¹ StATS is the State Authorization Tracking System which tracks States' progress in becoming authorized for each checklist. This column was added to help the Regions and States relate data entered in that system with the information included in this table. The "rule code" is the symbol used in StATS to represent a particular rule or non-checklist item, e.g., State Availability of Information or Radioactive Mixed Waste.

² A parenthesized number implies that this is not the main rule for the indicated checklist. However, the rule is included on the indicated checklist. Rules with parenthesized numbers are typically technical corrections or amendments to a major final rule. The corrections are usually close enough in time to the initial final rule that the correction was included on the checklist for the initial rule, rather than developing a new checklist for the correction. The exceptions are Revision Checklists 113, 151, and 154, where the amendments occur over a long period of time, but were included in one checklist for the convenience of the States. Revision Checklists 113 and 154 used the last rule as the primary rule for the checklist rather than the initial rule.

³ States have an additional year if statutory changes are required.

⁴ While Revision Checklists 27 and 43 are optional, States which have adopted, or choose to adopt, the changes addressed by Revision Checklist 27 must adopt Revision Checklist 43 changes as well.

⁵ The May 2, 1986 amendments to 40 CFR 264.113 and 265.113, addressed by Revision Checklist 24, must be adopted before or simultaneous with adopting the provisions addressed by Revision Checklist 64. Also see Endnote 7.

⁶ Note that, unlike other checklists which address more than one final rule, Revision Checklist 70 is not presented by each of these rules individually in StATS. Instead, it is represented only once as Revision Checklist 70. This checklist is different from other checklists because it represents an accumulation of small changes to Part 124, relating to the RCRA program, which were missed because they were often presented as relating to other permit programs. Effectively, this checklist is a "catch-up" checklist, with the many rules it

† Optional.

TABLE G-2. NUMERICAL LISTING OF REVISION CHECKLISTS
AND CORRESPONDING CLUSTER (cont'd)
Through September 30, 2024

represents spanning a six-year period from 1983 to 1989. To simplify an already complicated and confusing matter, it was decided to only represent this checklist as one entry, rather than five separate entries.

⁷ Only those sections, i.e., 40 CFR 264.113 and 265.113, of Revision Checklist 24 (Amended) recharacterized as more stringent by the June 26, 1990 correction are included in Non-HSWA Cluster VI. All other Revision Checklist 24 provisions continue to be included in Non-HSWA Cluster II. States which have already adopted the 264.113 and 265.113 amendments as part of their authorization for Revision Checklist 24 in Non-HSWA Cluster II, are not affected by this correction and do not have to submit an amended Revision Checklist 24.

⁸ This is a conditionally optional rule. A State should adopt this amendment only if it has an analog to 40 CFR 261.11.

⁹ Revision Checklist 78 is in HSWA Cluster II, with the exception of the clarifying amendment to §268.33(c) which is in Non-HSWA Cluster VI. This clarification is not immediately effective in authorized States since the requirements are not imposed pursuant to HSWA. Thus, these requirements are applicable only in those States that do not have interim or final authorization. In authorized States, the requirements will not be applicable until the State revises its program to adopt equivalent requirements under State law.

¹⁰ Direct Action Against Insurers in RCRA §3004(t) is not delegable to the States. EPA realizes that some States are currently "authorized" for this provision. Several States have included this provision in their pending HSWA I revision applications. The Regions should review these provisions and clarify with their States that, by virtue of the statute, the Federal cause of action ensured by RCRA §3004(t) remains in effect in authorized States. This provision is not delegable because authorized provisions of State law must operate in lieu of the Federal counterpart and, in this situation, State law providing for a direct cause of action against insurers may augment the Federal Action, but not supersede it.

¹¹ The rule addressed by this checklist is a technical amendment to the final rule (53 FR 43881, October 31, 1988; Revision Checklist 57) that removed strontium sulfide from 40 CFR 261.33, the list of commercial chemical products which are hazardous wastes when discarded or intended to be discarded. States which intend to remove strontium sulfide from their hazardous wastes lists, but have not yet adopted the changes made by Revision Checklist 57 are strongly encouraged to adopt the changes addressed by Revision Checklists 57 and 86 at the same time. Those States that have already adopted the Revision Checklist 57 provisions should adopt the Revision Checklist 86 amendments as soon as possible. States should note that Revision Checklist 86 is a conditionally optional checklist. States choosing not to adopt the removal of strontium sulfide (i.e., Revision Checklist 57) should not adopt the Revision Checklist 86 provisions. However, States which choose to remove strontium sulfide must adopt the provisions addressed by Revision Checklist 86 to be sure that the material has been properly removed from the State's lists and appendices.

