedule Information Line at (202) 260-2342** if you need further assistance adding a sorbent product to the Sorbent Product List.

The table below provides links, in alphabetical order by product name, to data and information for all sorbent products listed on the Sorbent Product List. Click on the sorbent name, brand, or trademark for summaries of the data and information submitted to EPA under § 300.915(g)(2) for listing. Use the sort and search options on this table to locate specific sets of information.

## NCP SORBENT PRODUCT LIST

### Sorbent Products Listed per § 300.915(g)(1)

Sorbent products consist solely of the following materials, or any combination thereof:

- (i) Feathers, cork, peat moss, and cellulose fibers such as bagasse, corncobs, and straw;
- (ii) Volcanic ash, perlite, vermiculite, zeolite, and clay; and
- (iii) Polypropylene, polyethylene, polyurethane, and polyester.

A sorbent product covered by § 300.915(g)(1) is considered generically listed on the Sorbent Product List whether or not the sorbent product is specifically identified using a brand or trademark. No technical data are required to be submitted for listing on the Sorbent Product List, and no further action is necessary for use as a sorbent. OSCs should be aware that a sorbent product that consist solely of the materials, or any combination thereof, listed in § 300.915(g)(1)(i)-(iii), but not specifically identified by a brand or trademark, are generically listed on the Sorbent Product List.