¹² This is a conditionally optional rule; if a State chooses to adopt Revision Checklist 119, (57 FR 55114, November 24, 1992), it must also make this change.

¹³ This checklist has been withdrawn. On October 30, 1995 (60 FR 55202), EPA issued an administrative stay of the regulatory provisions set forth in 40 CFR 279.10(b)(2) applicable to used oil destined for recycling that

† Optional.

TABLE G-2. NUMERICAL LISTING OF REVISION CHECKLISTS
AND CORRESPONDING CLUSTER (cont'd)
Through September 30, 2024

has been mixed with either characteristic hazardous waste or waste listed as hazardous because it exhibits a hazardous waste characteristic. However, on January 19, 1996, this administrative stay was vacated by the U.S. Court of Appeals for the District of Columbia. EPA published a final rule on June 28, 1996 (61 FR 33691) clarifying the regulatory status of the mixtures of used oil and hazardous wastes destined for recycling in light of the judicial vacatur. As a result, EPA has decided that a checklist is not necessary for these two final rules.

¹⁴ This checklist has been withdrawn. On April 9, 1999, the United States Court of Appeals for the District of Columbia, in *Great Lakes Chemical Corporation versus EPA* (Docket No. 98-1312), granted the U.S. Government's motion for a voluntary vacatur of the rules addressed by Revision Checklist 165. Because of this vacatur, EPA has withdrawn this revision checklist. Note that the final rule published August 10, 1998 (63 FR 42580), is also vacated as it only clarified that the typographical errors made in the May 4, 1998 (63 FR 24596) rule were corrected by the June 29, 1998 rule (63 FR 35147).

¹⁵ A court decision has vacated the portion of the May 26, 1998 final rule addressing secondary materials reclaimed by the mineral processing industry. The case was decided April 21, 2000 in the U.S. D.C. Circuit Court of Appeals, *Association of Battery Recyclers, Inc. v. U.S. EPA*.

¹⁶ Although this rule was published after June 30, 1998, it amended 63 FR 24963 (Revision Checklist 166) and has been included in RCRA Cluster VIII to keep the amendment with the original checklist.

¹⁷ This is a conditionally optional rule. A State should adopt this amendment only if it has adopted the provisions of Revision Checklists 142 A-E.

¹⁸ This checklist is optional for States that have not added spent lamps to their universal waste program or that have added spent lamps to their universal waste program and regulate spent lamps as stringently as the Federal program. This checklist is not optional for States that have added spent lamps to their universal waste program but do not regulate spent lamps as stringently as the Federal program.

¹⁹ This checklist is only relevant for States that have already adopted the final rule addressed by withdrawn Revision Checklist 165 and wish to amend their regulations to conform to the vacatur.

²⁰ The revisions addressed by this final rule only impact the procedures used by EPA for appeals of permit decisions. According to the State authorization requirements in 40 CFR 271.14, EPA does not require State programs to have equivalent procedures for appeals in their programs. Therefore, the revisions made by this rule concerning permit appeal and termination procedures have no impact on authorized State programs. EPA will not authorize States for this rule and has, therefore, not issued a checklist to be used by States.

²¹ This is a conditionally optional rule. A State should adopt this amendment only if it has adopted the provisions of Revision Checklist 169.

²² Although the July 3, 2001 final rule is part of Revision Checklist 188, the rule is not included in 40 CFR (revised as of July 1, 2001). States that incorporate by reference through the July 1, 2001 CFR and are seeking authorization for Revision Checklist 188 should also adopt the July 3, 2001 amendment to the NESHAPS rule.

† Optional.

TABLE G-2. NUMERICAL LISTING OF REVISION CHECKLISTS
AND CORRESPONDING CLUSTER (cont'd)
Through September 30, 2024

²³ This checklist is optional except for the removal of 40 CFR 268.40(i).

²⁴ The table at 40 CFR 268.40 was revised by Revision Checklist 165 (May 4, 1998; 63 FR 24956, as amended June 29, 1998; 63 FR 35147) which was later withdrawn by EPA because of a U.S. court vacatur on April 9, 1999. States that adopt the 1999 CFR and choose to follow the vacatur should not include the entries for K140 and U408 in their regulations. Note that Revision Checklist 185 (65 FR 12378; March 8, 2000) removed the K140 and U408 entries from the 268.40/table. See IBR Guidance for more information.

²⁵ This is a conditionally optional rule. A State should adopt this rule if it has adopted the provisions of CL 182. Note that CL 202 references provisions from 40 CFR 63. States may either directly reference the provisions in Part 63, or incorporate the provisions into its regulations and reference the provisions within its regulations. If the first approach is used, the State must make sure that its Administrative Procedures Act allows the State to reference the Federal regulations. See IBR guidance for more information.

²⁶ Performance Track was terminated by EPA on May 14, 2009 (74 FR 22741).

²⁷ Note that CL 205 references provisions from 40 CFR Part 63. States may either directly reference the provisions in Part 63, or incorporate the provisions into its regulations and reference the provisions within its regulations. If the first approach is used, the State must make sure that its Administrative Procedures Act allows the State to reference the Federal regulations.

²⁸ States incorporating the federal rules by reference are encouraged to adopt the correction at the same time that the April 22, 2004 provisions are adopted. Those states that will incorporate the July 1, 2004 Code of Federal Regulations by reference, should include language that references or otherwise includes the correction published in the Federal Register on October 25, 2004 to ensure accuracy of regulations.

²⁹ These revisions to the manifest requirements lie under joint RCRA and Hazmat authority. Hazmat law requires consistency in hazardous materials shipping papers, such as manifests. Consequently, States are required to adopt the revised manifest form and associated requirements of today's rule, regardless if the Federal changes could be considered more or less stringent than the existing requirements. This rule will be implemented uniformly on the delayed compliance date of September 5, 2006, regardless of individual RCRA State authorization status. This rule is promulgated almost entirely under non-HSWA authority. Implementation and enforcement beginning September 5, 2006 will be based solely on federal Hazmat law in authorized States, rather than RCRA authority, until States have obtained authorization for this rule. Only the waste minimization certification language (40 CFR 262.27) is promulgated under HSWA authority. These requirements will be effective under Federal RCRA authority in all States prior to the States receiving authorization.

³⁰ States incorporating the federal rules by reference are encouraged to adopt the correction at the same time that the June 14, 2005 provisions are adopted. Those states that will incorporate the July 1, 2005 Code of Federal Regulations by reference, should include language that references or otherwise includes the correction published in the Federal Register on August 1, 2005 to ensure accuracy of regulations.

† Optional.

³¹ Note that this checklist references provisions from 40 CFR 63. States may either directly reference the provisions in Part 63 or incorporate the provisions into its regulations and reference the provisions within its regulations. If the first approach is used, the State must make sure that its Administrative Procedures Act allows the State to reference the Federal regulations. See IBR guidance for more information.

³² This rule was withdrawn by the June 15, 2010 Withdrawal of the Emission Comparable Fuel Exclusion rule.

¹ Direct Action Against Insurers in RCRA §3004(t) is not delegable to the States. EPA realizes that some States were "authorized" for this provision. Several States have included this provision in their pending HSWA I revision applications. The Regions should review these provisions and clarify with their States that, by virtue of the statute, the Federal cause of action ensured by RCRA §3004(t) remains in effect in authorized States. This provision is not delegable because authorized provisions of State law must operate in lieu of the Federal counterpart and, in this situation, State law providing for a direct cause of action against insurers may augment the Federal action, but not supersede it.

² Only those sections, i.e., 40 CFR 264.113 and 265.113, of Revision Checklist 24 (Amended) recharacterized as more stringent by the June 26, 1990 correction are included in Non-HSWA Cluster VI. All other Revision Checklist 24 provisions continue to be included in Non-HSWA Cluster II. States which have already adopted the 264.113 and 265.113 amendments as part of their authorization for Revision Checklist 24 in Non-HSWA Cluster II, are not affected by this correction and do not have to submit an amended Revision Checklist 24.

³ While Revision Checklists 27 and 43 are optional, States which have adopted or choose to adopt the changes addressed by Revision Checklist 27, must adopt the provisions addressed by Revision Checklist 43.

⁴ The May 2, 1986 amendments to 40 CFR 264.113 and 265.113, addressed by Revision Checklist 24, must be adopted before or simultaneous with adopting the provisions addressed by Revision Checklist 64. Also see Endnote 2.

⁵ This is a conditionally optional rule. A State should adopt this amendment only if it has an analog to 40 CFR 261.11.

⁶ Revision Checklist 78 is in HSWA Cluster II, with the exception of the clarifying amendment to §268.33(c) which is in Non-HSWA Cluster VI. This clarification is not immediately effective in authorized States since the requirements are not imposed pursuant to HSWA. Thus, these requirements are applicable only in those States that do not have interim or final authorization. In authorized States, the requirements will not be applicable until the State revises its program to adopt equivalent requirements under State law.

AND CORRESPONDING CLUSTER (cont'd)
Through September 30, 2024

⁷ The rule addressed by this checklist is a technical amendment to the final rule (53 FR 43881; October 31, 1988; Revision Checklist 57) that removed strontium sulfide from 40 CFR 261.33, the list of commercial chemical products that are hazardous wastes when discarded or intended to be discarded. States that intend to remove strontium sulfide from their hazardous wastes lists, but have not yet adopted the changes made by Revision Checklist 57, are strongly encouraged to adopt the changes addressed by Revision Checklists 57 and 86 at the same time. Those States that have already adopted the Revision Checklist 57 provisions should adopt the Revision Checklist 86 amendments as soon as possible. States should note that Revision Checklist 86 is a conditionally optional checklist. States choosing not to adopt the removal of strontium sulfide (i.e. Revision Checklist 57) should not adopt the Revision Checklist 86 provisions. However, States that choose to remove strontium sulfide must adopt the provisions addressed by Revision checklist 86 to be sure that material has been properly removed from the State's lists and appendices.

⁸ This is a conditionally optional rule. A State should adopt this amendment only if it has adopted the provision of Revision Checklist 104.

⁹ This checklist has been withdrawn. On October 30, 1995 (60 FR 55202), EPA issued an administrative stay of the regulatory provisions set forth in 40 CFR 279.10(b)(2) applicable to used oil destined for recycling that has been mixed with either characteristic hazardous waste or waste listed as hazardous because it exhibits a hazardous waste characteristic. However, on January 19, 1996, this administrative stay was vacated by the U.S. Court of Appeals for the District of Columbia. EPA published a final rule on June 28, 1996 (61 FR 33691) that clarified the regulatory status of the mixtures of used oil and hazardous wastes destined for recycling in light of the judicial vacatur. As a result, EPA has decided that a checklist is not necessary for these two final rules.

¹⁰ This checklist has been withdrawn. On April 9, 1999, the United States Court of Appeals for the District of Columbia, in *Great Lakes Chemical Corporation versus EPA* (Docket No. 98-1312), granted the U.S. Government's motion for a voluntary vacatur of the rules addressed by Revision Checklist 165. Because of this vacatur, EPA has withdrawn this revision checklist. Note that the final rule published August 10, 1998 (63 FR 42580), is also vacated as it only clarified that the typographical errors made in the May 4, 1998 (63 FR 24596) rule were corrected by the June 29, 1998 rule (63 FR 35147).

¹¹ A court decision has vacated the portion of the May 26, 1998 final addressing certain provisions addressing secondary materials reclaimed by the mineral processing industry. The case was decided April 21, 2000 in the U.S. D.C. Circuit Court of Appeals, *Association of Battery Recyclers, Inc. v. U.S. EPA*.

¹² This is a conditionally optional rule. A State should adopt this amendment only if it has adopted the provisions of Revision Checklists 142 A-E.

¹³ This checklist is optional for States that have not added spent lamps to their universal waste program or that have added spent lamps to their universal waste program and regulate spent lamps as stringently as the Federal program. This checklist is not optional for States that have added spent lamps to their universal waste program but do not regulate spent lamps as stringently as the Federal program.

¹⁴ This checklist is only relevant for States that have already adopted the final rule addressed by withdrawn Revision Checklist 165 and wish to amend their regulations to conform to the vacatur.

¹⁵ The revisions addressed by this final rule only impact the procedures used by EPA for appeals of permit decisions. According to the State authorization requirements in 40 CFR 271.14, EPA does not require State programs to have equivalent procedures for appeals in their programs. Therefore, the revisions made by this rule concerning permit appeal and termination procedures have no impact on authorized State programs. EPA will *not* authorize States for this rule and has, therefore, not issued a checklist to be used by States.

¹⁶ This is a conditionally optional rule. A State should adopt this amendment only if it has adopted the provisions of Revision Checklist 169.

¹⁷ This is a conditionally optional rule. A State should adopt this Revision Checklist 188 only if it has adopted the provisions of Revision Checklist 168 and 182. Note that although the July 3, 2001 final rule is part of Revision Checklist 188, the rule is not included in 40 CFR (revised as of July 1, 2001). States that incorporate by reference through the July 1, 2001 CFR and are seeking authorization for Revision Checklist 188 should also adopt the July 3, 2001 amendment to the NESHAPS rule.

¹⁸ This checklist is optional except for the removal of 40 CFR 268.40(i).

¹⁹ The table at 40 CFR 268.40 was revised by Revision Checklist 165 (May 4, 1998; 63 FR 24956, as amended June 29, 1998; 63 FR 35147) which was later withdrawn by EPA because of a U.S. court vacatur on April 9, 1999. States that adopt the 1999 CFR and choose to follow the vacatur should not include the entries for K140 and U408 in their regulations. Note that Revision Checklist 185 (65 FR 12378; March 8, 2000) removed the K140 and U408 entries from the 268.40/table. See IBR Guidance for more information.

²⁰ This is a conditionally optional rule. A State should adopt this rule if it has adopted the provisions of CL 182. Note that CL 202 references provisions from 40 CFR 63. States may either directly reference the provisions in Part 63, or incorporate the provisions into its regulations and reference the provisions within its regulations. If the first approach is used, the State must make sure that its Administrative Procedures Act allows the State to reference the Federal regulations. See IBR guidance for more information.

²¹ Performance Track was terminated by EPA on May 14, 2009 (74 FR 22741).

²² Note that CL 205 references provisions from 40 CFR Part 63. States may either directly reference the provisions in Part 63, or incorporate the provisions into its regulations and reference the provisions within its regulations. If the first approach is used, the State must make sure that its Administrative Procedures Act allows the State to reference the Federal regulations.

²³ These revisions to the manifest requirements lie under joint RCRA and Hazmat authority. Hazmat law requires consistency in hazardous materials shipping papers, such as manifests. Consequently, States are required to adopt the revised manifest form and associated requirements of today's rule, regardless if the Federal changes could be considered more or less stringent than the existing requirements. This rule will be implemented uniformly on the delayed compliance date of September 5, 2006, regardless of individual RCRA

State authorization status. This rule is promulgated almost entirely under non-HSWA authority. Implementation and enforcement beginning September 5, 2006 will be based solely on federal Hazmat law in authorized States, rather than RCRA authority, until States have obtained authorization for this rule. Only the waste minimization certification language (40 CFR 262.27) is promulgated under HSWA authority. These requirements will be effective under Federal RCRA authority in all States prior to the States receiving authorization.

²⁴ States incorporating the federal rules by reference are encouraged to adopt the correction at the same time that the June 14, 2005 provisions are adopted. Those states that will incorporate the July 1, 2005 Code of Federal Regulations by reference, should include language that references or otherwise includes the correction published in the Federal Register on August 1, 2005 to ensure accuracy of regulations.

²⁵ Note that this checklist references provisions from 40 CFR 63. States may either directly reference the provisions in Part 63, or incorporate the provisions into its regulations and reference the provisions within its regulations. If the first approach is used, the State must make sure that its Administrative Procedures Act allows the State to reference the Federal regulations. See IBR guidance for more information.

²⁶ This rule was withdrawn by the June 15, 2010 Withdrawal of the Emission Comparable Fuel Exclusion rule.
